

Transfer pumps for low to high viscosity materials

5 Gallon ram mounted pumps with a See-Flo 494 dispense system

## Features

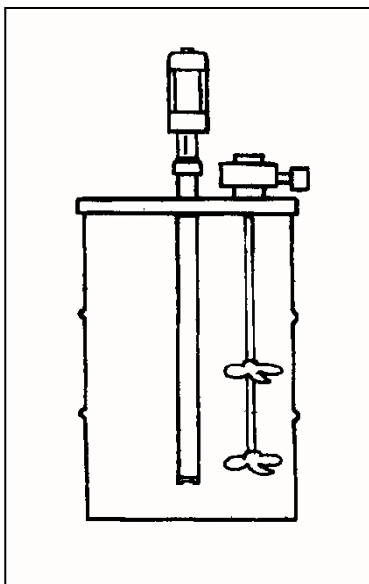

- Pneumatic operation
- Pump on demand
- Ball check for low viscosity
- Chop-check for high viscosity
- Divorced design
- Carbon or stainless steel wetted components
- All controls included
- Material 'wet cups' to isolate material from atmosphere
- Various packing configurations

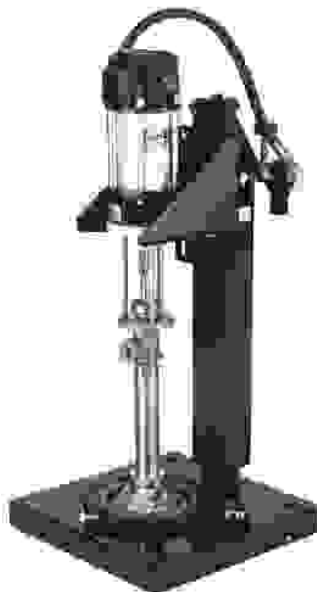

# Transfer Pumps

Bung mounted

Floor mounted

5 gallon pail ram

Diaphragm pumps

## •Mountings

- 5 rams, single or double post
- 55 gallon, 3.5" or 6.5" double post ram
- 5 or 55 gallon lifts; for low viscosity materials
- Follower plate seal with single or double seal
- Bung hole mounted
- Floor mounting
- 300 gallon magnadrum pump assemblies

## •Ratio

- Power ratio's from 1:1 to 64:1
- Higher ratio for higher viscosity materials

## •Pump Styles

- Chop check style for high viscosity materials
- Ball check style for low viscosity materials

## •Options

- Carbon or stainless steel wetted components
- Teflon coated follower plates
- Follower seals with different construction for material compatibility
- Pump low level alert & shut-off
- Automatic Material Pump Crossover Package for dual pumps
- 55 gallon drum covers with or without agitator
