Flooring Systems for ESD Protected Areas (EPAs)

Selecting a Flooring System

Electronic components become more sensitive to ESD as device density increases and circuit geometry shrinks. This trend will continue as new micro-chip technologies are introduced. Providing effective protection into the future is an important consideration in the design of an **ESD Protected Area**.

ESD control flooring systems can have a useful life in excess of 10 years. Selecting a material with stable and predictable long-term characteristics is essential. Protection for the next generation of electronic devices is ensured by choosing a material that controls body voltage to low levels.

BS EN 61340-5-1:2007 – Protection of Electronic Devices from Electrostatic Phenomena

This is the current ESD protection standard and sets out the technical performance requirements for flooring systems.

Key Performance Requirements for Floors used for Grounding Personnel

To comply with the standard, one of the following performance qualifications apply:-

- Resistance to ground (R_g) of the person/footwear/floor combination $< 3.5 \times 10^7 \Omega$ or...
- The resistance to ground of the person/footwear/flooring system $< 1 \times 10^9 \Omega$ and body voltage is maintained at $< 100V$

A floor that meets the above criteria allows the movement of ESD-sensitive items within the area without additional protection.

Key Performance Requirements for Floors not used for Grounding Personnel

- Resistance to the groundable point (R_{gp}) $< 1.0 \times 10^9 \Omega$

ESD-sensitive items will require additional protection when moved within the area.

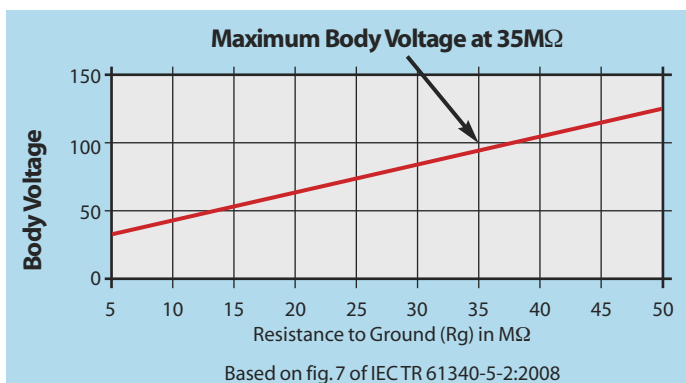

Safety Considerations for Flooring Installations

Personnel safety is the first consideration when selecting items for use in an EPA. BS EN 61340-5-1:2007 contains 2 clauses relating to safety.

- Clause 4.0 states 'electrical hazard reduction practices should be exercised.'
- Clause 5.3 states 'Some of the elements listed in Tables 1-4 do not have a defined lower resistance limit. However, a minimum resistance value may be required for safety reasons.'

Personnel may be exposed to a situation where they are grounded, simultaneously, through several elements in the EPA. These could include footwear, wrist strap, seating and the floor. In the event of an electric shock at mains voltage, the combination of the parallel paths through all the elements may expose the person to significant risk of harm. Selecting a floor material that provides $R_g > 1 \times 10^6 \Omega$ is, by far, the lowest risk strategy. With a floor R_g above this level, even when low resistance footwear and/or seating are in use, electric shock current will be limited to a safe level.

SSE recommend that flooring within an EPA is chosen to maintain safe working conditions at all times, without having to rely on specially selected footwear and/or seating; the characteristics of these items can be highly variable. By adopting the safety criteria used for wrist straps, equivalent to the $1M\Omega$ resistor in the cord, the floor system will be safe at all times.

This graph illustrates the relationship between body voltage and resistance to ground (R_g). At $35M\Omega$, body voltage will be maintained at $< 100V$, complying with the requirements of BS EN 61340-5-1:2007.

NeoStat RX Static Dissipative Flooring

A range of specialised floor coverings for use in the electronic industry or any area that required permanent control of undesirable electrostatic charges.

Neostat RX is the ideal flooring for direct grounding of personnel and equipment, controlling body voltage to <10V.

We recommend that:-

- All materials are fitted by qualified installers to ensure that the correct performance is achieved.
- A survey is carried out to evaluate site conditions and advise on any necessary preparatory work.

SSE PROVIDE A FULL INSTALLATION, TESTING AND CERTIFICATION SERVICE

NeoStat RX is a homogenous flexible synthetic rubber with a range of patterns normally laid on conductive adhesive with copper foil earthing strips. This material has excellent chemical, solvent and heat resistant properties. Suitable for primary grounding of personnel and equipment.

Applications:

- electronic production areas
- service and repair areas
- electronic storage areas
- R & D laboratories
- access flooring
- telephone exchanges
- chemical handling areas

The use of rubber based floor coverings has the following advantages:

- superior chemical and heat resistance compared with vinyls
- high wear resistance
- low maintenance costs
- environmentally friendly
- no acidic fumes or dioxins when exposed to flame

Performance Details

Features	Fleck, Deco, Chip and Speck Patterns	Dot Pattern
Personal Safety (protection from electric shock) ⁽¹⁾	Rg >7.5x10 ⁵ Ω	Rg >5x10 ⁵ Ω
Protection for 100V device sensitivity (person to ground maximum resistance) ⁽²⁾	Rg <3.5x10 ⁷ Ω	Rg <1x10 ⁶ Ω
Floor Surface to Ground resistance (typical average)	Rg ≈2.5x10 ⁷ Ω (Tested at 100V)	Rg ≈3x10 ⁵ Ω
Resistance to hot objects (solder, dropped soldering irons)	Excellent	
Long Term Durability	Excellent	
Chemical Resistance	Excellent	
Maintenance	Non-porous surface facilitates cleaning. Scuff marks can be removed without the use of abrasive pads.	
Material Disposal	End of life disposal or recycling is environmentally safe.	
Performance in Fire	Does not release corrosive fumes, dioxins and heavy metals.	
Guarantee of physical performance	10 Years	
Guarantee of ESD performance	10 Years	

Note ⁽¹⁾
This requirement is equivalent to the 1MΩ safety resistor in wrist strap leads. It is therefore important that this is an inherent property of the floor material, to avoid risks with low resistance footwear or heel straps (or even damp shoes). The value is appropriate for mains voltages of 240V.

Note ⁽²⁾
BS EN 61340-5 Part 1 and 2 are based on protection of devices down to an ESD sensitivity of 100V. Although less sensitive devices may be in use, the trend in electronics is to low power and higher component density at chip level; this inevitably increases the susceptibility of device to ESD damage. The 3.5 x 10⁷Ω value is based on research which has shown that above this level, body voltage can exceed the 100V threshold (see BS EN 61340-5 Part 2 – User Guide section 5.2.8 and Figure 101). See graph on page 10.

NeoStat RX rubber based flooring material produces very low levels of body voltage (< 10V) when used in conjunction with an approved foot grounding method.

NeoStat RX rubber is guaranteed for 10 years both for electrostatic and mechanical performance when installed and maintained in accordance with SSE specification.

SPECIFICATION:

- Roll Width 1200mm
- Roll Length 15m and 8m(3.5mm thick)
- Tile Sizes 610 x 610mm (15 per carton)
- Thickness 2mm (3.5mm thick also available in 3 colours)
- Resistance to Ground (Rg) 10⁶ – 10⁹Ω

See pages 12 and 13 for the full range of NeoStat RX colours

NeoStat LX Linoleum Flooring

A cost effective alternative to vinyl flooring, NeoStat LX Linoleum provides excellent ESD protection, with very low charge generation, good heat and resistance and ease of cleaning. Manufactured from plant-derived materials and limestone, it is fully bio-degradable, with low-cost end-of-life disposal. 3 STANDARD COLOURS

Applications:

- Manufacturing areas
- Service and Repair Areas
- R&D laboratories
- Telephone and IT facilities
- Store rooms

TECHNICAL SPECIFICATION

Roll width:	2000mm
Thickness:	2.5mm
Resistance to ground (Rg):	$10^6 - 10^8\Omega$
Body voltage:	<20V (with suitable ESD footwear).

Grey

Blue

Stone

NeoStat V-LOK Interlocking Flooring Panels

A system designed to overlay existing floors with minimal preparation. Comprising 610 x 610mm panels and 150mm ramped edge components and corners. Ideal for small to medium sized areas and for short-term temporary installations.

The overall appearance is identical to a normal tiled floor. Available as floor kits for customer installation, or fully installed. Tested and certified by SSE.

Applications:

- Manufacturing areas
- Service and Repair Areas
- R&D laboratories
- Telephone and IT facilities

TECHNICAL SPECIFICATION

Panel size:	610 x 610mm
Thickness:	9.7mm
Resistance to ground (Rg):	$10^6 - 10^8\Omega$
Body voltage:	<100V (with suitable ESD footwear).

Royal Blue

Rust

Olive Green

Slate Grey

NeoStat LPC Loop Pile Carpet Tiles

Attractive loop pile carpet tiles incorporating conductive fibres, with a special backing to provide effective grounding through a brass foil grid. Normally laid on a peelable release adhesive.

Format: TILES

Applications:

- service and repair areas
- R&D laboratories
- access flooring
- telephone exchanges
- computer rooms
- high-tech offices

TECHNICAL SPECIFICATION

Tile Size:	500 x 500mm
Thickness:	6mm
Leakage Resistance:	$10^6 - 10^8\Omega$

- The Adaptable Production System (APS) provides a totally flexible manufacturing facility for electronic and light engineering assembly. The structure is based around a fully integrated range of aluminium extrusions, assembled with simple tools. All components are re-usable in new configurations.

- The system is designed to provide a solution for individual requirements, which is both cost effective and based on sound ergonomic principals. The illustrations on this page show typical configurations - many more are possible using standard components.

Typical Configurations

Workstation with Conveyor Track

Vertical posts with a multiple channel profile provide adjustment for setting the height of major components and accessories, using only a hexagon key.

Test Cell Configuration

Panels can be fitted in a range of materials to provide segregation or protection.

Ergonomics

To maximise productivity and eliminate discomfort and potential repetitive strain injury, it is essential to design workstations using sound ergonomic principles. This includes the optimum positioning of work-related equipment and components, choice of seating and lighting levels. In situations where more than one operative needs to use a location, consideration must be given to easily adjustable settings to accommodate individual needs (eg. gas lift chairs, adjustable foot rests etc).

Workstation with Solid Worktop

Swivel posts incorporate short independent sections fitted over a centre spindle to allow accessories to be positioned anywhere around the post and then clamped securely in place.

Horizontal members can be supplied to any length required and have a continuous channel profile on both edges. These channels provide the facility to fit cross members and other components using sliding nuts.

Working Dimensions (mm)	Person's Height (m)				
	1.57	1.63	1.68	1.75	1.83
Maximum horizontal reach	688	683	706	752	790

Eye height	1463	1509	1554	1636	1702
Elbow height	960	986	1019	1080	1123

- A range of standard modules manufactured from silver-anodised aluminium extrusions, assembled using hand tools and offering total flexibility of layout and design.
- Tops are covered with tough Neostat C2 static dissipative rubber in blue or grey (see page 12).
- All modules are supplied with wrist strap and worktop bonding points.
- The standard height is 840mm – alternative heights are available.
- The system is based around initial modules with two leg frames and extension modules with one leg frame, making complex layouts economical, with the minimum number of legs.

Basic Worktop Module

Standard rectangular worktop.

Design a layout, tailored to the process using Standard Modules and Accessories

Worktops

Neostat C2 static dissipative work surface in grey or blue; manufactured from either solid core laminate or with an MDF core and laminate balancer. Static dissipative laminate is available on request.

