IE1268 SERIES LATCH

- All Stainless Steel construction
- Various inserts available to match key configuration
- Chamfered face provides resistance to vandak attack
- Rated to IP65

The 1268 security latch series offer basic product platform which allows a wide variety of insert head styles found in common use in security enclosures

Manufactured in Stainless Steel this detent lock is targeted to provide a vandal resistance lock to IP65. These locks can be offered not only in a variety of insert head styles (which include special customised requirements and for multi level key access)

Notes :   Do Not Scale.   Unless Otherwise noted   all dimensions are for reference purposes only
