Making your Fuel go Further

fueltek FMO
Multi-User Browser Based Software

Fueltek FM Online (Fuel Manager On-line) provides comprehensive fuel management capabilities for all sizes of fleet operation, using an Internet or Intranet platform.

Fueltek FMO Fueltek FMO is used in conjunction with any Fueltek Access Control Terminal (FACT). **Fueltek FMO** is a true 'web based application', this simply means that the software can potentially be accessed from a PC anywhere in the world - the only requirement to use the system is an Internet or Intranet connection, a Login ID and User Password.

Fueltek FMO is a scalable solution, ideal for larger fleets, multi-site and multi-user applications that require comprehensive fuel management capabilities at a number of locations. The system allows an adminstrator to create password controlled access limits for users to specific screens and functions. The system can accomodate any number of users. Any number of remote PC's (clients) can access the web application via their local browser. No software installation is required for client PC's.

MAIN FUELTEK FMO TASKS :-

- Programming Vehicle Datatags / Fueller Datatags/ Driver Details
- Maintaining tables (Driver\Fueller\ Lockout)
- Running Reports
- Stock Control

ADVANTAGES OF FUELTEK FMO