Rear Accessory Frame

Used to support overhead accessories. Available in two heights; use 1200mm high for Light/Tool Rail.

Light Unit

Twin tube fluorescent fitting with Category II reflector to eliminate low-angle glare.

Overhead Ioniser

Refer to page 116 for the range of ionisers.

Length (mm)	Use with module	Order Code
600	1000 and 1200mm	APS-FLU-06
1200	1500	APS-FLU-12
1500	1800	APS-FLU-15

Louved Panel Units

Provide a grounded location for parts bins. Require rear accessory frames to be fitted (see page 58).

Fixed

Fixed frame for positioning along the rear of standard modules.

Dims. (mm)	Order Code
450 x 450	APS-LPF-0505
600 x 600	APS-LPF-0606

Pivoted

Pivoted mounting, either left or right handed to improve ergonomics in repetitive assembly operations. Fitted with adjustable locking stay.

Dims. (mm)	Order Code
450 x 450	APS-LPP-0505
600 x 600	APS-LPP-0606

Parts Bin Rail

An alternative to Louvred Panel Units for single rows of bins. Requires Rear Accessory Frame to be fitted (see page 58).

Dims. (mm)	Order Code
Single Rail	
450	APS-PBR-05
600	APS-PBR-06
1000	APS-PBR-10

Document Holder

Available in A4 landscape and portrait versions, mounted on a swivel bracket with angle adjustment.

Dims. (mm)	Order Code
Landscape A4	APS-DHL-A4
Portrait A4	APS-DHP-A4

Cable Ports

80mm diameter with a push-out lid, fitted in worktops to customer requirements. Colour: black

Dims. (mm)	Order Code
Cable Ports	CAB-08-BLK

Tool Hanger

Used to suspend small power tools from the Light/Tool Rail (see page 58), available in fixed and sliding versions.

Dims. (mm)	Order Code
Fixed Tool Hanger	APS-THF-F
Sliding Tool Hanger	APS-THF-S

Drawer and Cupboard Units

A range of lockable cabinets to provide drawer and cupboard storage, fitted to the underside of the worktop using brackets and screws provided.

Type	Dims.(mm)	Order code
Single drawer	460dx370wx140h	APS-TUD-4601
Double drawer	460dx370wx245h	APS-TUD-4602
4 drawer	460dx370wx455h	APS-TUD-4604
Drawer/Cupboard	460dx370wx455h	APS-TUD-4601C

LCD Monitor Mounting

This unit provides a fully adjustable mounting for flat screen monitors and incorporates a standard VESA fixing plate. Adjustments include angle, height and distance. For more details, see page 77.

Order Code
SMM-100

Computer Support Cradle

This unit fits to the side or rear of modules to accommodate computers and other equipment. The design allows for adjustment in dimensions to suit specific needs.

Dims. (mm) **Order Code**
250w x 500d APS-CSC-25

Conductive Skate Wheel Track

The track consists of a lightweight galvanised U-channel fitted with conductive polypropylene skate-wheels, either in plain or flanged versions.

Applications include:

- GRAVITY FEED LIVE STORAGE RACKS
- GRAVITY FEED LIVE STORAGE TROLLEYS
- PRODUCTION LINE BUFFER TRACK
- WORKSTATION FEED/PASS-THROUGH TRACK

Dimensions: 3000mm lengths with wheels on 50mm centres.
Wheel diameter 28mm. Channel 38 wide x 27mm.

Description **Order Code**
3000 (Plain) APS-CSW-3050-P
3000 (Flanged) APS-CSW-3050-F

Live Storage Racks

These racks incorporate the conductive skate-wheel track shown left and are designed for use with the Adaptable Production System illustrated on pages 54-59.

Alternatively, racks can be supplied for use with existing workstations, to customer requirements.

PLEASE ASK FOR A QUOTATION FOR THIS PRODUCT. WE REQUIRE A SKETCH OF THE PROPOSED CONFIGURATION, WITH DETAILS OF THE LOAD DIMENSIONS AND WEIGHT.

Trunking Modules

Each module is fitted with standard twin switched 13A sockets and has a single aperture at one end; supplied with a blanking plate, 13A fused spur, or a 13A RCD trip.

Bench Mounted Trunking

Angled anodized aluminium bench trunking for fitting to the rear of the worktop, to provide mains and data services. Supplied as standard modules, **unwired** (or pre-wired – see below). Trunking dims. 100x100mm

Length	Twin Sockets	Blank Plate	Order Code Fused Spur	RCD

Additional Accessories and Pre-Wiring

Extra accessories fitted to trunking to customer requirements.

Item	Order Code
Extra twin switched 13A sockets	SOC-13
Extra fused spurs for overhead lights (3A)	SPU-03
Pre-wiring with 2m flying lead and plug	PRE-W
Data Outlets – RJ45 x 2 in single plate	DAT-02
Pre-wiring of Data Outlet with 2 x 2m CAT5 cables with RJ45 plugs	PRE-DAT

Custom Trunking Modules

Supplied to customer requirements, with any combination of accessories. Please ask for a quotation.

- Modular steel tube bench systems of bolted construction with 20mm static dissipative tops and a range of add-on accessories.
- Frames and accessories are finished in epoxy powder light grey (RAL 7035) with dark grey, dark green or blue drawer and cupboard fronts. All benches have adjustable feet.
- A range of matching extension and side benches for use in-line or at 90° to a main bench to provide flexibility of layout and improved facilities.

Leg Frame Benches

Traditional four-legged bench with welded square tube leg frames, bolted top channels and foot rails. Overhead accessories are supported by bolt-on slotted rear support rails.

Legs: 32 x 32mm tube

Top channels: 70 x 40mm

Foot rails: 25 x 25mm tube

Standard height : 840mm

760 and 920mm heights are also available.

Delivered in component form with assembly instructions.

Wrist Strap Sockets

All benches are fitted with 2 wrist strap sockets, designed to accept either a 4mm banana plug or a 10mm press stud.

Grounding

All benches are supplied with a grounding kit to link the wrist strap sockets and bench to an earth bolt.

Bench Top Materials

All materials are bonded to an 18mm particle board substrate with grey hard plastic lipping.

Neostat C2 - Tough, long lasting static dissipative synthetic rubber, 2mm thick with excellent solder, chemical and heat resistant properties. Leakage resistance: 10⁶-10⁸ Ω

Electrostatic Control

Where required, wrist strap connection points are provided with a minimum resistance to earth of 5 MΩ. It is recommended that wrist-straps have connecting leads with a resistance of 4 MΩ.

NOTE:
IT IS THE RESPONSIBILITY OF THE USER TO ENSURE THAT THE SAFETY REQUIREMENTS OF THEIR PARTICULAR APPLICATION ARE COMPLIED WITH.

- A range of gas-lift high comfort chairs with static dissipative upholstery, for use in ESD Protected Areas.
- Seat and back pads are bonded to an all-steel frame, with conductive glides or castors
- Upholstery is in a hard wearing, static dissipative woven charcoal, anthracite or blue cloth, with the option of dissipative vinyl with a HEPA filter on the Task chair.

Low model with cloth upholstery and castors.

High model with cloth upholstery and glides.

Operator Chair

Adjustable for seat height, back height and angle and foot ring height.

Low Model

Height Range: with glides 410-530mm
with castors 440-560mm

Adjustable height foot ring.

Order Code
CCP-3500

- Seating designed for use in tasks where mobility is important.
- Reduces fatigue and encourages a good ergonomic posture.

Saddle Chair

Upholstered in static-dissipative vinyl with gas-lift height adjustment and load-locking castors.

Height Range: 590-840mm

Suitable for a worktop height of 800-1000mm.

Order Code
CSC-4590

Sit-Stand with Glides

The seat is moulded from static dissipative polyurethane, with gas-lift height adjustment.

Height Range: 590-840mm

Suitable for a worktop height of 800-1000mm.

Order Code
CSS-4590

Sit-Stand with Castors

The seat is moulded from static dissipative polyurethane, with gas-lift height adjustment.

Castors are load-locking for safety.

Height Range: 590-840mm

Suitable for a worktop height of 800-1000mm.

Order Code
CSS-4590-C

- Footrests are essential for correct ergonomic posture, relieving thigh-pressure from chair seats and allowing the operative to sit without strain.
- All models have static dissipative properties and can be grounded through a suitable floor, mat or by the attachment of a ground lead.

Low Adjustable Foot Rest

Height Range: 50-230mm

Suitable for a worktop height of 700-850mm

Order Code
FRL-950

High Adjustable Foot Rest

Height Range: 230-340mm

Suitable for a worktop height of 850-1000mm

Order Code
FRH-951

Variable Footrest

This footrest is adjusted and locked by toe pressure from a sitting position, so is ideal for a workstation that has to accommodate different operatives.

Height Range: 80-290mm

Order Code
CFA-100

- Vacuum cleaners designed to eliminate ESD risks, provided with conductive components to ensure grounding and to eliminate charge generation.
- Designed for routine maintenance on electronic equipment, copiers, printers and other peripherals.

Miniature Cylinder Model

Features electronic speed control with a choice of filters for general applications. Uses a disposable bag system, with changeable filters and an optional exit filter for high integrity particle elimination down to sub-micron levels.

Basic model includes 300 x 21mm flexible nozzle, shoulder strap and 3m mains lead.

Allows use as an air blower with the hose fitted to the exit end.

Hose length: 1.3m Motor: 1300W effective.

EPA-Cleanroom Vacuum Cleaner

A high efficiency vacuum cleaner for EPA applications, upgradeable to HEPA and ULPA standards for cleanroom use. Supplied with accessories as illustrated, which include:-

- 3m extendible hose
 - 3 steel plated extension tubes
 - Crevice nozzle
 - Brush nozzle
 - Upholstery nozzle
 - 330mm floor nozzle
- Motor rating: 1300W variable speed.

Description	Order Code
Vacuum Cleaner with Accessories	PVM-777-ESD-V
9 litre paper filter bags – pack of 10	MT-750
9 litre meltblown filter bags – pack of 10 (use for HEPA filtration performance)	MT-751

Replacement motor and exit filter set (use for HEPA filtration performance)	MT-753-757

- The Purex, Portable fume purification units provide low cost protection from noxious fumes at individual work stations.

FumeCube™ Portable Extraction

A compact and efficient unit for use where flexibility is required. Provides sub-micron particle and gas filtration, with a large HEPA main filter.

Features include:

- very quiet operation (Whisper Stream™)
- electronic flow control
- visual warning indicators (VariColour™)
- variable speed settings
- stainless steel housing
- single or dual arm

TECHNICAL SPECIFICATION

Power Supply:	230V at 0.14kW 50/60Hz
Sound Level:	60dBA
Flow Rate:	200 m ³ per hour
Dimensions (mm):	350mm high x 308mm wide x 283mm deep
Weight:	2.5kg

Single Arm Kit

- FumeCube
- Main filter + pre-filter pad
- 51mm x 2m flexible hose
- 2 connecting cuffs
- Clamp bracket
- 38mm stainless steel flexible arm
- 38mm pen nib nozzle

Order Code

PUR-072-066

Dual Arm Kit

- FumeCube
- Main filter + pre-filter pad
- 2 51mm x 2m flexible hoses
- 4 connecting cuffs
- 2 Clamp brackets
- 2 38mm stainless steel flexible arm
- 2 38mm pen nib nozzle

PUR-072-065

Purex® Fumebuster Systems

Designed to protect up to 4 personnel from inhaling hazardous fume and dust at the workbench using low cost easy to install kits. Choose from high volume 75mm diameter purification arms, high velocity 38mm diameter arms, aerodynamically efficient plenum cowls and Purex Cleancab fume purification cabinets.

