

fixing

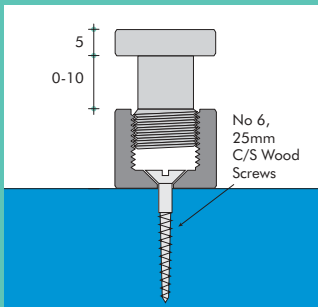

There are 3 different methods to wall or surface mount these panel fixings.

The **Micro, Mini and Maxi** fixings may be secured by METHOD 1 only.

Fixings **PSD.1 - PSD.5** and **PE.1 - PE.6** may be secured by METHODS 2 or 3 only.

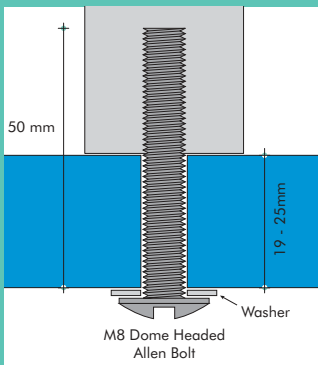

Please state your preference at time of order.

METHOD 1 - SCREW FIXED

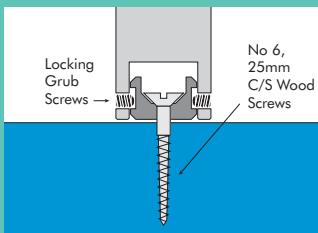

For fixing **Micro 15.35, Mini 15.27** and **Maxi 3.26**.

METHOD 2 - BOLT FIXED

Fixings **PSD.1 - PSD.5** and **PE.1 - PE.6** can be fixed on to M8 bolt or stud fixing.

METHOD 3 - OLIVE FIXED

Fixings **PSD.1 - PSD.5** and **PE.1 - PE.6** may also be fixed using this alternative method.

panel fixings

Shopkit introduces two new ranges of high quality panel fixings to our existing components range.

They provide an easy method to wall-mount sign panels, or create a raised counter top.

2 methods of fixing the panel are provided: either by clamping *through* the panel with holes drilled accordingly, or by clamping the edge of the panel.

A wide variety of materials and finishes are offered, with other finishes available to special order.

Pick a colour:

- 1 red anodised aluminium
- 2 gold anodised aluminium
- 3 satin anodised aluminium
- 4 blue anodised aluminium
- 5 black anodised aluminium
- 6 satin/mirror polished stainless steel

Standard sizes are available in either version, with other sizes available to special order.

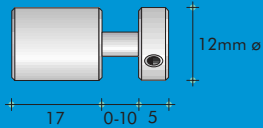

Optional
Vandal Proof
fixing head

panel supports

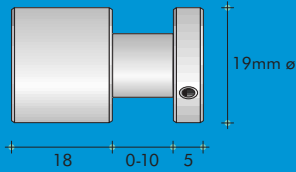

for drilled sheets

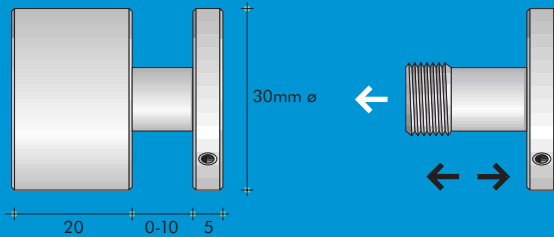

Micro 15.35

Mini 15.27

Maxi 3.26

PSD.4 in satin anodised aluminium, clamped through 8mm toughened glass

optional Vandal Proof fixing head

These **panel supports** provide an easy method to wall-mount sign panels, or create a raised counter top, and can be produced to hold glass or solid panels up to 25mm thick.

The **Micro** wall fixed panel support holds panels up to 10mm thick and screws down to zero. Panels require drilling with 9mm holes.

The **Mini and Maxi** wall fixed panel supports hold panels between 0-10mm thick. Panels require drilling with 13mm holes.

The standard size components **PSD.1 to PSD.5** (inclusive) will hold panels between 6mm and 10mm thick. Panels of up to 25mm thick can be accommodated by specifying made-to-order versions of components PSD.1 to PSD.5.

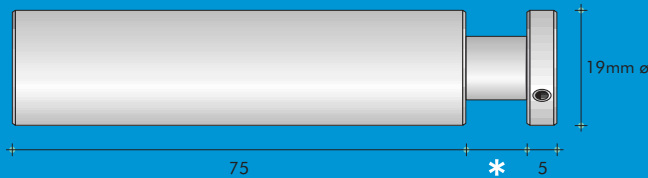

The size of the hole required to be drilled in the panel will depend on its thickness - please contact our technical department on 01923 818282 to discuss further.

Tightening down onto the panel material is aided by the small hole on the side of the top button: **see diagrams left** - or choose the Vandal Proof option **see photograph above**.

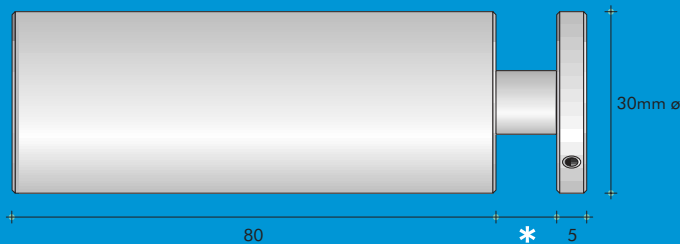

6 material and colour finishes are available (see introduction page for details) with specials available on request.

The **Micro, Mini and Maxi** panel supports are wall / surface mounted via fixing METHOD 1. Panel supports **PSD.1 - PSD.5** may be fixed by METHODS 2 or 3 only. See **back cover** for details.
