

Productivity Option: The Autobag® Cylindrical Accumulating Funnel – Accumulating function and cylindrical design for tighter packages

Productivity Options are often a cost-effective way to optimise overall packaging system performance. Automated Packaging Systems offers a variety of basic Productivity Options that are designed to increase packaging speeds, improve ergonomics, or efficiently tie-in to existing production lines.

The Cylindrical Funnel features an accumulating funnel that speeds packaging productivity by allowing continuous feeding during the bagger cycle. The round design of the Cylindrical Funnel is ideal for longer parts that might bridge standard funnels. Once cycled, the funnel door opens into the bag, providing positive product entry.

The Cylindrical Funnel can be used with standard footswitch cycling or integrated with a SimpleCount™ detection eye for fully-automatic cycling. The universal design allows all accumulating funnels to be interchanged quickly for fast and easy set-up and changeover.

User Benefits

- Increases packaging speed by enabling continuous feeding while the bagger cycles
- Provides positive product entry into the bag
- Round design is ideal for long parts that might bridge standard funnels
- Universal design allows for easy funnel interchangeability
- Integrates with semi- or fully-automatic cycling functions
- Variety of sizes available to fit different bag sizes
- Sets up easily using the AutoTouch™ Control Screen
