Large Character Marking and Coding Solutions

Videojet® 2300 Series Ink Jet Printers

High-resolution printing with a simple user interface, making message selection quick and error-free.

- 180 dpi resolution for high quality marks from alphanumerics to bar codes and graphics on cases and shipping containers for complete generic case coding
- Consistent print quality using patented printhead micropurge feature
- Reduced cost of ownership from unique ink-recycling feature

PatrimonPlus® Ink Jet Printing System

Single system that can operate both Valve Jet and HR Series printheads at the same time to deliver high-resolution and dot matrix characters from one system.

- Print heights from 0.25" to 2.0" (6 to 50 mm) at print speeds up to 200 fpm (61 mpm)
- System drives up to sixteen printheads, with each printhead capable of printing up to three lines of text
- Dual task option codes product on two independent production lines

Marsh® 8000 Ink Jet Printer

Combines high resolution printing with an advanced Windows®-based user interface, allowing users to print with up to eight auto-purge printheads.

- True generic case coding at 150 dpi with speeds up to 200 fpm (61 mpm)
- Control up to two independent production lines
- Auto-purge offers ink and/or solvent purge and automatic printhead cleaning before and after production

Videojet® 2120 Ink Jet Printer

Applies large character single or twin-line messages onto a variety of products or packages with multiple printhead and ink options.

- 700 series printheads for coding on porous surfaces such as corrugate cases and trays, paper bags and sacks, timber, paper, etc.
- 800 series printheads for coding on nonporous surfaces such as plastic bags, shrink wrap, coated cardboard, foils, etc.

Videojet® Unicorn II Ink Jet Printer

All-in-one low cost solution providing high ink mileage and low maintenance requirements with a hard-working design that provides outstanding performance.

- Standard print heights up to 2.0" (50 mm) at speeds up to 200 fpm (61 mpm)
- High quality, reliable and economical printing of one or two lines of text using a variety of selectable languages and printable characters
- Easy-to-use icon keys allow editing of messages with a few simple keystrokes

Unicorn Ink Jet Printer

Compact, single-line, dot matrix printing system that can be programmed quickly and easily.

- Standard print heights up to 3/4" (20 mm) at speeds up to 200 fpm (61 mpm)
- Automatic date change, clock functions, consecutive counts and 52-message memory
- Product names, identification numbers, automatic production counts and accurate time code capabilities available at the touch of a button

Videojet® P3400 Label Printer Applicator

Flexible, modular automatic label printing and application with a selection of applications modules for a customizable, off-the-shelf solution.

- High-quality on-demand thermal transfer printing for high-resolution bar codes and text
- Available with a variety of selectable modules to meet a variety of applications
- LCD interface for ease of set-up with multi-configuration storage

210 Label Applicator

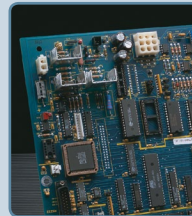

Modern, microprocessor controlled, industrial label applicator with simple operation and low maintenance.

- Fast, accurate label application at speeds up to 98 fpm (30 mpm)
- Standard shaft encoder input for speed compensation
- Optional application methods include tamp and blow modules
- Available storage of multiple production settings

Fluids

The Videojet supplies family provides a full range of high resolution and valve jet inks specially formulated for optimal performance in Videojet and Marsh printer systems. Over (60) inks are available, and bulk size packaging is available for high volume users.

Parts

Genuine Videojet parts are original, from the factory – no second-hand, used or unauthorized refurbished parts that can impair the performance of equipment – helping Videojet printers to run at optimum performance.

Count on Uptime. Count on Videojet.

Videojet delivers uptime assurance through a full range of best-in-class marking and coding technologies – backed by the industry's largest, most responsive service network.

Greater productivity. Less maintenance. Lower cost of ownership. Find out how Videojet ink jet printers can help you raise uptime to a whole new level. To learn more, visit www.videojet.com