Typical Application Areas

Fumebuster's robust design is equally suited to the workshop and the production line where it is used to purify fumes from:

- tinning and potting
- gluing
- soldering assembly and rework and repair stations
- chemical treatments
- dust applications

- Standard kits designed to provide an electrostatic protected area (EPA) on existing benches
- The static dissipative mats can be fixed with the adhesive tape, or loose laid.

Work Station Kit

Use this kit for assembly and repair where soldering or chemicals are present. Consists of a two layer Neostat C2 bench mat fitted with 2 x 10mm male press studs: supplied with an elasticated wrist strap and extendible lead, 3600mm extendible ground lead, earth plug and a 5m roll of double sided adhesive tape.

Bench mat colours available: Grey, Beige, Green or Blue
Please specify colour when ordering.

Mat Size	Order Code
1000 x 600	WSK1-1006
1200 x 600	WSK1-1206

1800 x 600	WSK1-1806

Technical Ref: See page 12 for the specification of Neostat C/2 and alternative mat materials.

Bench mat colours

Configuration Kit

A specialist kit designed for use when carrying out PCB installation in computers and other electronic equipment. The kit comprises a small Neostat C2 mat fitted with 2 x 10mm male press studs, wrist band and lead, ground lead and an earth plug.

Mat colours available:
Blue, Grey, Green or Beige.
Please specify colour when ordering.

Dims. (mm)	Order Code
300 x 200	FCC2-0302
400 x 300	FCC2-0403

EPA Super-Kit

A kit with all the items required to set up a fully protected EPA work-station, including:-

- Blue or grey Neostat C2 bench mat with four 10mm press studs.
- 2.4m ground lead with earth plug.
- Wrist strap with elasticated band and 1.8m coiled cord.
- Jewel continuous workstation monitor (see page 43 for details).
- Dissipative vinyl floor mat with ground lead.
- EPA warning sign (150 x 75mm self adhesive).
- ESD awareness guide.

Please specify blue or grey mats when ordering.

Floor mats are supplied 300mm longer than the bench mat x 750mm wide.

Alternative sizes and configurations can be supplied – please ask for a quotation.

Portable Wrist Strap Checker

Enables field service engineers to carry out daily checks on wrist strap assemblies, as worn.

Description	Order Code
Portable Checker	PWC-0135

- A range of materials for covering work surfaces in electrostatic protected areas (EPAs) with static dissipative properties.
- All materials are available cut to customer requirements.

Neostat C2 Flexible Matting

Neostat C2 is an exceptionally tough two layer static dissipative synthetic rubber material, 2mm thick, which is easy to maintain and has a long life. Textured top layer with excellent heat and solder resistant properties and conductive backing. Designed for general purpose applications - either loose laid or adhered to work surfaces.

Available in standard mat sizes as below or cut to size

REPLACEMENT BENCH TOPS

- These tops can be used to upgrade existing benches to provide static dissipative work surfaces for a range of applications.
- Standard sizes are shown below. We can manufacture to specific requirements, both in terms of size, shape and thickness.
- For standard tops, surface materials are bonded to an 18mm particle board substrate with a balancing laminate on the reverse. Standard thickness: 20mm
- Samples of surface materials are available on request.

Standard Tops

Neostat C2 Tough, long lasting static dissipative synthetic rubber, 2mm thick with excellent solder, chemical and heat resistant properties.

 Thickness: 9.5mm

Statfree® Type i Conductive Anti-Fatigue Interlocking Rubber

Statfree Type i offers the choice of multiple lengths and widths, manufactured from durable homogeneous rubber with patterned interlocking strip. Easily trimmed.

Description	Order Code
Individual Mats 0.6 m x 0.9 m mat, black	CW-80650

SAFETY NOTE:

Care must be exercised in the use of conductive floor mat materials with inherent resistance values below 1 MΩ.
 Do not use in contact with grounded metalwork, machinery, low resistance sub-floors or other equipment.
 Where mains powered equipment is in use it is recommended that higher resistance materials are chosen.
 Always ground through connections incorporating 1 MΩ resistors
 BS EN 61340-5-1 recommends that resistance to ground (Rg) > $7.5 \times 10^5 \Omega$ when a floor is used for primary grounding.

- An essential part of the static control work station where there is no permanent dissipative flooring.
- Provides initial discharge of personnel and trolleys approaching the work area.

Neostat D2 Synthetic Rubber Floor Mats

A two layer synthetic rubber mat with a dissipative surface and a conductive backing. Resistant to hot solder and chemicals.

Available in full rolls, cut lengths or as standard pre-cut mats.

Dims. (mm)	Order Code
Standard Mats	
1200 x 1200	NED2-1212
1500 x 1200	NED2-1512
1800 x 1200	NED2-1812
2100 x 1200	NED2-2112
Cut Lengths ????=Length in mm.	
1200 wide	NED2-????-12
Full Rolls	
10m x 1200mm	NED2-ROLL

SPECIFICATION

Earth leakage resistance:
Average falls between
 $10^6 - 10^8 \Omega$
Thickness: 2.5mm

Static Dissipative Vinyl Floor Mats 7300 Range

Sheet vinyl floor mats, 2mm thick with a conductive backing, available as standard mats, cut to customer requirement or in full rolls.

Dims. (mm)	Order Code
Standard Mats	
1500 x 1000	FMV-1510
2000 x 750	FMV-2007
2500 x 750	FMV-2507
3000 x 750	FMV-3007
2000 x 1500	FMV-2015
Cut Lengths ????=Length in mm	
1500 wide	FMV-????-15
Full Rolls	
25m x 1500mm	FMV-7300

SPECIFICATION

Earth leakage resistance:
average falls between
 $10^6 - 10^8 \Omega$
Thickness: 2.0mm

Colour: Dove

OTHER COLOURS AVAILABLE
TO ORDER IN FULL ROLLS

Installation Accessories

Items to facilitate the installation of floor mats and other sheet materials.

Dims. (mm)	Order Code
Double Sided Adhesive Tape	
50m x 50mm	DST-5050
5m x 50mm	DST-0550
Edge Strip Supplied with screws and plugs	
2400 x 25mm	AES-2402

Dims. (mm)	Order Code
Cover Strip Supplied with screws and plugs	
2400 x 25mm	AJS-2400
Floor Earth Bonding Box with test point terminal	
	EPB-F
Brass Foil Strip to link adjacent mats 18mm wide	
	BFS

Feather Edge Strip

Fitted with adhesive tape around the perimeter of static dissipative mats to avoid a trip hazard and allow easy movement of trolleys. Supplied in 15m rolls with double-sided adhesive tape.

Description	Order Code
15m roll x 2mm	VFS-1502-A
15m roll x 3mm	VFS-1503-A

V-LOK Interlocking Floor Panels

A system of interlocking floor panels, with static dissipative tiles bonded to a conductive base panel, with interlocking tags, providing a clean and durable ESD control floor area. Ramped edges are fitted where access is required.

Panels are easily removed and fully reusable in a new configuration.

Panel size: 608 x 608 x 10mm

Ramp edge: 150mm wide

Description	Order Code
V-LOK Panels	
Pack of 5 panels	VLK-605
Single panels	VLK-601
Ramp Edge	
Straight lengths (per meter)	VLR-15
90° mitred corners	VLM-15

SPECIFICATION

Earth leakage resistance:
average falls between
10⁷-10⁹ Ω

Ramp edge is supplied with adhesive tape fitted.

See page 48 for ground leads for this system.

Walk Off Mats

Designed as an entrance mat for ESD protected areas (EPAs), to reduce soiling from personnel entering and providing an initial discharge path. Colour: Grey

Description	Order Code
1500 x 850	WOM-1508

SPECIFICATION

Earth leakage resistance:
average falls between
10⁷-10⁹ Ω
Thickness: 4.0mm
Weight: 2.5kg per sq.m

PRESS STUD CODES FOR FLOOR MATS

Add to Order Code to indicate positions required.

Clean-Step Entrance Mats

These mats, offered in two sizes, have a tacky surface to capture dirt from shoes, on contact. The base frame holds a pad of 60 numbered films, which are peeled off when soiled. Replacement pads are available for replenishment.

Frame size (mm)	Order Code
800 x 600	CSE-0806
1300 x 600	CSE-1308
Replacement Pads (2 required for CSE-1308)	
750 x 600	CSR-0706

Mat Ground Cord with 10mm Socket

3m straight lead with 10mm female snap socket, ring terminal at end of cord (extra ring terminal included).

Order Code
CW-60358

EPA Grounding Point Cord for Bench Mat and 2 Wrist Straps

Low profile, two banana jacks and either socket or ring terminal at cord end. (Ring terminal versions have extra ring terminal).

Note: requires female stud on mat.

Description	Order Code
Banana jack inputs, 10mm mat stud, 4.5m with ring terminal, 1M Ω resistor	CW-60348
Banana jack inputs, 10mm mat stud, 4.5m wire, 10mm socket, 1 M Ω resistor	CW-60349
Shrouded banana plug inputs, 10mm mat stud, 4.5m wire, ring terminal, 1 M Ω resistor	CW-60361

Interconnecting Leads

These leads provide connections between the individual elements of an EPA and are made up to customer requirements, with a choice of terminations. Straight cable is used up to 900mm long; above this a universal coiled lead is supplied which extends to 2000mm.

NOTE: These leads do not incorporate a safety resistor, and should never be used with a wrist band.

Order Code Format: (up to 900mm)

Coiled lead: Order Code IL-2 C-?-?

IL-length in mm-end1-end2 e.g. IL-600-10F-R8 using codes as illustrated.

Typical lead with 10mm female stud and ring terminal on a coiled lead

Spade terminal in 4 sizes 4, 5, 6, or 8mm

4mm banana plug

10mm female stud

Ring terminal in 4 sizes 4, 5, 6, or 8mm

10mm male/female

Sheet metal clamp

Description	Order Code
Straight Lead up to 900mm	IL-???-?-?
Coiled Lead up to 2000mm	IL-2C-?-?-?
Spade terminal	-S4-S5-S6-S8
4mm banana plug	-4BP
10mm female stud	-10F
Ring terminal	-R4-R5-R6-R8
10mm male/female	-10MF
Sheet metal clamp	-SMC

Shrouded Floor and Table Mat Ground Cord

10mm male shrouded stud with either ring terminal or 10mm press stud termination at the ground end.

Note: requires female stud on mat.

Description	Order Code
Ring terminal	CW-60474
10mm press stud	CW-60488

Universal Snap Kit

User installed snap for homogeneous and multi layer mats. Kit includes a 10mm socket, 10mm stud, long and short screws and a ground label.

Order Code
CW-80014

Push and Clinch Snap Socket

Recommended for multi-layer mats with a conductive inner layer for push and clinch installation.

Pronged 10mm socket snap with ground label.

Order Code
CW-80008

Press Stud Connectors

10mm nickel plated studs to fit to mats, leads and equipment. Studs fitted with either a hand punch or mandrel using a hammer, or with a press which has interchangeable dies.

10mm Male Press Studs

Male stud for fitting to mats and equipment with hand punch set.

Pack of 10
Order Code
PSM-10

Screw-In 10mm Male Press Stud

Supplied with plated self tapping screw.

