Welcome to Tank Reline Ltd – Water Tank Repair Specialists

Tank Reline is a UK and Ireland approved applicator for Resichem 507 DWPU high build solvent-free urethane coating and we specialise in the repair and relining of the following water retaining structures:

- Galvanised Steel Water Tank
- Braithwaite Sectional Water Tank
- Glass Reinforced Plastic (GRP) Tank
- Cooling Tower
- Concrete Tank and Reservoir

Tank Reline Ltd has gained its first-class reputation by providing customers with the highest quality standards in surface preparation and application methods.

Tank Reline also specialises in:

- Project Management (Legionella Remedial Action)
- Mechanical Engineering (in regards to mains bypass and new incoming and distribution pipe work alterations)
- Full Water Storage Tank refurbishment
- Full Water Storage Tank repair and reline (tank coating works in line with the Water Supply Regulations)
- Cleaning and Disinfection Services following project works in line with British Standard & ACOP L8

Tank Reline Ltd has a Quality Management System and is a BS EN ISO 9001 registered firm.

“Our remedial action has been completed to the highest standard. A professional and trusted company.”

Stephen Capewell,
Technical Services Officer
Staffordshire Housing Association

In the past five years we have continued to grow and we now have clients all over the UK.

Cooling Tower Reline & Refurbishment

"Tank Reline has completed a number of remedial action projects over the past three years for the Trust. We have found Tank Reline and their team to be professional, considerate and their work is always of the highest standard. Should we require their services in the future I would not hesitate to use their services again and would recommend them to others."

John Clarke,
Estates Cumbria Partnerships, NHS

Relined and refurbished water tanks by Tank Reline Ltd.

"Tank Reline Ltd recently carried out the relining of the drinking water tanks and main CWS tanks on my site. I found they conducted themselves in a very professional manner and adhered to all the site rules as requested. The project was completed on time with no problems and the work carried out was of a very high standard. I would gladly recommend them to my colleagues on our other sites within the contract if they require any relining works to their tanks to comply with current legislation."

Christopher Thomas,
Site Supervisor, MITIE Technical Facilities Management

"Tank Reline completed a project for us recently. They were very professional, organised and most importantly in today's climate very competitively priced. From start to finish the project ran perfectly and they always recommend relining tanks over a full replacement, I would use Tank Reline every time. Also we and our client were very impressed with the photographic reports produced and thought this was a good touch to a great job."

Luke Tanton,
Stonegrove Limited

"In the past 12 months Tank Reline has been successful in bids with Leeds City College for refurbishment of several varying size water tanks. Tank Reline undertook the work following all professional and H&S policies and procedures to align and conform with the Leeds City College needs, Leeds City College are very pleased with the finished product in addition to the way in which Tank Reline staff conducted themselves in this very delicate environment."

Martin Higgins,
Estates, Leeds City College
