

Flat panel fabrication

Grant Westfield specialise in the production of bonded panels complete with a wide variety of edgings. Panels are available in a wide range of core materials and laminate surfaces, in standard, moisture resistant and fire retardant options.

Panels can be postformed, hardwood edged or encapsulated using our PU casting techniques. [See our other product sheets]

Wood veneered panels can also be supplied, book matched in sequential panels where required.

We have full polishing and lacquer finishing facilities together with CNC routing and shaping equipment to provide you with complete sub-assembly elements.
