

Workroom

Linings

Lining a curtain can extend its life and enhance the drape.

Available:

Available in cut lengths.

Care:

Can be machine washed. Product when despatched will contain specific washing instructions.

Can be dry cleaned. Individual fabrics when despatched will contain specific cleaning instructions.

Do not tumble dry.

Suitable:

Flame retardant, suitable for contract drapes.

Sales Aids:

Sample available on request.

Premium Satin

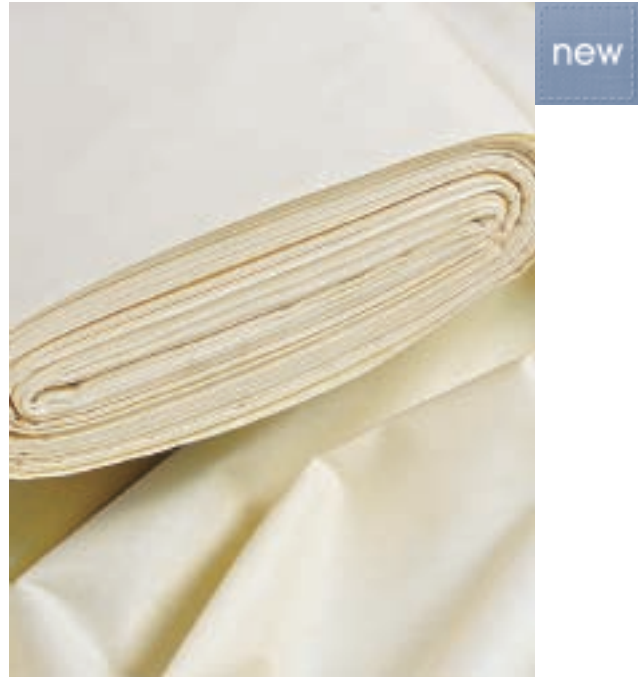

The high density of this premium grade lining provides maximum protection from sunlight and increased thermal insulation.

PREMIUM SATIN

H650

- UK dyed and finished
- Superb Handle
- Excellent crease recovery
- Low residual shrinkage after washing
- Enhances the appearance of the finished curtains

Solprufe Sateen Linings

Sateen lining is the definitive traditional quality standard for curtain linings. Its smooth appearance and durability ensures that it is always the soft furnisher's first choice. Solprufe, dyed and finished in the UK, is the exacting standard to which these classic sateen linings have been dyed. Excellent colour fastness to light (exceeding BS 5867 Pt1)

SOLPRUFE GOLD

H703

- Superior technical performance
- Luxurious appearance, better drapability
- Denser grade sateen fabric (116picks/inch)
- Fuller feel, improved handle
- High density opaqueness, so there is less light penetration for improved fabric protection
- Better colourfastness for washing and exposure to light, increased stability to washing
- Superior dry cleaning properties
- Higher crease resistance and better crease recovery than standard Solprufe linings
- Quality assured satisfying BS5867 Part 1

Width: 137cm (54") wide
Fabric Content: 100% Cotton
 135g / sq. metre
Construction: 72 x 116 30s/30s
Make Up: Rolled full width or creased half width on board
Colour: Ivory / White / Pearl

SOLPRUFE GOLD

TEFLON COATED H701

- Teflon finish resists water and oil based stains
- Teflon finish is applied when the lining is dyed so that it is undetectable to touch, smell and sight
- Denser grade sateen fabric (116picks/inch)
- Soft and luxurious handle provides better drapability
- Solprufe Gold dyed producing excellent colourfastness to light
- Quality assured satisfying BS 5867 Part 1
- Increased stability to washing
- Higher crease resilience and improved crease recovery, with less ironing
- High density opaqueness means less light penetration for improved fabric protection

Width: 137cm (54") wide
Fabric Content: 100% Cotton
 135g / sq. metre
Construction: 72 x 116 30s/30s
Make Up: Rolled full width or creased half width on board
Colour: Ivory / Pearl

SOLPRUFE PLUS

H747

- Fuller handle for a better feel
- Solprufe is the exacting standard to which this classic quality sateen lining has been dyed
- Excellent colourfastness to light, exceeding BS 5867 Part 1
- Better crease recovery, less ironing
- Schreiner finish to enhance the lustre

