

## Silent Space Isolation Booths

Features: -

- Silent Space Isolation Booths are available in **12 standard sizes**.
- Silent Space Isolation Booths come complete with **passive ventilation for totally silent air control**.
- Silent Space Isolation Booths come complete with an acoustic door with a vision panel and lock and is rated to a dB(A) reduction 30 for complete sound isolation both in and out.
- Silent Space Isolation Booths have an **overall airborne sound insulation figure of 34dB**.
- Silent Space Isolation Booths come complete with internal lighting and cable passages which have been carefully designed to minimise sound leakage.
- The panels are constructed from **tough and durable materials** so you can be sure that your investment will stand the test of time.
- The panels in the Silent Space Isolation Booths are perforated on the inside so are a **Class A Absorber giving an NRC of 0.87**.
- Because the Isolation Booths are **internally perforated** there is no need to purchase acoustic treatment to internally treat the booth.
- The outside and inside surface are very to maintain and keep clean.
- Silent Space Isolation Booths are finished in a **clean looking, durable powder coated finish** and comes in white as standard but is also available in custom colours by special order.

- Silent Space Isolation Booths have an internal ceiling height of 2.2m with an external height of 2.25m so the booths will suitable for use in domestic applications as well as commercial.
- The booths come complete with Internal Lighting, 1 Cable Passage, Acoustic Door with Vision Panel and Lock, Ventilation System, Fixings. The larger booths also come with a 900x900 Vision Panel.

These Silent Space Isolation Booths have been carefully designed to offer you the best in performance and durability whilst still keeping the costs of the units low. The Silent Space Isolation Booths are suitable for many applications including vocal booths, drum booths, practice booths, recording booths, meeting rooms, call centre areas and much, much more. The booths are constructed from 50mm panels made up of a composite of materials. The external skin is a durable but cleanly finished solid steel professionally finished in powder coated white for a long lasting finish. The internal skin is finished in the same exacting standards but is made of perforated steel to reduce reflections in the room and make it an ideal space for recording vocals, drum solos or even complete bands.

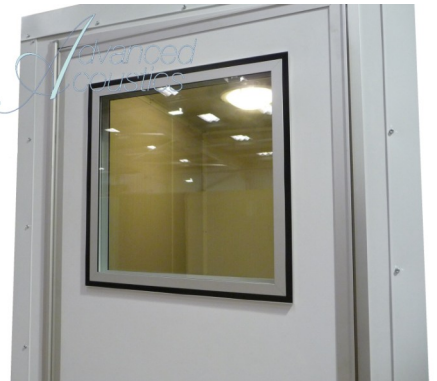

The Silent Space Isolation Booths also come complete with a lockable acoustic door to stop reduce from coming in and out for the complete sound isolation solution. The door also comes complete with a vision panel so you can see the person(s) working in the room for complete safety. Also included in every booth is a passive ventilation system, as there are no moving parts it is totally silent so there is no risk of fan noise coming through in the recordings. Another feature of our Silent Space Isolation Booths are our cable passages.

These have been carefully designed to reduce the amount of sound leakage as much as possible. Any gaps can seriously affect the isolation properties of the booth. Of course the Isolation Booth also comes complete with silent slimline lighting. The larger booths also come with an acoustic window to allow more light into the room. Thanks to the finish of the Isolation Booth and the standard colour being in one of these Booths is not a claustrophobic experience unlike other booths on the market which are dark and can sometimes make you feel like the walls are closing in. It is not the case with our Silent Space Isolation Booths, because they are light and airy you can spend many hours in them without them being fatiguing.

The Silent Space Isolation Booths are very easy to install and are simple to take apart again too if you need to move it. We also offer the option of supplying trained installers to assemble the Silent Space Booth for you for a minimal charge. All the Silent Space Isolations Booths are test built before dispatch to check for booth integrity and that all parts are complete. All the booths are dispatched within 14-21 working days of the order being placed.

As well as the standard booth there is also a list of optional extras you can add to the Silent Space Isolation Booth for example you might require more than one cable passage or you might need to sit the Silent Space Isolation Booth on an Isolation Platform to reduce vibrations passing through the floor.

### Standard Size Options

	<u>External Dimensions</u>	<u>Internal Dimensions</u>
SS1212-	1.18m by 1.28m by 2.25m	1.08m by 1.18m by 2.2m
SS1218-	1.18m by 1.82m by 2.25m	1.08m by 1.72m by 2.2m
SS1224-	1.18m by 2.46m by 2.25m	1.08m by 2.36m by 2.2m
SS1230-	1.18m by 3m by 2.25m	1.08m by 2.9m by 2.2m
SS2424-	2.36m by 2.46m by 2.25m	2.26m by 2.36m by 2.2m
SS2430-	2.36m by 3m by 2.25m	2.26m by 2.9m by 2.2m
SS3030-	3m by 2.9m by 2.25m	2.9m by 2.8m by 2.2m

SS3636-	3.64m by 3.54m by 2.25m	3.54m by 3.44m by 2.2m
SS3642-	3.64m by 4.08m by 2.25m	3.84m by 3.98m by 2.2m
SS4248-	4.18m by 4.72m by 2.25m	4.08m by 4.62m by 2.2m

## Optional Extras

Our Silent Space Isolation Booths also have various optional items you can add. The details of the optional extras are below

**900x900 Vision Panel** - This booth only comes with a vision panel in the door as standard, if you wish you can add a 900mm x 900mm Vision Panel

**Cable Passage** - If you have a lot of cables to pass into the booth or you would like to keep electrical cables separate from audio cables you might want to add an extra cable passage in addition to the one included as standard.

**Extra Vent Unit** - In most circumstances the passive ventilation is adequate for the size of booth however if you wish you can add an extra passive ventilation unit.

**Floor Isolation Pack** - As standard the Silent Space Isolation Booths simply stand on your existing floor. However if you are concerned with sound transmitting through the floor then we can supply a Floor Isolation Pack which is the same size as the external footprint of the Silent Space Isolation Booth. The Floor Isolation Pack consists of a layer of M20 Acoustic Matting, a layer of R10 Acoustic Matting on top and a layer of QuietBoard cement impregnated floor boards. The Floor Isolation kit will raise the height of the booth by approximately 50mm.

## Client List

We have an ever growing list of clients who have had Silent Space Isolation Booths installed. Here is just a very small selection of some our clients.

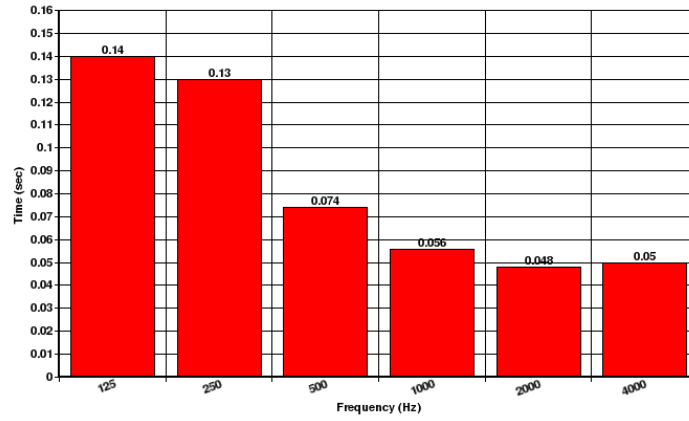

### **Educational**

Woodhouse College - London  
Tollbar Academy - Grimsby  
University Of Dundee  
University Of Huddersfield
