

TECHNOLOGY REINVENTED

PRECISION

Precision Processing
Services Limited

Precision Processing Services Limited (PPSL)

are a unique customer focused organisation specialising in the thermo-chemical removal of contaminants and other unwanted material from process equipment used across industry.

Technology

Over the past ten years PPSL have increased our customer base by developing new technology, and enhancing our processes in order to provide our customer's with the tailor-made service they require.

Customer Portfolio

Based in Maydown in Northern Ireland, PPSL's customer portfolio began in Europe and now extends worldwide.

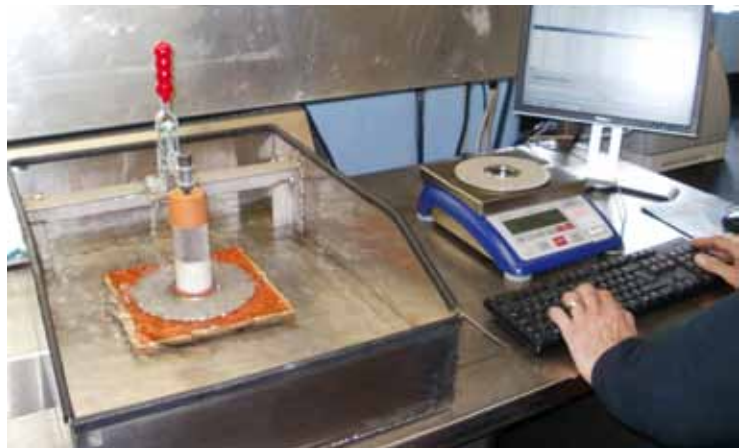

Map shows PPSLs European Sale Activity

Tailor Made

PPSL offer tailor made cleaning and testing processes depending on the specific customer requirements and work to provide a solution to our customers problems.

Based on our combined expertise within industry PPSL provide regular feedback to our customers and will identify potential opportunities to improve their own processes.

Logistics

PPSL add value for our clients by providing transport logistics, technical and environmental support.

PPSL have a wide range of capabilities and have a strong focus on our customers needs and requirements

Partnership

PPSL work in partnership with our customers as they develop new processes. We will undertake trial cleaning and testing on new process equipment prior to and during commissioning in order to formulate the optimum cleaning and testing processes. By adopting this systematic approach we are able to gain a fuller understanding of our customers needs.
