# Introducing Dexion Longspan Shelving.

Dexion Longspan shelving is fast and easy to assemble and uses a modular design that provides the maximum storage capacity, no matter what space is available.

The **Longspan** shelving system allows for the easy adjustment of storage heights and configurations as your requirements change.

The **Longspan** system incorporates a wide range of frame and beam sizes making it simple to customise an installation that meets your exact needs. Medium and long span bays can be combined in the same rack for the efficient storage of a wide range of different items. A bolt free lock-in system ensures that once the support beams have been located, they remain in position improving safety for operatives accessing the installation.

## Steel panels
