

Neatmatch

Neatmatch is a perfect, labour-saving way to cover walls and ceilings giving the appearance of tongue and groove boarding. Made from MR MDF, it has an exceptional pre-sanded surface, primed ready for painting.

GR416 'V Groove and Bead' has become particularly popular because its visual impact is maintained from whatever angle the profile is viewed.

Edge Profiles: A variety of edges are available for various applications. Split-edges are a great feature that enhances the look of the completed job, it means the join between abutting panels is at the bottom of the 'V Groove' on profile G416 rendering it more or less invisible to the eye.
