

We currently have a number of vacancies at our new facility in Isleworth West London.

All positions offer:

- A competitive salary,
- 5 weeks paid holiday,
- A contributory pension scheme (after qualifying period)
- Opportunities for weekday and Saturday overtime are currently available.
- Candidates must be eligible to live and work in the UK.

Additional training would be provided for the right candidate as necessary. You should also be familiar with the requirements of working within an ISO 9001 /AS9100 environment.

To apply for any of these positions, please send a CV to sales@newmonteng.co.uk

Quality Inspector/CMM Specialist

A Quality Inspector is required, proficient in operating/programming CNC CMM equipment to aerospace standards and knowledge of FAIRs (First Article Inspection Reports).

Scope of Work: Inspection of production work to very fine tolerances, from initial receipt through various stages of manufacture to final inspection. Production of inspection reports (FAIRS) and documentation according to industry standards, AS9100 Rev C and ISO 9001:2008.

Skills required:

- Minimum 2 years experience as a Quality Engineer/Inspector in CNC machining and precision manufacturing environment.
- Ability to read engineering drawings and detailed specifications
- Knowledge and experience of compiling inspection reports (FAIRs)
- Familiarity with auditing processes and procedures
- Proficiency in using Co-ordinate Measuring Machines (CMM)
- Proficiency in basic Excel and Word
- Thorough understanding of geometric dimensioning , working to very fine tolerances
- Experience of manufacturing gears and/or calibration an advantage

Grinder

There is an exciting opportunity for an experienced Grinder to join a leading Manufacturer of precision components. We need someone with experience in the aerospace and instrumentation industries.

The ideal candidate will be able to set and run manual and CNC Internal and external cylindrical grinding machines. Experience of Surface Grinding or Thread / Worm grinding would be an advantage.

The following experience is required:-

- Setup and operate internal and external manual and CNC grinding machines
- Experience of Jones & Shipman, Myford or similar machines
- Experience of working within an ISO9001 environment.
- Operation of CNC & thread grinding machines an advantage

Candidates should only apply if they have at least 3 years experience in a similar role within the aerospace or instrumentation industries.

CNC Programmer, Setter, Operator

An exciting opportunity has arisen for an experienced CNC engineer. We manufacture precision machined parts for the Aerospace and Instrumentation industries and are looking to recruit a Programmer, Setter, Operator for the CNC Lathes & Mills. The successful candidate will need to be innovative and driven, implementing new methods and procedures to reduce cost and improve quality.

Experience of CNC programming and setting as well as CAM is essential with practical knowledge of a wide range of Lathes and Mills. Experience of the following would be an advantage:

Fadal / Hurco vertical mills
Horizontal machining centre (Fanuc 11m Control)
Citizen Sliding head Lathes
Okuma Lathes (7000 OSP control)
Fanuc Control systems
Alphacam
