

Cotside Bumpers

Entrapment is a common problem in beds with rails and we have tried to overcome this by producing cotside bumpers with the MHRA's anti-entrapment requirements in mind.

Conventional Cotside Bumpers (Guardian Angels)

Cotside Bumpers CSB

Designs suitable for use in children's units

To fit a vast range of bed rails from 140cm to 205cm long and various heights. The Basic wipe clean bumper has a foam inner and full length hook and loop fastenings along the bottom edge. Available in extra high to fit high rails when an extra overlay is being used.

CSBHE

Closed ends cotside bumpers to totally enclose trombone type rails. The closed ends ensure a secure fit and cover the vertical spaces.

Available in 140, 183 and 200 cm lengths
In normal height & extra high.

High Sided Bumpers CSBH

For use on high side rails when a mattress overlay or alternating pressure mattress is in use.

Available in full length and standard 140cm length.
CSBH size 140 x 90cm
CSBHL size 183 x 90cm
CSBHPB size 200 x 90cm

Full Bed Length CSBPB

Cotside bumpers to cover the full length of rails on a profiling bed. 200cm long.

CSBPB size 200 x 78cm

Deep Pile Fleece Bumpers CHSP1, CSHP2

Deep pile polyester fleece, comfortable, air permeable and washable, hook and loop along the full length to close. When the patient is subjected to fits – this model will allow air to pass through. See price list for details.

CHSP1 137 x 43 cm
CSHP2 173 x 43 cm

Connected Cotside Bumpers CCB

To prevent a patient from pushing limbs between the cot sides and mattress. The mattress holds the unit in place.

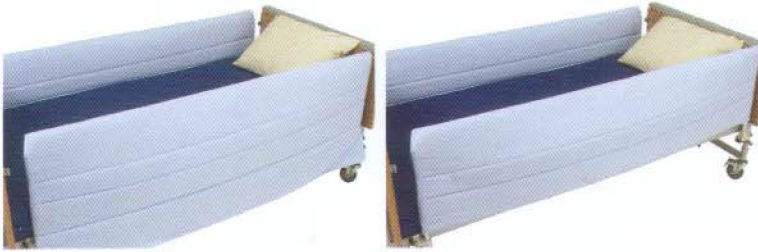

High Protection Bumper. To avoid entrapment and follow the requirement of the MHRA (Medicines and Healthcare products Registry Agency).

Our latest cotside bumpers incorporate a highly permeable base sheet which connects the 2 cotside bumpers and forms a safety net to prevent limbs falling through under the rails.

CCB 140 x 76 cm
CCBPB 200 x 76 cm
CCBPH 200 x 90cm

Quilted Hollow Fibre Filled Cotside Bumpers CSS, CSL

Covered in washable F.R. polyester, with extra long tucks to secure under mattress to prevent limbs falling between the rail and mattress.

CSS 140 x 43 cm or 54 x 17 inches
CSL 183 x 43 cm or 72 x 17 inches

Quilted - Wipe Clean Hollow Fibre Filled Bumpers CSQS, CSQL

Made with closed ends or open ended in various lengths these are available in fully washable and wipe clean material - see price list for details.

CSQS 140 x 43 cm
CSQL 183 x 43 cm

See Through Cotside Protection CSST

Claustrophobia can occur if the patient cannot see to either side. These clear cushioned protectors allow nursing staff a better view of the patient

See Through Side Rail Protectors (Connected)

- Enables the patient to look around
- Removes any feeling of claustrophobia
- More importantly! Clear sides allow continuous patient monitoring from a distance.

Specification: A rounded foam pad covered in wipe clean material 'clips' onto the top rail and a strong clear PVC panel closes the spaces between the side rails. The protectors are held firmly in place by 3 or 4 vertical hook and loop straps, depending on the length: 135cm - 183cm - 200cm.

Extra Secure Model has a net which passes under the mattress and connects the two side panels together, thus closing the gap between the rails and the bed frame.

Net to Close Gaps in Rails NET

A simple strong net covers the rails - tea cosy style - tough and closed along the bottom edge.

Head and Foot Bumpers

Made to client specification.