Pack of 10
Order Code
PSM-10S

10mm Female Press Stud

Female stud for fitting to ring terminals with hand punch set.

Pack of 10
Order Code
PSF-10

10mm Female Lead Termination

Crimp terminal with 10mm female stud for lead termination.

Pack of 10
Order Code
CRT-10F

10mm Male Clinch Stud

To fit to fabrics and thin matting.

Order Code
PTM-10

10mm Female Clinch Stud

To fit to fabrics and thin matting.

Order Code
PTF-10

Lead Extender

Double 10mm male press stud to clip two leads end to end.

Order Code
LEX-10

4mm Socket Converter

Installed with a punch to convert Banana Jack to 10mm male stud connection.

Order Code
CW-80020

10mm Male Punch Set

Setting tool for male studs.

Order Code
PSM-PUNCH

10mm Female Punch Set

Setting tool for female studs.

Order Code
PSF-PUNCH

Crimp Pliers

For setting CRT-F terminators.

Description
Ratchet type
Order Code
CRT-CP-R

Stud Converter

Description

10mm male to female
Order Code
CW-80012
CW-80010

Hand Press

For quick and accurate setting of male and female press studs on larger installations. Supplied with 2 sets of replaceable dies.

Order Code
PS-PRESS

Press Stud and Termination Kit

A comprehensive selection of studs.

- 100 x PSM-10 male press stud and posts
- 100 x PSF-10 female press studs and caps
- 100 x CRT-10F female cable terminations
- 50 x -R5 ring terminals
- 50 x -R8 ring terminals
- 10 x -SMC sheet metal clamps
- 10 x LEX-10 lead extenders
- 1 x PSM-PUN male punch set
- 1 x PSF-PUN female punch set
- 1 x CRT-CP-R crimp pliers

Order Code
PSK-10

JEWEL™ Adjustable Wrist Band

Extra wide, soft, elasticated, high visibility band with silver impregnated knitted nylon on inside for superior conductivity. Patented adjustment eliminates 'tail' of band showing. Bands are fitted with press-studs, compatible with the coiled cords shown opposite.

Colour	Order Code 10mm stud
Sapphire Clasp	CW-60001
Ruby Clasp	CW-60003
Amethyst Clasp	CW-60020
Topaz Clasp	CW-60007
Emerald Clasp	CW-60009

JEWEL™ Rapid Retraction Coiled Cords

These high quality cords are tested to 40m cycles and are manufactured from rapid retraction strength polyurethane, colour coded for high visibility and with an improved press-stud design. The cords include a 1 MΩ resistor at the wristband end and a 4mm banana plug termination.

Colour	Order Code 10mm stud
Sapphire	CW-60261
Ruby	CW-60263
Topaz	CW-60265
Emerald	CW-60267
Amethyst	CW-60269

Adjustable SPEIDEL® Wristband

Durable metal band gives superior skin contact with fast adjustment. A non-flaking or scratching laminated insulator is applied to all external surfaces, with an inner surface of medical grade stainless steel.

Description	Order Code
10mm Stud version	CW-60106
4mm Stud version	CW-60148
10mm Stud extra large	CW-60108
4mm Stud extra large	CW-60150

Dual Wire Wrist Strap

These wrist straps are designed for use with continuous monitors (see page 46) providing ultra-reliable personal grounding in critical applications. Extendible leads incorporate a 1MΩ resistor in each press stud end. Clean room compatible.

Description	Order Code
1.8m lead	CW-60703
3.7m lead	CW-60704

Yellow Range Wrist Straps

High visibility wrist strap with an elasticated knitted fabric band incorporating modified nylon conductive fibres on the inner surface. Supplied with an extendible coiled lead. Extendible leads incorporate a 1MΩ resistor in each press stud end.

Description	Order Code
4mm banana plug termination	WEE-2010-4-1-Y

Description	Order Code
10mm press stud termination	WEE-2010-10-1-Y

Adjustable Elasticated Wristband

Elasticated woven fabric with cam lock adjustment.

Description	Order Code
4mm Stud	CW-60062
10mm Stud	CW-60061
4mm Stud non-allergenic	CW-60063
10mm Stud non-allergenic	CW-60064

Budget Cords

Low cost cords with a choice of terminations for use with the wrist bands shown here.

Description	Order Code
Black cord with 4mm banana termination, 1.8m long	
4mm wrist strap socket	CW-60366
10mm wrist strap socket	CW-60365
Blue cord with 10mm socket termination, 2.4m long	
4mm wrist strap socket	CW-60364
10mm wrist strap socket	CW-60363

Order Code
CW-60084

Relaxed Retraction Ground Cord

An alternative style with a lower retraction force than regular cords, useful when an operative has to carry out tasks producing long cord extension.

Description	Order Code
Black cord with 4mm banana termination, 3.6m long	
10mm wrist strap socket	CW-60316
Black cord with 10mm socket termination, 1.8m long	
10mm wrist strap socket	CW-60318

Disposable Wrist Strap

A 900mm vinyl strap with a conductive element, designed for single use during servicing, repair and upgrade operations. Ideal for sending out with sensitive PCBs for wear by the end user. Packaged individually with full instructions.

Wrist Bands

Description	Order Code
Wrist Band	WE-A-Y

Leads

Description	Order Code
4mm plug	E-2010-4-1-Y
10mm stud	E-2010-10-1-Y

Lead Adaptors

Alligator clip lead adaptor with 10mm press stud and 4mm banana socket.

Description	Order Code
Alligator Clip	IAC-4BP-10

Bulldog clip adaptor with 10mm press stud.

Description	Order Code
Bulldog Clip	IBC-10PS

Adaptor for converting 10mm male stud to 4mm banana socket and stud combined.

Description	Order Code
Adaptor	ADP-4BP-10

Light Weight Leads

These leads have a 1800mm light weight extendible cord; for use with 10mm stud wrist straps or as an unobtrusive ground lead on mats

Description	Order Code
4mm banana plug termination	E-1810-4-1-L

Description	Order Code
10mm press stud termination	E-1810-10-1-L

Grounding Point with Parking Station

A twin grounding point with two combined 10mm studs and 4mm banana sockets.

The unit is fitted with a 3m ground lead with ring terminal.

Order Code
CW 60354

Earth Plugs

Provide a convenient earth connection point in standard 13A mains sockets. Each plug has one brass earth pin connected via a 1M Ω resistor, the other pins being insulative.

Description	Order Code
1 male press stud	EP-100-1

Description	Order Code
3 male press studs	EP-100-3

Description	Order Code
1 2BA terminal	EP-00T-1

Floor Marking Tape

Self adhesive tape 50mm wide for marking the boundaries of an EPA. Suitable for application to most smooth floor coverings.

Description	Order Code
33m x 75mm	FTP-3307
66m x 50mm	FTP-6605
(not illustrated)	

Floor, Wall and Door Signs

300mm diameter, self adhesive signs with a non-slip surface.

Description	Order Code
ESD Protected Area	AWS-30-EPA
ATTENTION	AWS-30-ATT
EPA Exit	AWS-30-EXI

EPA Earth Labels

Self adhesive vinyl labels, back printed on clear film for maximum durability, with a pre-punched hole for mounting behind press studs. Circular labels are 36mm diameter with a 12mm hole.

Rectangular labels are 18 x 30mm with a 5mm diameter hole.

Description	Order Code
Earth Bonding Point used for:- labelling the connection point for wrist straps on benches, mats and other equipment- on equipment housings to label the connection point for wrist straps or portable EPA's.	
36mm Circular	BPL-3636
18 x 30mm	BPL-1830
Earth Grounding Point used for:- labelling the the point on a work surface or other equipment from which a connection is made to the ESD earth facility.	
36mm Circular	GPL-3636
18 x 30mm	GPL-1830
ESD Earth Facility used for:- labelling a point on the ESD earth facility to which bonded elements of an EPA are connected.	
36mm Circular	EFL-3636
18 x 30mm	EFL-1830

Packaging Labels

A range of self-adhesive paper warning labels for bags, containers and other packaging to provide obvious identification of static sensitive devices and assemblies.

Supplied in rolls of 1000.

Label Size (mm)	Order Code
12 x 20	SWL-1220
19 x 39	SWL-1939
25 x 52	SWL-2552
36 x 76	SWL-3676

Packaging Tape

These tapes are printed with a standard warning and triangle symbol to advise that contents are static sensitive.

Description	Order Code
Standard Grade This tape is a PVC based product, only for use on secondary packaging outside an ESD protected area. 66m x 50mm wide	PTS-6605
Anti-Static Grade This tape uses a special paper based material which is non-tribocharging and can be used on proximity packaging within an ESD protected area. 66m x 50mm wide	PTA-6605

EPA Equipment Label

Used to identify ESD protective items and equipment approved for use within an EPA.

Supplied in rolls of 1000, printed on yellow gloss paper.

Label Size (mm)	Order Code
5 x 5	EPA-0505
12 x 12	EPA-1212
25 x 25	EPA-2525
50 x 50	EPA-5050

- Foot Straps provide an economical means of personal grounding when used in conjunction with a suitable static dissipative flooring system, or grounded mats. NOTE: it is a requirement of current ESD standards that a foot strap is worn on both feet.
- All reusable straps incorporate 1MΩ resistors to ensure operator safety and are constructed from tear-resistant rubber, with 8-strand nylon/polyester conductive strips, for positioning inside the shoe.

Full Coverage Foot Strap

Provides continuous grounding during walking, avoiding the risk of body-voltage 'spikes'. Uses hook-and-loop fastening.

Description

Full Cover Foot Strap

Order Code

CW-70021

Standard Heel Strap

Non-marking dissipative inner with hook-and-loop fastening.

Order Code

CW-70004

Standard Toe Strap

Non-marking dissipative inner with hook-and-loop fastening and buckle adjustment for shoe size.

Order Code

CW-70008

Snap-Loc Foot Strap

Non-marking dissipative inner with snap-loc fastening and a one-piece rubber heel-cup.

Order Code

CW-70050

Snap-Loc Toe Strap

Non-marking dissipative inner snap-loc fastening and buckle adjustment for shoe size.

Order Code

CW-70031

Non-Marking Foot Strap

Non-marking three layer high visibility rubber cup with hook-and-loop fastening.

Order Code

CW-70007

Disposable Heel Strap

Single use heel strap for short term use in the EPA. Supplied in packs of 100.

Order Code

CW-70001

Disposable Heel Strap Dispenser

A wall mounted holder for siting at the entrance to an EPA.

Order Code

CW-70003

Disposable Overshoe

Used for temporary grounding in cleanroom conditions; ground contact is provided with a sewn-in conductive ribbon. Supplied in packs of 100.

Order Code

DOS-100

ESD control shoes are the optimum choice for personal grounding through a floor, with effective contact in all parts of the sole/heel area, eliminating the risk of body-voltage spikes.

- A range of high quality shoes designed for comfort and performance durability. All shoes have non-slip soles and meet relevant footwear and safety standards.
- Styles are offered with or without safety toe-caps.
- These shoes have been selected to comply with the requirements of BS 61340-5-1:2007 and meet the recommendations for primary grounding when used in conjunction with a suitable static dissipative floor. (Resistance to Ground – Rg of floor/footwear/person <math>< 3.5 \times 107 \Omega</math>).

ESD Shoe Lockers

These lockers provide compact and secure storage of personal footwear, at the entrance to an EPA or in changing areas. Individual keys are issued to each person for access to their own compartment, with a maintenance key to open the complete locker. Multiple units can be bolted together. Each unit has 10 lockable compartments.

