

Portable Appliance Testing Service (PAT)

The Health & Safety Executive states that a quarter of all reported electrical accidents involve portable appliances.

The Electricity at Work Regulations place a legal responsibility on employers, employees & self-employed persons to comply with the provisions of the regulations and take reasonably practicable steps to ensure that no danger results from the use of such equipment.

This in effect requires the implementation of a systematic and regular programme of maintenance, inspection & testing.

Inspection & Testing

The IEE Code of Practice, which forms the basis for portable appliance testing in the UK, states; those carrying out the inspection & testing must be competent to undertake the inspection & where appropriate testing of electrical equipment/ appliances having due regard of their own safety and that of others.

The tester must also have an understanding of the modes of electrical, mechanical or thermal damage to electrical equipment, appliances & their flexes which may be encountered in any environment.

All of our 'appliance testing' staff hold the minimum required qualification (City & Guilds Level 3 Certificate in Inspection & Testing of Electrical Equipment) making us the ideal solution when considering implementing a routine programme of test & inspection.

As a company we provide a detailed reporting system, tailored to any specific requirement.

All our specialist equipment is calibrated annually & certification can be provided on request.

Our service always includes:

- Replacement of plug tops & fuses where required
- Failed items reported & clearly identified
- Repairs & replacement of flexes carried out onsite or at our own workshop
- Tested appliances labelled with unique no. / next test date / testers initials

Offering a competitive & clear pricing structure, Severn Electric always ensure your electrical appliances and equipment are safe and legally compliant.

To find out how we can help you meet your specific testing requirements – comprehensively, competitively and efficiently, call us now on **01299 877700**.

“Severn Electric have always delivered a competitive service for our PAT needs; keen prices, experienced engineers, great service” 1.

Severn Electric
Providers of quality
electrical services

Severn Electric was established in 1964.

Severn Electric supplies the commercial, industrial, retail & public sector with a comprehensive range of electrical services, covering:

- Design, manufacture & installation
- Maintenance, inspection & testing

Working on both high volume & bespoke projects, we have a reputation for quality, reliability, efficiency & personal services... at competitive prices.

With qualified & experienced teams we are recognised as a supplier that can meet customer's wide-ranging needs, from the design & installation of control panels to Portable Appliance Testing.

We offer the same commitment to service whether working on a single contract or a multi-site project and to many we become a single supplier - a **'one-stop solution'** - working in partnership to meet all their needs.

Based in Stourport-on-Severn in Worcestershire, Severn Electric operates throughout the UK, offering customers all the re-assurance and guarantees expected of a long-established regional business.

What our customers say about us

"Severn Electric provided us with excellent value for money during our six month PAT project. The Severn Electric team were all extremely helpful and nothing was too much trouble. Our customers provided very positive feedback following Severn Electric PAT engineers testing- nothing but praise"

Ministry of Defence

"Competitive on price, fast and efficient in their testing, creating little disturbance in the area's where they worked (most important to us) and they provided electronic results and records that were user-friendly. All in all we've established an excellent relationship"

Electrium, a Siemens Company

"It's a pleasure to pass on credit where credit is due. All testing was carried out quickly and efficiently by your staff who were always polite, courteous and helpful"

Clerk of Works, Bromsgrove School

constructionline

Constructionline is the UK's register of pre-qualified local and national construction and construction-related suppliers

National Inspection Council for Electrical Installation Contracting

APPROVED CONTRACTOR

NICEIC is the electrical contracting industry's independent voluntary body for electrical installation matters throughout the UK. They offer industry-leading certification services, Building Regulations Schemes, products and support to us and many other trades within the construction industry.
