

INSTANTA

INSTANTA IS THE LEADING UK MANUFACTURER OF WATER BOILERS FOR THE CATERING TRADE, MANUFACTURING A RANGE OF BEVERAGE MAKING CATERING EQUIPMENT.

CHALLENGE:

Instanta's existing plastic injection moulding supplier had reached full capacity and it urgently needed a new supplier to take over production of 20 of its mouldings. To minimise impact on production, Instanta required a fast turnaround.

SOLUTION:

Wheatley Plastics was selected and appointed as the new supplier to take over 20 tools. Instanta required some of the more urgent mouldings within a very short time frame of around 4 weeks to ensure that production was not impacted. Wheatley Plastics was quickly able to produce the initial samples, undergoing trialling to ensure that Instanta could approve them and sign off production. Within just a few weeks, Wheatley Plastics was producing mouldings from all 20 tools to the necessary quality and standards. Consequently, Instanta has now moved several other mouldings to Wheatley Plastics from other suppliers.

OUTCOME:

Instanta was able to continue production without disruption. Wheatley Plastics now holds stock for Instanta with a flexible approach to call off and a monthly delivery service.

"The service from Wheatley Plastics has been excellent. It has been very flexible and efficient to deal with."

Gavin Ford, Instanta