Shoe Locker

A range of fully launderable garments, manufactured from static-dissipative cloth incorporating conductive fibres.

Grid-Cloth Coats Medium-weight

These coats are recommended for tasks involving lifting and carrying operations (e.g. for stores operatives). The cloth for these garments is a 66% polyester, 33% cotton with a 1% carbon-fibre grid pattern.

Cloth weight: 245g/m².
Colours: White or Blue

Description + colour	Order Code
Women's white	WMW-size (10-28)
Women's blue	WMB-size (10-28)
Men's white	MMW-size (34-50)
Men's blue	MMB-size (34-50)

Grid-Cloth Coats Light-weight

These coats have a light weight fabric, recommended for seated assembly work. The cloth for these garments is a 99% polyester with a 1% carbon-fibre grid pattern.

Cloth weight: 180g/m².
Colours: White or Blue

Description + colour	Order Code
Women's white	WLW-size (10-28)
Women's blue	WLB-size (10-28)
Men's white	MLW-size (34-50)
Men's blue	MLB-size (34-50)

Polo Shirts

The cloth for these garments is a 99% polyester with a 1% carbon-fibre grid pattern.

Available in 4 sizes, with a minimum order quantity of 30 shirts.

Description + colour	Order Code
Black	POB-size
Navy	PON-size
Sizes: S=small 34-36"; M=medium 38-40"; L=large 42-44"; XL=extra large 46-48"	

Grid-Cloth Jackets Medium-weight

These coats have a light weight fabric, recommended for seated assembly work. The cloth for these garments is a 66% polyester, 33% cotton with a 1% carbon-fibre grid pattern.

There is a minimum order quantity for this product of 20 Jackets.

Cloth weight: 245g/m².
Colours: White or Blue

Embroidered Badges

Embroidered badges can be supplied, in minimum lots of 30, incorporating your company logo. A program/setting-up fee applies.

Statshield® Smocks and Jackets

Two ranges of fully launderable working smocks and jackets designed for use in the EPA, manufactured from polyester cloth with a chain-link pattern conductive carbon fibre grid (12% content). These garments are very effective in containing the field from electrostatic charges generated on regular clothing. They are designed to be worn with skin contact at the cuff, maintaining a ground connection through wrist straps and ESD footwear.

Size	Chest Size	Sleeve Length	Order Code

WEZ Waste Bin**Conductive Model**

40 litre waste bin moulded from conductive polypropylene.

330 x 330 x 530mm high (235 x 235mm at the base)

**Order Code**

WWB-0540

Dissipative Model

40 litre waste bin moulded from static dissipative polypropylene.

330 x 330 x 530mm high (235 x 235mm at the base)

**Order Code**

WWD-0540

Small Waste Bin

14 litre waste bin moulded from conductive polypropylene.

265mm diameter x 320mm high

**Order Code**

WWB-0214

120 Litre Waste Bin with Lid

120 litre waste bin rotational moulded from conductive polypropylene.

455 x 455 x 650mm high internal

470 x 470 x 670mm high external

**Order Code**

WRL-120

135 Litre Waste Bin

135 litre waste bin rotational moulded from conductive polypropylene.

610 x 400 x 550mm high internal

640 x 430 x 590mm high external

**Description**

135 litre bin
Castor base version

Order Code

WRB-135
WRB-135-C

180 litre Wheeled Bin Litre

A large bin moulded from conductive polypropylene with lid and two conductive wheels.

550 x 700 x 1100mm high

**Order Code**

WRM-180

Conductive Fibreboard Waste Bins

Three sizes of light weight bins manufactured from conductive fibreboard with metal hoop rim, reinforced base corners and metal stud feet.

**Description**

400 x 400 x 780mm high
300 x 300 x 600mm high
250 x 250 x 400mm high

Order Code

WWF-0408
WWF-0306
WWF-0204

Refuse Bags

Manufactured from low charging polyethylene in three colours for waste segregation.

**Description**

110 litre (990 x 460diam) ABL-9946
50 litre (700 x 420diam) ABL-7042
30 litre (700 x 280diam) ABL-7028
(add -B, -R, -G to order code for colour required)

STATGUARD® Static Dissipative Neutral Floor Cleaner

A general purpose cleaner for ESD flooring systems, supplied in 10 litre containers. Dilute 1:10 for normal cleaning, giving an approximate coverage of 500 m² per litre of concentrate. PH value: 7.0

Order Code

CW-71045

STATGUARD® Floor Stripper

A low residue floor stripper for the removal of Statguard Floor Finish and other polymer type coatings. Supplied in 10 litre containers, normally diluted 1:3 with hot water. Coverage: 10 m² per litre of concentrate. PH value: 10.0

Order Code

CW-71047

STATGUARD® Static Dissipative Floor Finish

A static dissipative floor finish for application to most smooth, hard and sealed floors, supplied in 10 litre containers. Applied undiluted at a rate of 45-50 m² per litre per coat; a minimum of two coats are required. PH value: 8.8

Order Code

CW-71046

REZTORE® ESD Mat Cleaner

A silicone free cleaner and restorer for ESD mats that leaves no insulative residue. Available as wipes or spray bottles.

Description

Carton of 12 x 500ml spray
1 litre spray container
Carton of 12 x 1 litre spray
10 litre refill
Static wipes
Dispensers of 160 wipes
12 packs of 60 wipes

CW-71028
CW-71050
CW-71051

ReztoRE™ ESD Hand Lotion

A special formulation for the electronic manufacturing environment, used to improve wrist band/skin contact. This product has the added benefit of reducing contamination to PCBs that could cause solderability problems. The lotion has a mild peach scent, contains vitamins A,D and E and is enriched with Aloe Vera.

Description

235ml bottle
1 litre bottle
3.8 litre bottle with pump

Order Code

CW-70950
CW-70951
CW-70952

REZTORE® Topical Antistat

Antistatic, low tribocharging, static dissipative treatment for hard surfaces.

Description

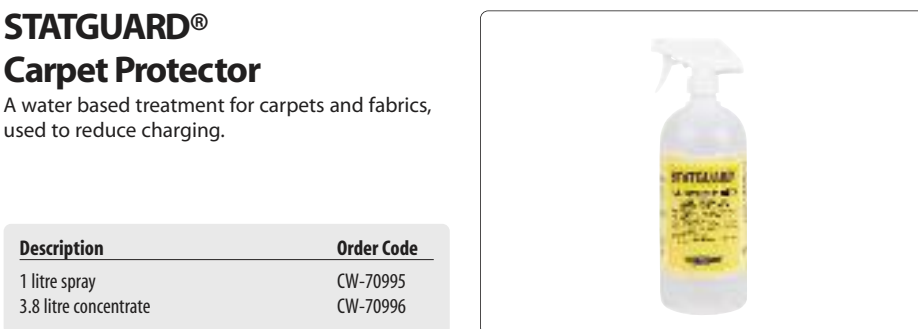

1 litre spray
1 litre spray x 12
10 litre refill

Order Code

CW-71029
CW-71030
CW-71033

STATGUARD® Carpet Protector

A water based treatment for carpets and fabrics, used to reduce charging.

Description

1 litre spray
3.8 litre concentrate

Order Code

CW-70995
CW-70996

STATGUARD® Conductive Acrylic Latex Paint

An acrylic based paint suitable for applying to wall, floors and wooden surfaces. Coverage 7-10 m² per litre (one coat). Colours: mid-grey and light grey

Description

3.8 litre drum mid-grey
19 litre drum mid-grey
19 litre drum light grey

Document Holder

A clear, unpunched antistatic holder, open on the top and right for issuing individual documents in the EPA.
Printed with the ESD protection logo.
Supplied in packs of 100.

	Order Code
Per 100	ADH-A4

Document Wallets

Multi-punched, clear antistatic document wallets in three sizes.
Printed with the ESD protection logo.
Supplied in packs of 100.

Description	Order Code
A5 size	ADW-A5
A4 size	ADW-A4

Ring Binders

A4 ring binders with a blue static dissipative covering and a standard warning symbol, suitable for use within an ESD protected area.

Description	Order Code
2 Ring - 25mm	PRB-0225
4 Ring - 25mm	PRB-0425
4 Ring - 50mm	PRB-0450

Clipboards

A4 clipboards with a static dissipative covering and a standard warning symbol, suitable for use within an ESD protected area.

Description	Order Code
A4 size	CLB-A4

Document Trays

Stacking document trays, manufactured from black conductive material.

Description	Order Code
370 x 270 x 57 external 340 x 245 x 54 internal Black Conductive	DLT-3727

Badge Holders

Designed to hold CR80 cards (credit card size), manufactured from 0.25mm static dissipative PVC in portrait or landscape format.
Supplied in packs of 10.

Description	Order Code
Portrait	ABH-P
Lapel clip	ABH-CLIP

Electrostatic Charge Gun

Provides a useful training aid for demonstrating the principles of charging and charge neutralisation. A high ionising potential is produced when the trigger is pulled, changing polarity when the trigger is released.

Order Code
ZER-01

ESD Training Paddles

Used to demonstrate charging by induction, insulators and conductors, charge retention on insulators and charge transfer. One paddle has an isolated aluminium pad and the other paddle an insulative acrylic pad.
Contact surface: 102 x 76mm

Order Code
CW-91420

ESD Training CD

This CD, produced by a leading European semiconductor device manufacturer, provides a useful introduction to the problems of ESD in electronic manufacturing. The contents cover electrostatic charge and discharge, typical protection measures and an overview of suitable equipment and materials for ESD protection.

Order Code
ESD-TCO

ESD Awareness Guide

This illustrated booklet sets out the basic requirements for effective ESD protection and will form a useful addition to any training program.

Order Code
CW-91440

ESD Awareness Posters

A set of 4 laminated posters in A4 format, useful as a reminder to staff of key ESD issues.

- Personal Grounding
- Correct Packaging
- Risk from Insulative Objects
- General Procedures

Printorama Secondo
- fits into the base of WEZ containers.

Full WEZ Catalogue available on request

WEZ-Rack

A system of slotted walls, injection moulded from conductive polypropylene, which clamp to aluminium rails to provide PCB location facilities in standard 600 x 400mm and 400 x 300mm containers or for use as free standing racks.

Dims. (mm)	Order Code

WEZ-RACK Wall Types:

No Backstop. Available in all sizes.

2.5mm Backstop. Available with 255 and 355mm walls only.

4mm Backstop. Available with 555mm walls only.

7.5mm Backstop. Available with 355mm walls only.

WEZ-Rack 100

A sturdy system comprising non-flexing single sided partitions 100mm in depth, designed for use in WEZ containers to provide fast and easy settings for PCB storage.

Ideal for small and narrow PCBs.

Dims. (mm)	Order Code
Single Rack Adjustable Walls with Backstop	
Slot Pitch: 10mm Slot Width: 3.5mm

360 x 260 x 15	CFI-3626-15
560 x 360 x 15	CFI-5636-15

Machined Foam Inserts

Where a high level of mechanical protection is required for expensive, complex assemblies, conductive machined foam provides an excellent solution. The material is a conductive EVA foam, in a range of densities. A modest charge for programming is made and, to save costs, prototypes are normally machined from non-conductive foam for dimensional checking. WEZ containers and lids provide an effective outer case for transport and storage.

For details of the range of WEZ conductive containers refer to page 66.

