American Barn with 3 roller doors 15

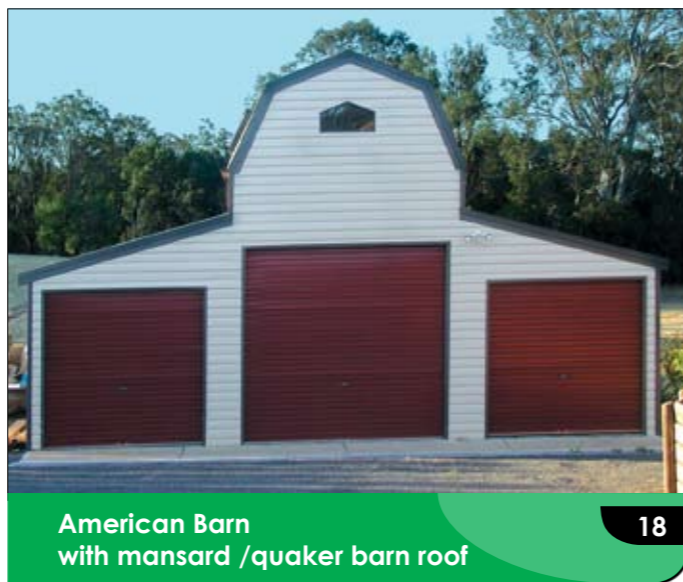

American Barn with one roller door 17

Split American Barn with open lean-to 19

American Barn with Garaport 16

American Barn with mansard /quaker barn roof 18

For an affordable solution to style, look no further than the American Barn. American Barns have many uses including car garages, boat sheds, workshops, housing caravans, horse stables, storage and games rooms to name a few.

Widths start at 9m. Both length and width can expand to suit your purposes. Heights for either the side lean-tos or middle section can also be changed.

The standard roof pitch for the American Barns is 22° but a mansard roof also looks great.

You can easily personalise your barn with windows and glass sliding doors. We can even supply fly screens and security screens or window locks.

Quaker Barn with 2 roller doors 20

Quaker Barn with 2 side lean-to's 21

Quaker Barn with 1 roller door 22

Quaker Barn with partially closed-in lean-to 23

Quaker Barn with closed-in lean-to 24

Quaker Barn with verandah 25

Make a statement with the Quaker Barn. If it's style you're after, the Quaker Barn might be just what you're looking for. It boasts wide, open space and unquestionable style.

Quaker Barns start at a width of 6m and are supplied in either vertical or horizontal cladding.

These unique designs make the most of upper floor space, making them a practical solution for that holiday block, studio apartment or alternative living arrangement. These are also widely used as double garages with massive storage capacity.

31

Farm sheds are available in a vast range of sizes to meet your specific needs.

Whether you're after a large hay shed or somewhere to store expensive farm equipment and/or stock, even horse stables, we can customise a design to suit your requirements.

All of our buildings are designed with the most rugged conditions in mind and with over 300,000 buildings already built worldwide*, you can trust in our products.

Farm Sheds are available with numerous options, allowing you to mix and match open bays and closed bays with sliding doors and roller doors.

If you have a design in mind our highly trained distributors have the ability to make it happen.