Width: 137cm (54") wide
Fabric Content: 100% Cotton
 125g / sq. metre
Construction: 72 x 96 30s/30s
Make Up: Rolled full width or creased half width on board
Colour: Ivory / Pearl

SOLPRUFE

H712

- Solprufe is the exacting standard to which this classic quality sateen lining has been dyed
- Excellent colourfastness to light, exceeding BS 5867 Part 1
- Good crease recovery
- Schreiner finish to enhance the lustre

Width: 137cm (54") wide
Fabric Content: 100% Cotton
 125g / sq. metre
Construction: 72 x 96 30s/30s
Make Up: Rolled full width or creased half width on board
Colour: Ivory / Pearl / Ecru / White

Cotton Sateen Linings

The high density of these premium grade linings provides maximum protection from sunlight and increased thermal insulation.

Fabric Content: 100% Cotton
125g / sq. metre
Construction: 72 x 96 30s/30s

CREASE RESIST SATEEN

H725

Width: 137cm (54") wide
Colour: Ivory / Pearl
Make Up: Rolled full width or creased half width

- Crease Resist Finish
- Dyed 'fast to light' (DFL) for good colour fastness
- Luxurious soft handle
- Excellent draping

STANDARD SATEEN

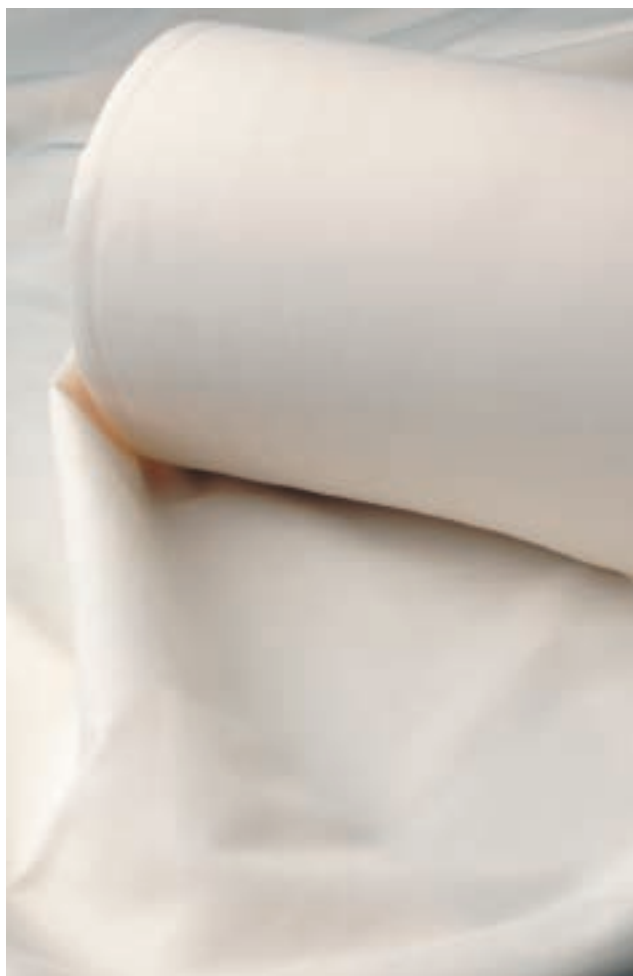

H722

Width: 137cm (54") wide
Colour: Ivory / Pearl / White
Make Up: Rolled full width or creased half width

- Dyed 'fast to light' (DFL) for good colour fastness
- Firmer handle
- Schreiner finish to enhance the lustre

Polyester Cotton Linings

- Low residual shrinkage
- Quick drying
- Good crease recovery
- Minimum ironing

POLYESTER COTTON SATIN

Construction: 60 x 60 21s/21s

Make Up: 137cm Rolled full width or
folded half width on board (100m)
274cm Rolled half width (50m)

Colour: Light Ivory

Thermal and Blackout Linings

These coated linings are performance fabrics produced to increase the thermal insulation properties of curtains, thus conserving energy and reducing fuel costs, and provide a blackout measure, for example for children's or night workers' bedrooms.

