Decentralized installation

# THE WIDE WORLD OF THE AS-INTERFACE SYSTEM

## Application areas

- Assembly and handling machines
- Packaging technology
- Storage and materials handling
- Paper manufacturing
- Mechanical engineering

## DECENTRALIZED INSTALLATION TECHNOLOGY WITH MASI

The Murrelektronik Actuator Sensor Interface is a simple, low-cost solution for connecting actuators and sensors in the lower field level. The main advantage of the system is ease of assembly and installation, which saves time and reduces the number of errors.

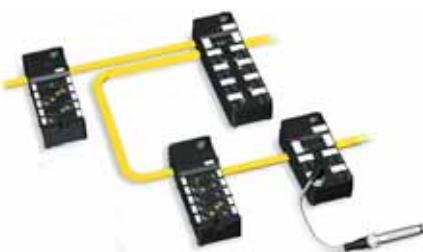

Combined with the installation technology, the continuity of Murrelektronik's AS-Interface System provides a continuous solution from control panel to switch cabinet to field – from MAS100 to MAS168/69K – and from IP00 to IP68/69K. The application-oriented optimization of the modules allows systems to be constructed and expanded both rapidly and reliably.

## MASI – THE CLEVER AS-INTERFACE SYSTEM FROM MURRELEKTRONIK

### MAS100/20 – Rational wiring

Designed for use in control cabinets because of its compact design and protection class.

### MAS165 – a clever way of saving space

The compact I/O modules make automation child's play in the handling, assembly and packing areas.

### MAS167 – Comfortable installation

The continuous installation system for mechanical engineering. Especially resistant to mechanical influences such as vibration and shocks and sealed to meet industrial requirements.

### MAS168 – For greater demands

With round cable bus connections, designed for exposed areas with extremely stringent tightness requirements. Provides a comprehensive solution with protection IP68/69K.

## INFORMATION

The Murrelektronik actuator-sensor interface is a simple, low-cost solution for connecting actuators and sensors in the lower field level. The advantage of the system is its ease of use in planning, assembly and installation. The system is supplemented by TÜV-certified modules with safe outputs for use in safety circuits up to category 3.

## MASI – UNIVERSAL AS-INTERFACE MODULES FROM MURRELEKTRONIK

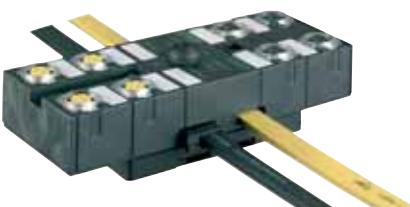

**Save valuable space in the switch cabinet – excellent functionality with compact dimensions**

- Insulation displacement/spring clamp plug-in terminals reduce the cost of installation
- coded plug connectors prevent mistakes

**Avoid mistakes during installation – profile cable connection with penetration technology**

- Bus distributor function - flexible, with no additional costs
- Just one main screw for securing the module - reduces assembly costs

**Application-optimized installation technology**

- Flexible profile cable connection
- Rapid installation - reversed polarity is a thing of the past
- Resistant to mechanical stress

**Install and plug in – ready**

- Rapid installation without polarity reversal using M12 connection
- Minimal space requirement
- Robust and sealed by means of encapsulation

Murrelektronik's AS Interface products are

- Simple – connections using penetration technology, insulation displacement technology or M12
- Continuous – products that are tailored to application areas, from IP00 to IP68/69K
- Up to date – the latest technology in accordance with AS Interface specification 3.0
