bespoke machinery

Marden Edwards has the skills and knowledge necessary to design and manufacture custom packaging systems to precisely match your application.

Marden Edwards Limited

o v e r w r a p p i n g   t e c h n o l o g y

Marden Edwards is a company with over 50 years experience in the design and manufacture of overwrapping and stretch wrapping systems. The position as international market leader is the result of an exceptionally comprehensive product range, an ability to tailor machinery to individual applications and a world-wide network of trade partners providing local expertise and after-sales service.

over 9,000 Marden Edwards overwrapping systems have been produced and shipped to more than 150 countries. It is a good measure of reliability, and lasting quality, that many of the early machines produced are still used in production.

overwrapping and stretchbanding offer environmentally friendly ways of reducing packaging costs whilst simultaneously enhancing product appeal. Whether your product is wrapped for presentation, multipacking or distribution purposes, Marden Edwards can provide a system tailored to your needs.

EDWARDS

EVO fold

- speed up to 45 packs per minute
- relay logic control
- mechanical gripper film pull system
- simple operation and maintenance
- large pack size capability
- external side loading film reel

B series

- speed up to 60 packs per minute
- relay logic control
- mechanical gripper film pull system
- simple operation and maintenance
- large pack size capability
- external side loading film reel
- quick release size change over via change parts

BX series

- speed up to 60 packs per minute
- Beckhoff plc & ESA mono hmi
- mechanical gripper film pull system
- simple operation and maintenance
- large pack size capability
- external side loading film reel, expanding mandrel type
- splice deck
- quick release size change over via change parts

LX series

- speed up to 90 packs per minute
- Beckhoff plc & colour hmi
- mechanical gripper film pull system
- simple operation and maintenance
- large pack size capability
- external side loading film reel, expanding mandrel type
- splice deck
- quick release size change over via change parts

TM series

- speed up to 60 packs per minute
- servo driven film feed
- servo driven transfer pusher
- Beckhoff control system
- external side loading film reel
- simple and fast pack size change over

W series

- speed up to 120 packs per minute
- wide range of pack sizes
- large range of pack types and collation formats
- mechanical & servo collation systems
- longitudinal seal on trailing edge or base of pack
- simple maintenance and low running costs
- rapid, de-skilled product size change
- plc control and diagnostic display

WR series

- speed up to 250 packs per minute
- turret style wrapping system
- wide range of pack sizes
- mechanical and servo collation systems
- longitudinal seal on trailing edge of pack
- rapid, de-skilled product size change
- simple maintenance and low running costs
- plc control and diagnostic display

KAP series

- speed up to 60 packs per minute
- uncoated paper collator and wrapper for transit and retail multipacks
- wide range of pack sizes
- large range of pack types and collation formats
- mechanical and servo collation systems
- longitudinal seal on base of pack
- rapid, de-skilled size change
- simple maintenance and low running costs
- plc control and touchscreen display

PSB series

- speed up to 20 packs per minute
- two reel polyethylene stretch-wrapper or bander
- suitable for transit and retail multipacks
- wide range of pack sizes
- large range of pack types and collation formats
- pneumatic collation system
- rapid, de-skilled product size change
- simple maintenance and low running costs
- plc control and touchscreen display