'3 Pass Blackout' has three separate coatings, or 'passes', applied to the base cloth. This produces a luxurious blackout fabric, finished on both sides, suitable for use on a separate track as a stand alone curtain if desired. Unsurpassed for total light control and noise suppression, 3 Pass Blackout can also be used as sewn-in lining since either side can face the window glass. A further benefit of this lining is even greater energy efficiency, due to the extra bulk of the additional layer of aero cellular acrylic foam.

3 PASS BLACKOUT BLINDS

H673 (UK PRODUCED)

Width: 137cm (54") wide
Fabric Content: Polyester / Cotton
 with fully durable acrylic latex foam coating
Colour: White Coating / White Fabric
 Ivory Coating / Ivory Fabric
Make Up: Rolled full width

H674 ULTRASOFT

Width: 137cm (54") wide
Fabric Content: Polyester / Cotton
 with fully durable acrylic latex foam coating
Colour: White Coating / White Fabric
 Ivory Coating / Ivory Fabric
Make Up: Rolled full width

THERMAL

Fabric with coating to one side
 Dim out and thermal insulation properties

H662

 with fully durable acrylic latex foam coating
Colour: Ivory Coating / Ivory Fabric
Make Up: Rolled full width

Cotton Domett Interlinings

PRE-SHRUNK NATURAL COTTON DOMETT

H121 270g / sq. metre

Width: 137cm (54")
Colour: Natural
Fabric Content: 100% Cotton
Make Up: Rolled full width

- Pre-shrunk finish medium weight interlining
- Low residual shrinkage
- Excellent sound and thermal insulation properties

SUPERSOFT COTTON DOMETT

H123 270g / sq. metre

Width: 137cm (54")
Colour: Natural
Fabric Content: 100% Cotton
Make Up: Rolled full width

- Medium weight interlining
- Soft raised finish
- Soft handle

COTTON DOMETT NATURAL

H120 270g / sq. metre

Width: 137cm (54")
Colour: Natural
Fabric Content: 100% Cotton
Make Up: Rolled full width

- Medium weight interlining
- Most popular for use with light and medium weight furnishing fabrics
- Sound and thermal insulation properties

COTTON DOMETT WHITE

H122 250g / sq. metre

Width: 137cm (54")
Colour: White
Fabric Content: 100% Cotton
Make Up: Rolled full width

- Medium weight interlining
- Most popular for use with light and medium weight furnishing fabrics
- Sound and thermal insulation properties
- Suitable for light coloured fabrics

SUPERSOFT COTTON DOMETT

H127 225g / sq. metre

Width: 137cm (54")
Colour: Natural
Fabric Content: 100% Cotton
Make Up: Rolled full width

- Soft handle
- Medium weight interlining with improved loft
- Full and clean appearance

SUPERSOFT COTTON DOMETT

H128 200g / sq. metre

Width: 137cm (54")
Colour: Natural
Fabric Content: 100% Cotton
Make Up: Rolled full width

- Light weight interlining ideal for light weight fabrics
- Soft handle
- Clean appearance

Non-Woven (synthetic) Interlinings

SYNTHETIC DOMETT

H130 180g / sq. metre

Width: 137cm (54")

Colour: White

Fabric Content: Polyester / Viscose

Make Up: Rolled full width

- Light weight interlining
- For use with light weight furnishing fabrics
- Economical

H129 220g / sq. metre

Width: 137cm (54")

Colour: White

Fabric Content: Polyester / Viscose

Make Up: Rolled full width

- Medium weight interlining
- For use with medium weight furnishing fabrics
- Economical

ARATEX NON-WOVEN BUMP

H132 285g / sq. metre

Width: 137cm (54")

Colour: Natural

Fabric Content: 75% Cotton / 20% Viscose

Make Up: Rolled full width

- Medium weight interlining with very full thickness
- For use with medium and heavy weight curtains
- Good sound and thermal insulation properties

WHITE NON-WOVEN BUMP

H131 285g / sq metre

Width: 137cm (54")

Colour: White

Fabric Content: Polyester / Viscose

Make Up: Rolled full width

- Medium weight interlining with very full thickness
- For use with medium and heavy weight curtains
- Good sound and thermal insulation properties

Bump Interlinings

Interlinings are used to improve the drape of curtains, producing a more luxurious appearance. In addition, pinch pleats and pencil pleats are given more prominence, and the density of interlinings increases the thermal and sound insulation properties of curtains.

