

## SENSOLUTE MASTER DISTRIBUTOR

Comus International is a global manufacturer of a wide range of products including tilt switches, proximity sensors, solid state relays, reed relays, reed and float switches, and a comprehensive line of sensor and switching devices. We are proud to announce that we have partnered with Sensolute Smart Sensor Solutions as their Master Distributor. For over thirty years we remain committed to supply the highest quality products and superior customer service.

## MICRO VIBRATION SENSORS

We are pleased to introduce our latest Sensolute products; the MVS 0608.02. This device is a micro vibration sensor which detects any type of vibration using a micro ball (d=0.8). The ball bridges two contacts reducing the resistance between the two external connection pads from several mega ohms (>30M $\Omega$ ) to below 100 ohms.

MVS 0608.02

Our sales and engineering teams are available to work closely with you on your existing product line as well as helping with your development of new applications.