Injection Moulded Divider Strips

Manufactured from conductive polypropylene in five sizes to suit WEZ containers.

Dim (mm)	Slot Pitch	Order Code
Interlocking Divider Strips Conductive black		
258 x 100	32	WDI-2610
358 x 100	32	WDI-3610
558 x 100	37	WDI-5610
358 x 200	68	WDI-3620
558 x 200	76	WDI-5620

Manufactured from conductive polypropylene for cutting to any required size.

Dim (mm)	Slot Pitch	Order Code
Custom Divider Strips Conductive black		
1100 x 45	14	WCD-1145
1100 x 88	14	WCD-1188

For additional container dividers and inserts refer to page 94.

Corriplast Container Dividers

A standard interlocking divider system, manufactured from conductive Corriplast, providing an economical solution for the sub-division of WEZ containers. (See page 66)

Use as follows:-

255mm long in 300mm container size

355mm long in 400mm container size

554mm long in 600mm container size

175	PHA-6417
200	PHA-6420
250	PHA-6425

Dims. (mm)	Order Code
Rivetted-in Divider Set	
Similar to Drop in Divider Set inserts but rivetted into the box during manufacture.	
To fit 400x300 container	
125	PHC-4312
175	PHC-4317
200	PHC-4320
250	PHC-4325
To fit 600x400 container	
125	PHC-6412
175	PHC-6417
200	PHC-6420
250	PHC-6425

Transit Cases

These cases are fitted with reinforced corners, a metal beaded rim, drop handle and lockable catches. Ideal for carrying field service spares, instrument kits etc. They can be fitted with machined foam inserts or divider sets to suit specific applications.

CORSTAT COLLAPSIBLE TOTES

These boxes are manufactured from conductive Corriplast, providing an economical solution for the storage and transit of ESD-sensitive PCB and components.

Boxes are delivered flat, for quick assembly when required, with a unique snap-fastening system.

Available in a range of standard sizes, with drop-on lids.

Standard interlocking dividers form part of the system to provide flexible sub-division into compartments.

SCB-25 PCB Rack

SCB-25

This rack is moulded from conductive polypropylene with 48 PCB locations on 8mm pitch.

Overall dimensions (mm): 406 x 275 x 150 high

Internal dimensions (mm): 250 base depth x 125 high

Groove dimensions (mm): 2.8 wide x 4 deep

SCB-25 Dividers

Clip into location slots to accommodate PCBs that cannot be supported in the grooves. Supplied in packs of 10.

Description	Order Code
1406 x 275 x 150mm high	SCB-25
Divider for SCB-25 (per 10)	SCB-25-DIV

For Louvred Panel Systems see pages 112-115.

SCO PCB Racks

This rack, injection moulded from conductive polypropylene, is designed for use freestanding on a bench, providing 25 PCB locations at 10mm pitch

SCO-17

Overall dimensions (mm): 272 x 208 x 93 high

Internal dimensions (mm): 165 base depth x 83 high

Maximum PCB thickness (mm): 2.4

SCO-30

Overall dimensions (mm): 268 x 355 x 128 high

Internal dimensions (mm): 304 base depth x 114 high

Maximum PCB thickness (mm): 3.2

Dims. (mm)	Order Code
272 x 208 x 93	SCO-17

Use of this item in PCB trolleys (see page 108)

- These racks have injection moulded grooved panels, manufactured from conductive polypropylene, clamped onto aluminium rails, allowing adjustment for PCB width.
- Supplied as individual components for assembly to meet specific requirements.
- Both sizes can be stacked together on rail and panel faces; an adaptor hook is available for use with louvred panels.

Adjustable PCB Rack

Small Adjustable Rack The single faced panels have a removable back stop and can be clipped together to form deeper racks.

Assembly requires 2 aluminium rails.

Panel dimensions: 300 x 170mm

PCB Slots: 46 at 6mm pitch

Max. PCB thickness: 3.5mm

Large Adjustable Rack All panels have a fixed back stop.

Assembly requires 4 aluminium rails

Panel dimensions: 480 x 290mm

PCB Slots: 81 at 5mm pitch

Max. PCB thickness: 2.5mm

Component Storage Bins

Made from conductive polypropylene to provide small parts storage on standard shelves 300, 400, 500 and 600mm deep. Bins self stack to maximise space utilisation and incorporate a corrugated base to ease component picking (600mm deep bin has smooth base). Supplied with full width labels and clear (non-dissipative) shield.

Conductive Container Dividers

A cost effective system for dividing all types of ESD-protective containers. These dividers are available as standard designs for various container systems.

Refer to page 72 for WEZ container dividers.
Refer to pages 74-75 for Corstat Stacking Boxes and Collapsible Totes

PLEASE CALL FOR SEPARATE DETAILS AND PRICES OF THIS RANGE

- Metallised shielding bags provide excellent protection for static-sensitive PCBs.
- Contents are protected against ESD outside protect areas.
- Semi-transparent so that contents can be identified without opening.

Buried Metal Shielding Bags

Bags are manufactured from tough polyester film with a conductive metallised middle layer and a low charging polyethylene inner layer. All bags are printed with a standard warning symbol and warning caption, together with traceable manufacturing batch code. Wide high strength heat-sealed side seams maintain bag integrity. Available in plain opening and resealable versions.

TECHNICAL SPECIFICATION

Surface Resistance:

Outer layer:	<10 ¹¹ Ω	EOS/ESD S11.11
Metallised layer	<10 ² Ω	EOS/ESD S11.11
Inner layer:	<10 ¹¹ Ω	EOS/ESD S11.11
Static Shielding:	<25nJ	EOS/ESD S11.11
Light transmission:	>40%	
Overall Thickness:	80μm	

Metal Out Shielding Bags

Bags are manufactured from tough polyester film with a conductive metallised outer layer protected by an anti-abrasion lacquer and a low charging polyethylene inner layer. All bags are printed with a standard warning symbol and warning caption, together with traceable manufacturing batch code. Wide high strength heat-sealed side seams maintain bag integrity. Available in plain opening and resealable versions.

TECHNICAL SPECIFICATION

Surface Resistance:

Lacquer layer:	<10 ⁶ Ω	EOS/ESD S11.11
Metallised layer	<10 ² Ω	EOS/ESD S11.11
Inner layer:	<10 ¹¹ Ω	EOS/ESD S11.11
Static Shielding:	<25nJ	EOS/ESD S11.11
Light transmission:	>40%	
Overall Thickness:	80μm	

Buried Metal Moisture Barrier Bags

Bags are manufactured from tough polyester film with a conductive metallised outer layer protected by an anti-abrasion lacquer and a low charging polyethylene inner layer. All bags are printed with a standard warning symbol and warning caption, together with traceable manufacturing batch code. Wide high strength heat-sealed side seams maintain bag integrity.

TECHNICAL SPECIFICATION

Surface Resistance:

Outer layer:	<10 ¹¹ Ω	EOS/ESD S11.11
Metallised layer	<10 ² Ω	EOS/ESD S11.11
Inner layer:	<10 ¹² Ω	EOS/ESD S11.11
Static Shielding:	<20nJ	EOS/ESD S11.11
Overall Thickness:	92μm	
Moisture Barrier:	0.002 grams	ASTM f1249-90.

PLEASE REFER TO THE SSE PRICE LIST OR WEBSITE FOR A FULL LIST OF SIZES FOR THE ABOVE PRODUCTS

All the bags on this page are supplied in sealed packs of 100.

Shielding Bubble Bags and Roll Film

Manufactured from metallised shielding film laminated to antistatic polyethylene bubble film and amine free antistatic inner lining. Provides mechanical and shielding protection in one package. Each bag has a fold-over lip for sealing. Supplied in packs of 10 or as 100m rolls of sheet.

TECHNICAL SPECIFICATION

Rs (inside and outside surface) $<5 \times 10^{11} \Omega$
 Discharge: <2 sec 1000 to 100V at 50% RH
 Thickness: 70 μ m heat sealable.

Pink Low-Charging Bags

Manufactured from low-charging polyethylene, which contains additives to prevent charge generation. Available in standard or resealable versions. Ideal for holding non-esd sensitive items within the EPA.

Supplied in packs of 100.

NOTE: These bags do not have shielding properties.

TECHNICAL SPECIFICATION

Rs $<1 \times 10^5 \Omega$
 Discharge: <1 sec 1000 to 100V

Conductive Black Bags

Manufactured from conductive polyethylene, these bags are suitable for packaging of PCBs that do not contain on-board batteries. Conductive bags are not a true shielding bag and use should be restricted to ESD Protected Areas or as proximity packaging within a shielding outer. Supplied in packs of 100.

TECHNICAL SPECIFICATION

Rs $<1 \times 10^{11} \Omega$
 Discharge: <2 sec 1000 to 100V
 Shelf Life >1 year
 Thickness: 70 μ m heat sealable.

PLEASE REFER TO THE SSE PRICE LIST OR WEBSITE FOR A FULL LIST OF SIZES FOR THE ABOVE PRODUCTS

Desiccant Sachets and Moisture IndicatorCards

Used inside Moisture Barrier Bags to maintain low humidity conditions and indicate seal failure or puncture.

Unit and Size	Per Can/Pack	Order Code
½ unit Desiccant Sachet 38 x 80mm	700	CW-90666

50 litre (700 x 420diam.)	ABL-7042
30 litre(700 x 280diam.)	ABL-7028
(add -B, -R, -G to order code for colour required)	
Size	Colours available
110 litre	Blue/Red/green
50 litre	Blue/Red
30 litre	Blue

Antistatic Cellulose Tape

Available in clear film or printed with ESD symbols. Ideal for bag sealing and DIP tube packing. Tape core 76.2mm or 25.4mm.

**Antistatic Shielding Tape**

Printed with a conductive grid to provide shielding performance for critical closure applications. Base film and adhesive are low charging (antistatic).

**Antistatic Polyimide High Temperature Tape**

Used for PCB connector masking in wave solder and reflow ovens. Maximum temperature: 300°C for 10sec.

**Antistatic High Temperature Tape**

Used for PCB connector masking, the tape is waterproof and low charging. Maximum temperature: 145°C for 45min.

**Tape Dispensers**

Groundable chassis tape dispensers for use with all the tapes illustrated.

**Width Capacity (mm)**

48

Order Code

CW-71136

Packaging Tape

These tapes are printed with a standard warning and triangle symbol to advise that contents are static sensitive.

**Description**

Standard Grade This tape is a PVC based product, only for use on secondary packaging outside an ESD protected area.

66m x 50mm wide

Order Code

PTS-6605

Anti-Static Grade This tape uses a special paper based material which is non-tribocharging and can be used on proximity packaging within an ESD protected area.

66m x 50mm wide

PTA-6605

Conductive Foam

These foams meet the resistivity and non-corrosivity requirements of MOD specification TS 10218. Both grades of foam are available cut to size - please ask for a quotation.

Thickness (mm)	Order Code
Low Density packs of 4 - 500 x 500mm sheets. Suitable for transit packaging and cushioning.	
6	CFL-06
10	CFL-10
12	CFL-12
15	CFL-15
20	CFL-20
25	CFL-25
High Density packs of 9 - 305 x 305mm sheets. Suitable for protection of individual components, allowing lead shorting by insertion into the material.	
6	CFH-06
10	CFH-10
15	CFH-15
25	CFH-25

Machined Foam Inserts

Where a high level of mechanical protection is required for expensive complex assemblies, conductive machined foam provides an excellent solution. The material is a conductive EVA foam, in a range of densities. A modest charge for programming is made and, to save costs, prototypes are normally machined from non-conductive foam for dimensional checking. WEZ containers and lids provide an effective outer case for transport and storage.

