NATURE

Collection - The Familift

A passenger lift without the restrictions of the lift regulations that can travel 9 metres in just 60 seconds. Same choice of finishes as the standard passenger lift range.

Fully automatic doors available and only 200mm pit depth required.

HYDRAULIC - TRACTION ELEVATORS

- No need of machine room. Power unit and control panel are enclosed inside a special cabinet.
- Direct access to the power unit from the owner in case of emergency operation.
- Minimum requirements of shaft pit (200mm) and headroom (2500mm).
- Available with single-phase motor (220V).
- Standard automatic emergency operation.
- Special gears supplied for persons working inside the shaft.
- No need of concrete shaft. Available with metal shaft.
- Noiseless operation, perfect for buildings with space limitations.
