

# bucket conveyors & bucket elevators

DATASHEET 22

## Features & Benefits

### Features:

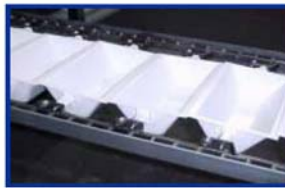

- Buckets in plastic or steel
- Chains in plastic, steel or combination
- Buckets overlaid in the horizontal
- Comprehensive range of sizes available
- Range of chains to suit application
- Hygienic construction of chain and bucket

### Benefits:

- Suitable for wide range of temperatures and conditions
- From low to high throughputs
- Spin free bucket filling
- Bucket and chain size to suit throughput requirements
- Easy to clean and maintain

## Model : Bucket & Chain Features

Gough buckets are designed to handle the tough AND sanitary applications. With several bucket sizes available, product throughputs can be handled gently without spillage. A variety of bucket materials allows for the right bucket for the right application.

### Technical Description:

Bucket sizes available from 9" to 48" wide. Capacities range from 0 to 2500 ft<sup>3</sup>/hr.

Buckets utilize heavy-duty trunnion design and pivot pins extending component life.

Buckets are available in stainless steel, carbon steel and plastic. Custom designs and materials are also available.

Bucket components are replaceable to reduce maintenance costs.
