Our experience is truly exceptional...

The National Flooring Company has been associated with industrial and commercial flooring as far back as 1898. Not surprisingly over that time we have accumulated an understanding and knowledge of resin flooring systems that is second to none.

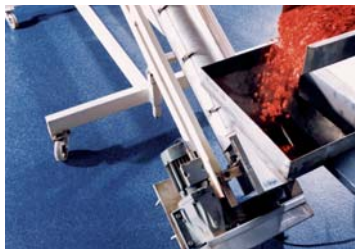

From factories to nightclubs, we have become a leading authority in flooring solutions that work intensely in every kind of environment. Whether it is simple repairs or a major industrial flooring installation, the outstanding quality, expertise, value for money and service we provide never waivers. With each and every project we deliver unrivalled installation expertise coupled with the highest quality materials.

Hand-in-hand with this unbeatable service we have taken on board the most stringent health and safety requirements.

Service with Integrity
Product by Knowledge
Customer Service by Design

National Flooring recognise that our business and day to day operations have an environmental impact. In taking responsibility for this, our company is committed to an ongoing programme of continuous improvement to maximise its sustainability and minimise its carbon footprint where possible.

A Fresh Approach

National Flooring's success is underpinned by Honesty, Integrity and Quality.

NATIONAL FLOORING
Floors For Industry

We like to build and maintain relationships on firm foundations...

Our overriding obligation is to honour our clients requirements by providing an outstanding floor finish at a competitive price ideally matched to the conditions of the surrounding environment. In order to attain this we work in partnership with all our clients to define the finish that is to be achieved. In close collaboration we identify the necessary requirements to specify and install a floor that is fit for purpose.

We never promise what we cannot deliver and take an open, honest and up-front approach in all our dealings.

We do not believe in any unnecessary additional extras to systems, often used to increase the price, therefore we do not install them.

We only install the most appropriate solution and we are more than happy to suggest alternative methods when necessary.

Service with Integrity

We are happy to say our customers return time and time again. With over 60% of our turnover from repeat business, the figures speak for themselves!

A Deeper Understanding

Having worked with all the major resin and cementitious types of flooring systems our knowledge of the technologies is truly unrivalled.

Product development through in-depth research...

With over 40 years experience working with resin flooring, we have developed the deepest possible understanding of all the most popular floor finishes allowing us to clearly define the advantages and disadvantages relating to each product and their suitability to different environments.

The three main resin technologies commonly used, Epoxy, Polyurethane and Methyl Methacrylate (MMA) are often assumed to be similar. However they each have different chemical and physical properties that determine their suitability.

As a result of our experience we have chosen to specialise in the installation of MMA resins...

Why MMA?

We believe that MMA systems satisfy approximately 90% of all industries requirements.

Directing our focus on this one product, supplied by Degafloor Ltd, enhances National Flooring's knowledge and expertise on both the product and installation, which in turn reinforces our position within the industry.

The benefits of Degafloor MMA...

- Fully cured both physically and chemically after 2 hours of installation
- Very fast installation (ideal for refurbishment and new build projects)
- Exceptional bond to concrete, steel, tiles & marine ply
- Unique chemical bond between layers, creating a truly monolithic floor providing outstanding physical strength and durability
- Hygienic, seamless and impermeable
- Exceptional resistance to physical and chemical attack
- Highly resistant to UV light weathering and temperatures up to 80°C
- Cures in temperatures down to -30°C
- Bespoke, tailored decorative and slip resistant finishes

NATIONAL FLOORING
Floors For Industry

Why Degafloor?

Degafloor Ltd are totally dedicated to the development and supply of innovative MMA resin flooring systems using resins manufactured by Degussa AG, the world's largest supplier of MMA products for the flooring industry. Degussa have unrivalled experience in the supply of MMA resins and manufacture 90%+ of performance critical components within wholly owned facilities, ensuring that an unequalled standard of quality is consistently achieved.

Degafloor's current product range is the culmination of decades of industry experience. All new systems are fully tested within Degussa's outstanding research and development facilities to secure full technical approval. This robust process, together with our expertise, creates a supply chain that is second to none.

To ensure seamless project delivery Degafloor carries an extensive inventory within a dedicated logistics hub, enabling us to obtain materials 24/7.

When alternative solutions are required...

There are circumstances where MMA is not advisable and upon inspection, we will recommend the most appropriate system.

Based on detailed customer requirements we specify and install a floor that meets all the functional, decorative, safety and cost criteria necessary to fulfil the most demanding brief ... and guarantee the recommendation.

With the Greatest Respect

Customer satisfaction is our main objective. We work hard and closely with our clients to deliver outstanding solutions and build relationships.

A thoroughly professional approach is the key...

Detailed planning, choosing the right product, and sub-floor preparation are all vital in guaranteeing high quality installations. We use all our experience, dedicated teamwork and close liaison with our clients to deliver tailor-made solutions that meet and very often exceed expectations. After all, the harder we work to understand our customers requirements, the more they will appreciate the professional manner in which we approach every contract.

Consultation

Rigorous site surveys, bond tests, asking the right questions and of course listening to our clients requirements ensures the correct product is installed. The information gathered is vital when specifying and installing the right floor.

Project Management

Every department from administration to installation works together at each stage to manage the process efficiently and to meet the tightest of deadlines.

Installation

We use our own teams of installers with 25 years plus experience in all types of industrial environments. All installations are carefully monitored to deliver outstanding results with minimal disruption.

Every Installation Fully Guaranteed

Every installation we specify is 'fit for purpose'. This policy enables us to offer realistic and binding bespoke warranties calculated in consultation with the client and product partner.

EXTENSIVE POST-INSTALLATION SUPPORT

We offer extensive post-installation support from cleaning and care advice to regular inspection and a rapid response repair service. We believe ours is the most comprehensive aftercare service in the industry and we guarantee to respond swiftly and efficiently to any post installation requirement.

Customer Service by Design

We do things differently...

Our way of doing things means
Customer Satisfaction through...

...Service with Integrity

We will never compromise our position by promising what we cannot deliver and retain an open and honest relationship with our clients throughout each stage of the process.

...Product by Knowledge

With over 40 years experience in the industry working with all types of flooring technologies, we have a deeper understanding of the majority of floor finishes available which enables us to clearly establish the benefits and disadvantages of each product and define the most appropriate solution accordingly.

...Customer Service by Design

We look to build and maintain relationships with all our clients to provide assurance that we will respond efficiently to any flooring requirement. We recognise that our customers have individual requirements so our service is tailored to suit. Although we guarantee an incomparable service from initial contact to installation, we also place a strong emphasis on our aftercare service to ensure that we maintain and strengthen relationships.

We are accredited members of FeRFA, the Resin Flooring Association which represents contractors that operate to the highest standard of quality, integrity and safety.

We are proud of the fact we are asked to share our knowledge on industrial flooring with specialist institutes and authorities.