For details of the range of WEZ conductive containers refer to page 66.

T-Range Small Parts Cabinets

Cabinets which have frames moulded from conductive polypropylene and drawers moulded from conductive polystyrene, with zinc plated steel shelves. Drawers are available in 6 sizes, supplied with plain labels. Suitable for bench or wall mounting with the option to group on fixed racks or turntables (see opposite page).

REEL STORAGE TROLLEYS

■ This versatile adjustable trolley provides storage and safe transport for up to 360 SMD reels.

Adjustable reel storage trolley, steel framed, with a static dissipative epoxy finish and conductive castors (two braked) for use within an EPA, providing effective grounding of the whole assembly.

All storage levels are adjustable by slackening the corner clamps with a hexagon key.

Load capacity:
Per trolley 200kg
Per level 50kg.

Each level consists of a wire-frame reel rack with 30 locations for 7" reels or 15 locations for 13/15" reels. Each location is 60mm wide and reel sizes can be mixed within one level. Individual reel racks can be purchased for use on existing shelves on trolleys.

Description	Order Code
Reel Trolley with Base Shelf and 3 Reel Storage Levels 1785h x 1100w x 540d	TRT-1803

Reel Racks Extra - See TRR-1015 below.

Each reel and lower shelf are height adjustable with hexagon key to individual requirements.

- A range of trolleys for the storage and transportation of printed circuit boards in production quantities. Boards are supported securely on two parallel edges, in either the vertical or horizontal plane, by injection moulded conductive polypropylene grooved panels. The spacing between panels is adjustable for various sizes of PCBs.

Aluminium Square Tube Construction Trolleys

Horizontal PCB Location

The basic trolley has two single sided end panels and one double sided intermediate panel.

Trolley dimensions: 1500mm high x 600mm or 900mm wide.

Earth Bonding

10mm press studs for earth bonding

Description	Order Code
Suffix to order ref.	
2 - 10mm press studs	-10PS

TECHNICAL SPECIFICATION

Framework:	25mm anodised aluminium square tube. Aluminium panel support frames.
Castors:	100mm swivel two conductive, two grey nylon braked
Slot Dimensions:	Number of slots per panel - 100. Slot pitch - 8mm. Slot size - 2.5 wide x 3.5mm deep. All trolleys provide access from both sides.
Earth Bonding:	Achieved with - conductive castors (two per trolley) or - 2 x 10mm press studs and ground lead.

Conductive rubber tyred castors (normally fitted 2 per trolley).

Grey nylon braked castors.

TUBE KIT TROLLEYS AND UNIVERSAL TROLLEY

- A range of trolleys constructed from anodised aluminium square tube which can be economically adapted for a wide range of applications. All shelves are light grey static dissipative melamine and the framework is electrically bonded throughout to ensure efficient grounding, either through conductive castors or a snap on ground lead.

Adjustable Shelf Trolleys

Adjustable steel trolleys, steel framed with a static dissipative epoxy finish, dissipative laminate shelves and conductive castors (two braked) for use within an EPA, providing effective grounding of the whole assembly.

Two styles are offered, in low or high configurations. All shelves are adjustable by slackening the corner clamps with a hexagon key.

Load capacity:
 Low Trolley: 150kg
 Tall Trolley: 300kg
 Per shelf: 50kg

Trolleys can be fitted with a pair of mesh end panels to secure loads.

Description	Order Code
Low Trolley with 2 shelves - Overall Height: 1015mm	
800 x 430	TTA-4082
1000 x 430	TTA-4102
800 x 530	TTA-5082
1000 x 530	TTA-5102
Tall Trolley with 4 shelves - Overall height: 1535mm	
Shelf Size (mm)

927	KMT-0912D
1233	KMT-1212D

Note: All louvred panel trolleys are supplied with the upper framework and panels assembled and packed flat with the base, castors and handle.

Castor Types

All castors are 100mm diameter swivel type. two conductive and two grey rubber with brakes are fitted as standard.

Storage Racks

Assembled from initial racks supplied with two braced legs and extension racks supplied with one braced leg
Container extra, see page 114

Panel Width (mm)	Order Code
Single Sided Racks -	
Initial Rack with 2 support feet	
623 x 1220	KSR-0612S

420 x 381 x 175	SQB-106

SCB-25 PCB Rack

SCB-25

This rack is moulded from conductive polypropylene, with 48 PCB locations on 8mm pitch.

Overall dimensions (mm):	406 x 275 x 150 high
Internal dimensions(mm):	250 base depth x 125 high
Groove dimensions (mm):	2.8 wide x 4 deep

SCB-25 Dividers

Clip into location slots to accommodate PCBs that cannot be supported in the grooves. Supplied in packs of 10.

Description	Order Code
406 x 275 x 150mm high	SCB-25
Divider for SCB-25 (per 10)	SCB-25-DIV

Hook-On-Shelf

This shelf is fitted with a static dissipative mat and is ideal for holding PCB assemblies.

Description	Order Code
420 x 300 x 50	KHS-0403

■ Stands and Trolley manufactured from steel tube with a grey static dissipative epoxy finish.

Wez Rack Adaptor Plate

This adaptor fits to the aluminium rail on WEZ Racks to provide louvred panel mounting.

Dims. (mm)	Order Code
Single Hook for narrow racks up to 150mm PCB size	KWZ-01
Double Hook for wide racks up to 300mm PCB size	KWZ-02

For racks over 300mm use two KWZ-01
For information on the Wez Rack system refer to page 90.

Drawer Cabinet Adaptor

This adaptor fits to the back of standard drawer cabinets to provide louvred panel mounting. Maximum load per pair 30kg. For information on the Drawer Cabinet range system refer to pages 102 and 104.

Width (mm)	Order Code
300	KDC-03

Stacking Bins

A range of stackable bins, manufactured from conductive polypropylene for use with or without storage racks and trolleys. Trays can be split across the width with a dissipative coated steel divider. Labels and transparent shields are also offered.

Dims. (mm)	Order Code
d x w x h	Bins
165 x 105 x 75mm	TBS-16
192 x 149 x 105mm	TBS-19

	TBL-40

Racks and Trolley

Free standing single and double sided racks and a double sided trolley provide high density storage using the above stacking bins. Each unit has eight bin rails in the height.

Dims. (mm)	Order Code
Single Sided Rack	
1585 x 820 x 420	TBR-16S
Double Sided Rack	
1585 x 820 x 600	TBR-16D
Double Sided Trolley	
1700 x 820 x 600	TBT-17D

- System of easily assembled and adjusted shelving, conductive throughout and suitable for Class 100 cleanroom applications. Shelves are supported on tubular uprights with a patented locking collar. Castors can be fitted to the uprights to form mobile racks.

Tubular Post Shelving

Shelves - solid sheet or open wire mesh in stainless steel or zinc chromate finish on mild steel.

Description	Order Code
Solid Shelves - Zinc Chromate	
900 x 450	SHP-9045-Z
1200 x 450	SHP-12045-Z
600 x 600	SHP-6060-Z

1200 high	SHU-120-C
1500 high	SHU-150-C
1700 high	SHU-170-C
2200 high	SHU-220-C

FOR CONDUCTIVE FEET AND CASTOR OPTIONS SEE PAGE 101

Copper foil earthing sleeve. (2 supplied per shelf)

Description	Order Code
Trolley Handles - Chromium Plated	
450 wide	SHH-45-C
600 wide	SHH-60-C

Description	Order Code
Earth Bonding - suffix to order code	
2-10mm press studs with fixings	-10PS
Conductive adjustable feet	CAF-01

10mm press studs for earth bonding.

Conductive foot for use with static dissipative floors. (2 per bay)

Shelf Trolley

General purpose shelf trolleys with two or three shelves, adjustable on 25mm centres. Handles are chromium plated, with shelves zinc plated.

Alternative shelf types are available; see above.

Overall Dimension: 1050H x 900W x 457/610mm deep.

Trolley depth (mm)	Order Code
2-Tier	
450	ST2-0905
600	ST2-0906
3-Tier	
450	ST3-0905
600	ST3-0906

- A flexible and strong storage system using chromium plated wire shelves and posts. Assembly requires only a nylon mallet and a spanner to tighten castors. Suitable for use in cleanrooms to Class 100.
- Conductive plastic corner sleeves and plated feet or conductive castors ensure continuity to ground.

Tubular Posts

25mm diameter with adjustment grooves at 25mm centres. Posts are supplied as standard with no foot insert. Conductive feet and castors are shown below.

Description	Order Code
Post Height (mm)	
760	CLS-POS-0760
1625	CLS-POS-1625
1880	CLS-POS-1880
2130	CLS-POS-2130

Shelves

6mm wire frame and braces with 4mm cross wires at 40mm centres. All shelves are supplied with two standard and two conductive locking sleeves.

Description	Order Code
Shelf Size L x W (mm)	
915 x 305	CLS-SHE-0903
1220 x 305	CLS-SHE-1203

Feet And Castors

Plated Feet - fit 2 per bay

Conductive foot for use with static dissipative floors.

Description	Order Code
Plated Feet	CAF-01

Set of 4 Castors - 2 standard braked and 2 conductive 100mm diameter

Conductive rubber tyred castors (normally fitted 2 per trolley).

Description	Order Code
4 Castors	CLS-AS-100

Grey rubber braked castors (normally fitted 2 per trolley).

SHORTSPAN SHELVING PACKS

A zinc plated shelving system, supplied in complete bay packs, consisting of pre-assembled leg-frames with shelf support beams and one-piece shelf panels. Ideal for storing WEZ containers (see page 66).

Leg frames: 2000mm high in 4 depths 320/400/500/600mm
Shelf Assemblies: 6 per pack, 900mm and 1200mm wide
Adjustment Centres: 33mm pitch
Maximum bay load: 1500kg

900mm Wide Bays

Initial Bay with 2 Leg-Frames and 6 Shelves

Wrist strap bonding points can be supplied to fit to the front of the racks – see page 52

- Standard shelving components, assembled with simple tools, to form a strong and adaptable storage system.
- The high quality zinc-plated finish provides fully conductive bays that are simple to ground, making the system ideal for use in ESD Protected Areas.
- Bare shelves are suitable for the storage of conductive containers.
- For sensitive assemblies stored directly on the shelves, dissipative mats can be fitted to control discharge rate and provide physical protection.

Standard Bay Packs

A selection of complete packs with popular shelf sizes, ideal for the storage of standard 600 x 400mm and 400 x 300mm conductive WEZ containers. See pages 84 for WEZ containers.

- The regular checking of personal grounding is a requirement of all ESD protection standards.
- All the instruments shown provide reliable periodic or continuous testing facilities to meet the requirements of BS EN 61340-5-1:2007

Combo Tester

Designed to test wrist straps and footwear at the entrance to an EPA.

Switchable between wrist strap and footwear modes, with Fail Low/Pass/Fail High indication. Battery or mains powered (with adaptor). Incorporates keyhole slots for wall or stand mounting. Supplied with a 10mm stud converter.

AC mains adaptor and power cord to be ordered separately.

