

Electrical Engineering, Installation, Maintenance & Testing Services

(Industrial, Commercial & Public Sector)

Every organisation needs to focus on its core business and ensure that external partners share the same values of quality, reliability and value for money. That's why we have established ourselves as the chosen electrical contracting partner for so many organisations over the last four decades.

In order to comply with the increasingly rigorous government driven Health & Safety regulations and insurance stipulations, managing the condition and integrity of your fixed installation and electrical appliances is an essential part of your operational best practice.

We offer a wide range of services including:

- *Electrical Installation: Design, Construction & Maintenance*
- *Breakdown Services*
- *Installation Refurbishment & New Works*
- *Small Works*
- *Control Panel Design & Manufacture*
- *Emergency Lighting Installation & Testing*
- *Periodic Inspection Reporting & Fixed Installation Testing*
- *Portable Appliance Testing Services*

Severn Electric is a privately owned electrical contracting business based in Stourport on Severn in Worcestershire. Our reputation has been built on first class service and quality, reinforced by

membership of the NICEIC (National Inspection Council for Electrical Installation Contracting).

Refurbishments & New Works

We are pleased to offer quotations for works to engineers or architects specifications, or alternatively we can interpret your requirements to provide a full written quotation.

All our quotations are based on the use of the highest quality materials and qualified labour.

Breakdown Services

Regular inspections of your installation are a cost-effective, practical and preventative approach to modern electrical maintenance; however breakdowns can still occur.

Here at Severn Electric we can offer your business a personally tailored breakdown service, from next day site attendance to emergency-within the hour 'fast' response.

Design, Installation & Maintenance

Having a wealth of experience in industrial, commercial & public sector electrical installation means that from the design stage, right up to the testing & commissioning of your new electrical equipment, you can always be assured that the service you are getting from Severn Electric is second to none!

Our work can range from complex control panel design and construction, additions to existing installations as well as complete refurbishments.

“Severn has always been reliable, professional and dependable on all aspects of electrical design, commissioning, installation and service. Absolutely first class.”¹

Periodic Inspection Reporting (Electrical Installation Tests)

Severn Electric provides a comprehensive testing & inspection service fully tailored to the customer's exact requirements & needs.

Our experienced & qualified staff, work to the highest standard and all of our work is carried out in full compliance with the 'IEE Wiring Regulations' 17th Edition (BS7671-2008).

Licensing authorities, public bodies, insurance companies, mortgagors and others may require periodic inspection and testing of electrical installations.

Reasons to have a periodic inspection report undertaken include;

- Find any potential electrical shock risks and fire hazards in the installation
- Identify any defective parts of the electrical system
- Highlight any lack of earthing or bonding
- Reveal breakages wear & deterioration
- Reveal if any electrical circuits or equipment is overloaded
- Identify adequate labelling and circuit designation

Including compliance with:

- Health and Safety at Work Act 1974
- The Management of Health and Safety at Work Regulations 1992
- The Electricity at Work Regulations 1989
- IEE Wiring Regulation BS 7671 : 2008

We also offer a comprehensive "as fitted" drawing service

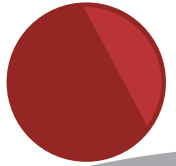

For a professional & competitive quote, matching your exact requirements, for any of these services, please contact Severn Electric on **01299 877700**.

Severn Electric was established in 1964.

We work on both high volume and bespoke projects including design, manufacture and installation as well as maintenance, inspection and testing, including Portable Appliance Testing.

To many customers we have become a single supplier, working in partnership to support all their electrical needs, whether industrial, commercial, retail or public sector.

With a reputation for competitive prices matched with reliability, efficiency and an approachable personal service, Severn Electric offers the same commitment to customers whether working on a single contract or multi-site project.

What our customers say about us

"We have been using Severn Electric to design, manufacture and install our control panel and systems for over 10 years. We use Severn because they are always helpful, contribute to our design ideas and the service in terms of both manufacture and installation is first class. We would have no hesitation in recommending Severn Electric to any of our clients"

Nick Carter, Simdean Envirotec Ltd,
Manufacturers of Air Pollution & Odour Control Equipment

"We have always found Severn Electric to be extremely reliable. They are always very flexible when required to work outside of hours and always finish the job within the required times. Great communicational skills also keep us informed of progress every step of the way. A great company-, which is why we have stayed with them and built such a good working relationship"

Dave Rowley, Process Engineer, Vision Labs

"Severn Electric have been working with Ceramaspeed over 15 years and have always been professional, reliable, dependable and worked on many projects with us over the years including recently electrical design, installation, and commissioning of a new operations facility in Poland"

Simon Barron – Engineering Manager
Ceramaspeed

Constructionline is the UK's register of pre-qualified local and national construction and construction-related suppliers

National Inspection Council for
Electrical Installation Contracting

NICEIC is the electrical contracting industry's independent voluntary body for electrical installation matters throughout the UK. They offer industry-leading certification services, Building Regulations Schemes, products and support to us and many other trades within the construction industry.
