Sack Tip Module

One of the building blocks to enable Lean Powder Processing

www.matconibc.com

Sack Tip Module...

...provides a simple yet elegant means of transferring powdered material from sacks or other packs into Matcon IBCs for onward use throughout a processing plant.

Key Features

- 1 Pallet Gate
- 2 Sack Tip
- 3 Access Mezzanine
- 4 Filling Head
- 5 Intermediate Bulk Container
- 6 Weigh Scales

The Goals of Lean Powder Processing

- Reduce the cost per kilogram manufactured
- Maximise plant flexibility - make to order
- Enable rapid product change-over
- Optimise flow manufacturing
- Reduce inventory – improve cash utilisation

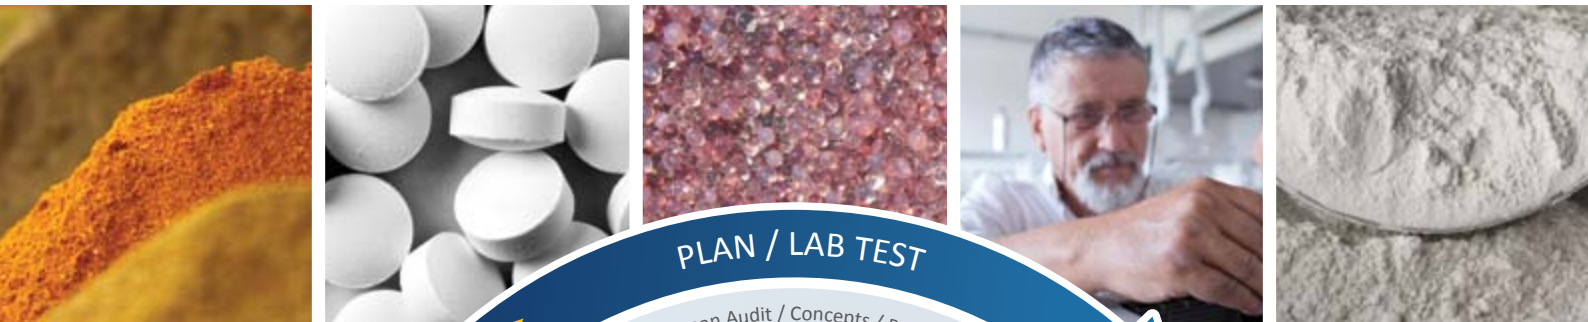

Key Benefits

- ▶ Handle individual raw-materials or full recipe formulation
- ▶ Provide Quality Assurance – sieving and optional magnetic metal removal
- ▶ Traceability – check weighing and material tracking options
- ▶ Designed with cleaning and hygiene in mind
- ▶ Stand-alone / decoupled operation – maximum flexibility
- ▶ Modular solution – factory assembled - proven design – low risk
