Rapier® StarPin

The **RapierStar®** brand stands for high quality, superior performance fixings.

The result of a decade of continual improvement, the patented **RapierStar®** product range ensures complete professional and consumer confidence.

Rapier® StarPin

The Rapier **StarPin** range of Polypins & Polynails is one of the highest impact products available. The specially designed head helps to reduce breakages and wastage. In turn this provides dramatic savings to the customer in product costs and time.

Quality

The shank of the Polypins and Polynails are formed from A4 314 Marine Grade Stainless Steel, ensuring superior performance and corrosion resistance in the toughest environments.

Specially defined annular rings ensure maximum pull out resistance when compared to other inferior 'ridged' products.

Integrity

With a specially developed higher impact head the Rapier **StarPin** Polypins & Polynails will maintain their reliability on site and under extreme test conditions, without head failure.

Rapier®
StarPin

Range

The UV stable colour range services the majority of profile variations across all leading board suppliers.

With a low profile head, applications also include the Caravan, Fencing, Window and Sign Industries.
