

CavSeal

Cavity closer system

Synseal window products for new build

CavSeal cavity close

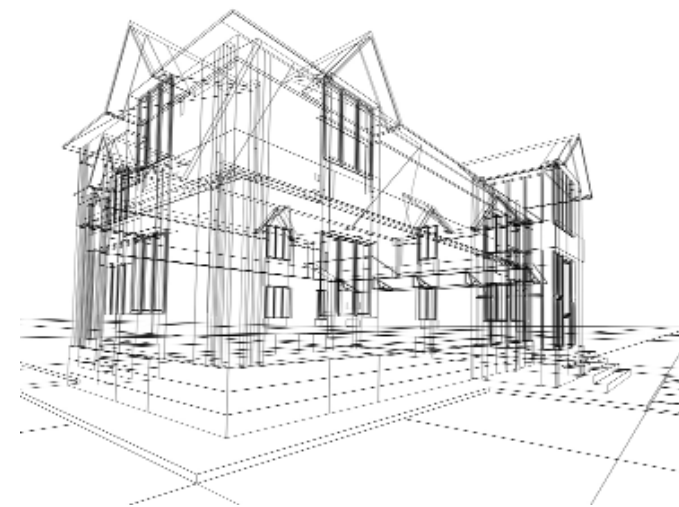

CavSeal - the fast and effective solution for closing cavities in masonry walls

Synseal's CavSeal recycled PVCu cavity closer speeds up the build process and boosts productivity of window installers and bricklayers.

Suitable for large or small developments, CavSeal closes off cavities in masonry walls and features a universal click-fix system to securely fit the complete pre-glazed window after the wall is completed.

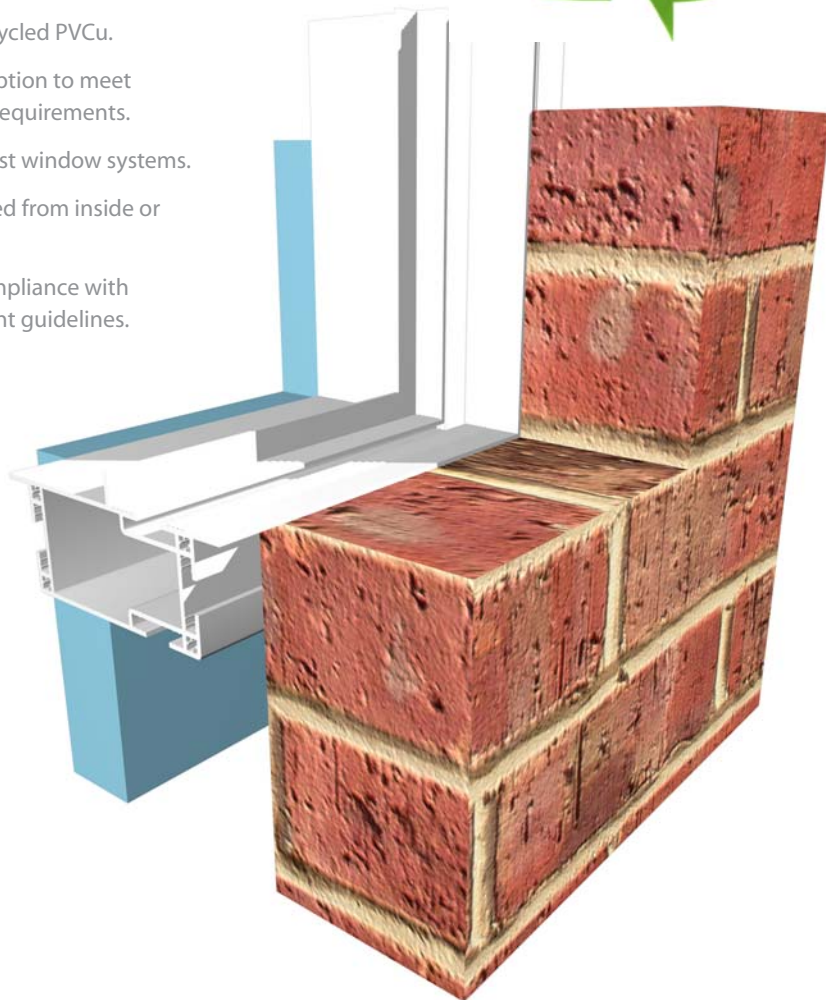

CavSeal's strong box construction clips together with robust corners to form a durable cavity closer unit. Once fitted the window is simply slotted into place using the secure click-fix frame snapper.

Made with 100% recycled PVCu, CavSeal greatly reduces your impact on the environment.

r system

- Fast clip together assembly.
- No adhesives required.
- Robust design.
- Fast and accurate installation.
- System is suitable for 50, 75 and 100mm cavities.
- Made with 100% recycled PVCu.
- Integral head vent option to meet building regulation requirements.
- Compatible with most window systems.
- Windows can be fitted from inside or outside the building.
- Helps to achieve compliance with HSE working at height guidelines.

**CavSeal -
quick to make,
easy to fit and
easy on the
environment**

CavSeal is available in 3 widths, is fully recyclable and is easy to handle and install. Fabrication is simple with clip together corners and profile which is just square cut.

take the environmental option

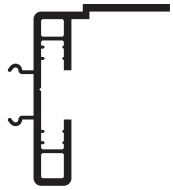

Envirosill is made from post consumer recycled windows with a skin of virgin PVCu applied to the seen faces to ensure aesthetics and performance are not compromised.

Envirosill minimises its impact on energy and resources, supports your environmental management and gives your customers an eco-friendly option to help minimise their carbon footprint.
