LM3/GEN/432/516/532/40 3 Phase 40a Load Monitor & Generator Tester

Designed to Monitor each phase of a Load to ensure balanced current draw. The 3 Phase Monitor Generator Tester will also Monitor Voltage between L1 and L2, L2 and L3, L1 and L3, L1 and N, L2 and N, L3 and N. It incorporates a Phase Rotation indicator that shows correct or incorrect supply Phase Rotation as well as a Frequency Gauge to show correct HZ. In case of a supply without a Neutral there is a switch to join Neutral and earth. If you require other sizes, 63a and 125a versions will be supplied if required, but they will be in different cases and slightly more expensive.

only £425 + Carriage & VAT
