

Grain Butler

Self-Propelled Stirring Auger

The Grain Butler is a must in every grain store.
What it does:

- Facilitates drying by lifting grain from the bottom to the top.
- Mixes and blends the grain or other combinable crop.
- Makes the grain extremely flowable and non-compacted.
- Facilitates aeration.
- Helps maintain grain in store and allows quicker drying.
- Removes hot spots.

How to use the Grain Butler:

- Just place the Grain Butler on top of the grain.
- Size the auger length so that it will not touch the floor.
- Stand motor side of the Grain Butler to start the machine.
- Once switched on, the Grain Butler's auger will descend into the grain to a vertical position.
- The Grain Butler advances through the grain on its own and thoroughly mixes the grain from bottom to top.

Specification:

- 2.2Kw (3.0hp) gear motor with stop start safety switch.
- Space age design 840mm aluminium platform with motor mount and unique steering device.
- 50mm to 80mm grain stirring auger; lengths 1.5m upto 4.0m.
- the Grain Butler weight with 2m auger is 38Kg.

GRAIN CARE IS OUR BUSINESS

Solo-Unit

Rotary Control System

When turning one motor switched off
