

Living with Style

Our Company

Style and convenience ... in the past, one was often sacrificed for the other.

Today, people demand both.

Conventional building products need regular maintenance and eventually need to be replaced. PVC building products, on the other hand, are stylish, versatile, practically maintenance-free, and are fast becoming the clear choice for both new-build and renovation.

Freefoam is a leading manufacturer of PVC-U and PVC-UE building products for roofline, rainwater and window applications. Formed in 1990, Freefoam has grown rapidly to become one of the top manufacturers in the market through our quality products, excellent service and innovative approach.

Employing over 200 experienced people, we provide a fast and efficient service to our customers across Europe. The company operates state of the art facilities in Cork, Ireland and Northampton, UK. Manufacturing and sales for the Irish and Continental markets are operated from our Cork plant. Our subsidiary company in Northampton, Freefoam Plastics (U.K.) Ltd., manages the manufacturing, distribution and sales activities for the UK market. Freefoam operates to ISO 9001:2008 quality standards for continuous improvement across all operations, processes and procedures to ensure that its customers receive the highest level of quality and service.

Freefoam offer a comprehensive range of products including fascias, soffits, window boards, cladding and rainwater systems. Our products add style and definition to domestic, commercial and industrial buildings, and are available in a wide variety of profiles and colours.

We work in partnership with our customers to ensure that we deliver what you need, when you need it. We work with stockists and installers and make substantial investments in research to develop innovative solutions that make installation trouble-free. Our scheduling and distribution management provides an efficient and reliable delivery service as standard.

We take our social and environmental responsibilities seriously. We operate policies that meet responsible environmental standards, and both local and national guidelines. This is an integral part of the way we work and helps to provide a safe and healthy environment for our employees, our customers and our neighbours.

Welcome to Freefoam.

We look forward to working with you.

Our Range

It takes a wide range of products combined with a prompt and efficient supply service to meet the demands of style and convenience. Using our scheduling and distribution management system, Freefoam's comprehensive product range is supplied to stockists and installers through our distribution centres in the UK, Ireland and Continental Europe.

Freefoam has pioneered the manufacture of quality approved, lead-free, PVC-U and cellular PVC-UE building products for roofline and rainwater applications. Our comprehensive product range includes:

- Roofline fascia and soffit
- Cladding systems
- Window boards, trims and architraves
- Rainwater systems
- Decorative internal panelling
- Plastops® range of plastic-headed fixings

All our products are designed to eliminate costly, time-consuming maintenance. They are resistant to acids, alkalis and other pollutants and will not warp, crack, discolour or blister. They are lightweight and easy to install using traditional methods and tools.

Structural designs and trends change constantly, as do the personal preferences of home owners. To satisfy the diverse needs of our customers, our products come in a wide variety of colours and woodgrain finishes suiting any structural design.

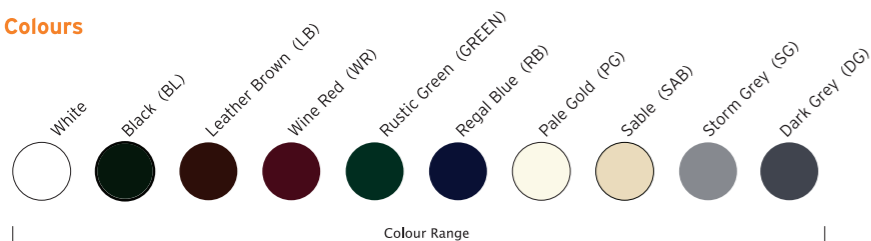

Freefoam's innovative Colormax™ technology provides ground-breaking colour variety, colour matching and colourfastness. As a result specifiers, architects, contractors and homeowners are now empowered to put their individual mark on their house or project. Furthermore, the inherent strength of the technology enables Freefoam to offer a 20-year extended guarantee* on white and a 10 year guarantee* on all other colours. In addition, we supply a range of woodgrain products which give the appearance of timber without the associated maintenance.

Freefoam's products add style and definition to both the exterior and interior of buildings in domestic, commercial, industrial and recreational settings, and also meet the requirements of certain health and safety applications, such as internal wall cladding in food preparation areas.

* Terms & conditions apply (see www.freefoam.com for details).

Note: A wider colour range is available for special projects and a colour matching service is available subject to lead-time and minimum order quantities.

Our Quality

Freefoam's products are designed to protect, to decorate, to ventilate, to insulate ... in short, to perform. We are committed to delivering excellence and innovation in our products as standard. We have established a reputation for quality, and all our products are manufactured to strict standards.

Our roof trim system is accredited by both the British and Irish Argément Boards (the BBA and IAB). We Operate to ISO 9001:2008 quality standards for continuous improvement across all of our operations, processes and procedures, to ensure that you receive the highest level of quality and service. Our products are comprehensively tested and meet industry standards for fire-resistance. They also have high thermal insulation properties.

Freefoam are committed to working in harmony with the environment. Our plant produces no emissions and we strive to eliminate as much waste from our manufacturing processes as possible. Our products are lead-free, and manufactured using an advanced environmentally-friendly formulation. Our products are impact-resistant, easier to work with and are guaranteed colourfast. These features provide significant advantages to users of Freefoam products.

Freefoam offer a 20-year extended guarantee. This is available on all white products (a 10 year guarantee applies to all other colours and woodgrains) used in Freefoam roofline and/or rainwater installations where no other brand of products was used. Details of our 20-year guarantee scheme are available from Freefoam-registered installers or on-line at www.freefoam.com/guarantee. In other cases, where Freefoam products are used with other products for an installation, our products are guaranteed for 10 years against warping, cracking, discolouration and other surface defects¹. This warranty applies to all products in all colours and woodgrains across the Freefoam range of roof trims, fascias, soffits and rainwater systems.
