

Imagine a product that is truly environmentally friendly, totally inert and infinitely recyclable.

## Government and Local Authorities

Our Government and Local Authority clients tell us that their main challenges are to meet increasing demands for them to bring their 'green' policies to life by using 'environmentally friendly' solutions to new and replacement projects.

Our total recyclable products are ideal for housing developments 'makeover projects' replacement fencing for schools or parks, or more specialised applications like aesthetically pleasing sound barriers to protect residents from excessive motorway traffic noise, our products have proven themselves.

- **STYROWOOD** Portcullis Cladding, Fencing and Decking is made from extruded polystyrene, which will not rot, warp, twist or discolour.
- **STYROWOOD** is produced from 100% recycled material such as packaging, drinking cups, coat hangers and similar non-biodegradable products, no waste is generated during its manufacture. Any off cuts produced during installation can be collected and recycled to produce new **STYROWOOD**. The product is therefore environmentally neutral.
- Portcullis Cladding & Fencing is ideal for outdoor use, as it is waterproof, and should the product become immersed in water (i.e. due to flooding) there will be no adverse effect.
- Graffiti can be easily removed by using a proprietary brand of cleaner (e.g. CIF).
- The product is guaranteed for a minimum of 30 years and will not fade or discolour in UV light.
- **STYROWOOD** is through colour and available in four standard colours.
  - Chestnut Brown
  - Cedar Red
  - Forest Green
  - Standard White
- Other colours are available on request.
- **STYROWOOD** can be sawn, planed or screw fixed just like timber.