Description

Description	Order Code
Combo Tester	CW-99000
Combo Tester with Stand and Footplate	CW-99004
Footplate for Combo Tester	CW-99013
AC Mains Adaptor	CW-99065
UK Power Cord	CW-93010

TECHNICAL INFORMATION:4

Pass Range: 0.75M Ω - 35M Ω
(Limits adjustable to provide custom range).
Battery: 9V PP3
Mains adaptor: 220V AC

Calibration Box

Used to carry out a functional check on the Combo Tester (CW-90000 and CW-99004) when used at factory-set limits.

This unit is a passive device, requiring no batteries.

Order Code

CW-99090

TECHNICAL INFORMATION:

Low Fail: 0.675M Ω
Low Pass: 0.825M Ω
High Pass: 35M Ω
High Fail: 40M Ω

Continuous Wrist Strap and Workstation Monitors

These instruments provide continuous monitoring of a wrist straps and bench mats during use, reducing ESD damage risk to very low levels. The units are designed for single-wire wrist straps and operate using wave distortion technology, giving instantaneous alarm of wrist strap ground failure. In addition, the units incorporate a resistive monitoring circuit for the bench mat ground.

Jewel® Workstation Continuous Mini-Monitor

A compact unit, mounted on the bench surface using two 10mm studs. 4mm and 10mm parking studs are fitted to ensure a non-alarm state when the operator leaves the workstation. Fitted with audible and visual failure indicators. Requires mains adaptor and power cord, listed separately.

Order Code

CW-99130

TECHNICAL INFORMATION:4

Uses Wave Distortion Technology to monitor the capacitive impedance of a correctly bonded person/wrist strap combination. For correct operation of the bench mat function, always use with materials incorporating a conductive layer.

Dual Operator Workstation Continuous Monitor

A dual operator unit for single wire wrist straps, for mounting below a shelf or worksurface, with two satellite socket blocks for fitting up to 2.1m from the monitor. The satellites incorporate a 4mm monitored socket, a 4mm parking stud and a 4mm unmonitored guest socket. Also provides ground monitoring for two worksurfaces. Fitted with audible and visual failure indicators. Supplied with mains adaptor and two wrist strap kits; power cord to be ordered separately.

CW-50517
CW-93010

Monitor Calibration Unit

This unit is required to carry out functional tests on the Continuous Monitors CW-99130 and CW-50517 This unit is a passive device, requiring no batteries.

TECHNICAL INFORMATION:

Operator: Switchable Low fail/Pass/Hi fail.
Work Surface: Switchable 10M Ω /100M Ω /500M Ω
Note:
10M Ω is the factory default limit for the CW-50517.
500M Ω is the factory default limit for CW-99130

Order Code

CW-50512

- This equipment is designed to test and record the results of routine wrist strap and footwear checks.
- Normally sited at the entrance to an EPA, it provides a checking procedure which does not rely on operator log sheets, improving control and simplifying system audits.
- Provides various input methods to suit the client's needs.
- All tests are recorded and downloaded for future analysis.

Sentry

ID Input Options:

- Numeric keypad with lock-out option.
- Infrared bar-code reader.
- Magnetic card reader (subject to compatibility tests).

Output Options:

- To a local PC – non-network option.
- Data out via local intranet using TCP/IP protocols (network option).
- Relay operated access control.

Test Functions

- Wrist Strap Pass/Fail.
- Left Foot Pass/Fail.
- Right Foot Pass/Fail.
- Test limits configurable.
- Individual tests selectable in staff list.

Data Download and Staff List Management

- To local PC.
- Standard network point using TCP/IP intranet.
- Multiple Sentry Installation.
- Standard network points using TCP/IP intranet.

Independent tests of wrist strap and footwear, triggered by ID input.

Incorporates battery backup for data integrity.

Site installation and remote support is available on this equipment. Please ask for a quotation.	

TECHNICAL INFORMATION:

Footwear Limits:	500 kΩ to 250 MΩ (Low and High Fail configurable)
Wrist Strap Limits:	1 MΩ to 35 MΩ (Low and High Fail configurable)
Accuracy:	Worst case - ± 10% between 0.5 MΩ and 100 MΩ
Storage Capacity:	Up to 3600 tests using 3 character ID
Staff List Capacity:	1000+ IDs
Test Download:	Configurable frequency.
Access Relay Capacity:	50V DC 500mA

Surface Resistance Test Kit

This kit provides the facility to carry out resistance tests on work surfaces, floors, seating and other ESD protective items.

Tests at 10V and 100V, with self-ranging. Measures ambient temperature and humidity at the time of test.

The kit is complete with two 2.27kg, 65mm diameter test electrodes and complies with the requirements of BS EN 61340-5-1:2007.

Description	Order Code
Test Kit Complete with case	CW-99105
Test Meter only	CW-99106
Surface resistivity attachment	CW-99107
Spare Electrode leads	CW-99108
Test Probes only per pair	CW-99109

TECHNICAL INFORMATION:

Test Ranges
 10 volt test 103 – 1012 Ω
 100 volt test 106 – 1012 Ω
 Battery: 2 AA alkaline cells.
 Battery life: approx. 1500 measurements

Multi-Range Megohmmeter

This instrument provides the facility to carry out resistance checks on work surfaces, floors, seating and other ESD protective items. The instrument is supplied in a carrying case, with test leads and a certificate of calibration (valid for 12 months from the date of first use).

Testing of ESD protective items is normally carried out at 10V for resistances below 1M Ω and at 100V above 1M Ω .

For work surface and floor tests, weighted test probes are required, as illustrated below.

Description	Order Code
Megohmmeter with case	MIT-415

TECHNICAL INFORMATION:

Test Voltages – megohm ranges: 10,25,50,100,250,500 V
 Maximum indication: 10V – 1G Ω ; 100V – 10G G Ω ; 500V - 50G Ω
 Test Voltages – low resistance ranges: 5 V \pm 1V
 Continuity: 0.01 Ω to 99.9 Ω
 Resistance: 0.01K Ω to 1M Ω
 Battery: 5 x AA 1.5V (NiMH rechargeable can be used)
 Battery life: 2200 tests – 5 seconds on/55 seconds off duty cycle
 Dimensions: 220 x 92 x 50mm
 Weight: 775gm with rubber protective boot

Test probes to BS EN 61340-4-1

Test probes consisting of a 2.27 kg insulated body with a conductive rubber contact pad. Use one probe for resistance to ground (Rg) measurement and two probes for point-to-point surface resistance (Rp) measurement.

Description	Order Code
Test Probes per pair	CW-99109

Extension Test Lead

This lead is essential for floor testing in larger areas where the floor grounding point is some distance from the test locations. Useful when checking ESD grounding of benches back to a remote earth point. The high quality double insulated silicon lead eliminates leakage errors. Supplied on a storage drum with handle. Lead termination - 4mm shrouded right-angle plug; drum termination - 4mm shrouded socket.

Length 50m

Description	Order Code
Extension Lead	EXL-50

Digital Field Meter

The EVS-2001 is designed to locate and measure static charge potentials on product, people, equipment and packaging. The instrument uses a non-contacting, chopper stabilized field sensor and a ranging light mechanism to ensure correct measurements of electrostatic fields in all areas. The Fieldmeter is easily zeroed with the turn of a small knob and does not require re-zeroing between measurements. Powered by a 9Volt battery, the EVS-2001 features a conductive, impact-resistant case and a convenient snap-on ground lead to facilitate grounding and increase accuracy.

Description	Order Code
Digital Field Meter	EVS-2001

TECHNICAL INFORMATION:
 Display: 3 ½ digits 10mm LCD
 Range: 0V to ± 20kV at 25mm separation
 Analogue Output: ± 2 volts full scale via miniature jack socket
 Accuracy: ± 5% of displayed value

ESD Survey Kits

Basic Kit

The kit contains instruments and test electrodes required to carry out periodic tests and surveys of ESD Protected Areas.

Contains:-

- EVS-2001 Digital Field Meter (see above)
- MIT-415 Megohmmeter (see page 106)
- HT-40 Temperature/humidity meter.
- CW-99108 test probes (see page 106)
- EXL-12 12m extension test lead (see page 106)
- Foam lined carrying case.

Description	Order Code
Complete Kit	ESK-101

- Ionisers are essential for the neutralisation of charges on insulative (non-groundable) items that are essential in a production process.
- When correctly setup and maintained, Charleswater ionisers meet all the performance requirements of BS EN 61340-5-1:2007

Chargebuster Overhead Ioniser

Available as a 3 speed, 3 fan version, this overhead ioniser provides uniform neutralisation performance.

The unit is self-balancing and has an auto-test sequence at power-on.

Description	Dimensions (mm)	Order Code
Chargebuster Ioniser	940 x 165 x 89mm	CW-50681
UK Power cord		CW-93010
Replacement emitter points (pack of 8)		CW-50668
Emitter Tip Point Cleaner (pack of 20)		CW-50658

TECHNICAL INFORMATION:

Operation Mode: 5.5KV steady state DC
 Emitters: Machined tungsten
 Auto-balance with user adjustment of fine trimmer.
 Balance tolerance: ± 20 volts setup at 610mm above charged plate monitor.
 Power supply: 220V AC Internal fuse 20 x 5mm 3A time lag.

Emitter Cassette Removal

Critical Environment Ioniser

Fully featured multi-fan overhead ioniser with closed loop electronic balance control and the facility for remote monitoring via a RJ45 data-port. Incorporates removable emitter cassettes for ease of maintenance and minimum downtime, with a lock-out key to prevent unauthorised adjustments. Two units can be daisy chained to the mains supply to simplify installation. Each fan has a sealed plenum chamber to minimise contamination; suitable for clean room applications. Balance and fan speed settings are retained on power loss. Includes automatic front panel cleaning indicator.

Mini Ioniser

Ultra compact bench ioniser with two fan speeds, utilising steady state DC technology with Sense Feedback Control and visual/audible alarms. 24V power.

Size: 133h x 89w x 43d mm

Description	Dimensions (mm)	Order Code
2 fan model	610 x 150 x 50	CW-92260
4 fan model	1220 x 150 x 50	CW-92261
Replacement emitter cassette (pair)		CW-92262
Replacement filter screen		CW-92327
Replacement emitter pins (pack of 20)		CW-92234
UK Power cord		CW-93010

TECHNICAL INFORMATION:

Operation Mode: 5000V steady state DC
 Emitters: Machined tungsten
 Balance tolerance: ± 10 volts setup at 610mm above charged plate monitor
 Power supply: 220V AC Internal fuse 20 x 5mm 3A time lag.

Bench Ioniser

Compact bench ioniser with three fan speeds, utilising steady state DC technology with Sense Feedback Control and visual/audible alarms. An optional Balance Alarm Programmer allows non-default alarm sensitivities to be set. Size: 240h x 150 w x 80d mm

Description	Order Code
Mini Ioniser	CW-50640
UK Power Adaptor	CW-50676
UK Power cord	CW-93010
Replacement emitter points (pack of 8)	CW-50668
Emitter Tip Point Cleaner (pack of 20)	CW-50658

TECHNICAL INFORMATION:

Emitters: Machined tungsten
 Balance tolerance: ± 20 volts
 Discharge time: <3 sec 1000 to 100V at 300mm

Description	Order Code
Bench Ioniser	CW-92290
UK Power cord	CW-93010
Balance Alarm Programmer	CW-50667
Replacement emitter points (pack of 8)	CW-50668
Emitter Tip Point Cleaner (pack of 20)	CW-50658

TECHNICAL INFORMATION:

Emitters: Machined tungsten
 Balance tolerance: ± 5 volts
 Discharge time: <1.5 sec 1000 to 100V at 300mm
