

We specialise in the design, manufacture and installation of bespoke shelters and canopies

We specialise in the design, manufacture and installation of bespoke shelters and canopies that enhance buildings and provide protection to personnel and assets alike.

With a reputation for excellent service and on time installation, Bespoke Shelters is also as meticulous about the quality of its product range and commit to delivering your project within budget and with minimum disruption through efficient project management.

Shelters and canopies

Bespoke Shelters & Canopies LLP manufacture equipment to your exact requirements i.e. Budget and in a Design that is 'in keeping' with the environment, including listed buildings.

Shelters and canopies are manufactured in the UK by our team of highly skilled engineers using the highest quality materials and production processes.

A member of the Bespoke Shelters team can visit your site to discuss your requirements and advise solutions.

A proposal will be sent to you outlining our recommendations along with a no obligations quotation for the work.

Maintenance

To give peace of mind and to ensure that equipment is fully safe for users and looks cosmetically fresh, we offer scheduled maintenance service contracts as well as an emergency repair service.

We not only carry out these services on shelters & canopies installed by ourselves, but those existing manufactured by others.

Cycle & Buggy Storage

Bespoke Shelters design and manufacture cycle shelters and secure bike storage to meet the increasing demand for cycle parking.

We manufacture using a large range of materials i.e. PETG UV plastic, Western Red Cedar wood, Mild steel mesh, Wild flower Green roofs.

We can achieve any design no matter how complex and always taking into consideration surrounding buildings and environment.

Applications

- › Schools & Academies
- › Colleges and University's
- › Transport Interchanges
- › Office & Industrial Buildings
- › Hospitals & Public Buildings
- › Sports Stadiums
- › Shopping Centres