PRE-SHRUNK COTTON BUMP

H141 NATURAL

Width: 137cm (54") wide

Fabric Content: 100% Cotton
400g / sq. metre

Make Up: Rolled full width

- Low residual shrinkage
- Pre-shrunk finish heavy weight interlining
- Excellent sound and thermal insulation properties

COTTON BUMP NATURAL

H140 NATURAL

Width: 137cm (54")

Fabric Content: 100% Cotton
400g / sq. metre

Make Up: Rolled full width

- Heavy weight interlining
- For use with heavy weight furnishing fabrics
- Excellent sound and thermal insulation properties

COTTON BUMP WHITE

H142 WHITE

Width: 137cm (54")

Fabric Content: 80% Cotton / 20% Mixed Synthetic Fibres
400g / sq. metre

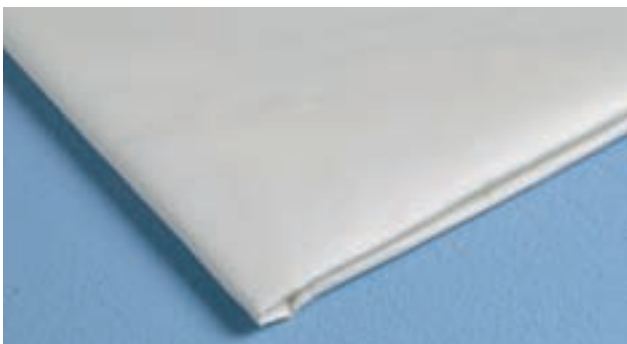

Make Up: Rolled full width

- Heavy weight interlining
- For use with heavy weight furnishing fabrics
- Excellent sound and thermal insulation properties

Fleece Interlinings

SATIN FLEECE INTERLINING

H160 COTTON SATIN

Width: 137cm (54")

Colour: Pearl

Fabric Content: 100% Cotton
225g / sq. metre

Make Up: Rolled full width

- Brushed one side to provide a constant raised appearance

Bonded Interlinings

Improving the drape of curtains.

FLEECELINER

- Non-woven fleece Interlining
- Bonded to lining face fabric
- Can be machine stitched thus reducing making-up time
- Improves drape of lined curtains
- Can be used for bedspreads
- Increased prominence for headings
- Thermal and sound insulation properties

H152 COTTON SATEEN / FLEECE INTERLINER

Width: 137cm (54")
Colour: Pearl Fabric
Fabric Content: 100% Cotton Sateen fabric bonded to Fleece Interlining
Weight: 255g / sq. metre
Make Up: Rolled full width

H154 BLACKOUT / FLEECE INTERLINER

Width: 137cm (54")
Colour: Light Ivory Fabric
Fabric Content: Blackout lining bonded to Fleece Interlining
Weight: 380g / sq. metre
Make Up: Rolled full width

H153 POLY / COTTON / FLEECE INTERLINER

Width: 137cm (54")
Colour: Light Ivory Fabric
Fabric Content: Polyester / Cotton Twill bonded to Fleece Interlining
Weight: 255g / sq. metre
Make Up: Rolled full width

SUPERLINER

- Lining bonded to Polyester wadding
- Can be machine stitched thus reducing making-up time
- Improves drape of lined curtains
- Can be used for bedspreads
- Increased prominence for headings
- Thermal and sound insulation properties

H150 COTTON SATEEN / WADDING

Width: 137cm (54")
Colour: Ivory Fabric
Fabric Content: 100% Cotton Sateen fabric bonded to Polyester wadding
Weight: 195g / sq. metre
Make Up: Rolled full width

H151 POLY / COTTON / WADDING

Width: 137cm (54")
Colour: Light Ivory Fabric
Fabric Content: Polyester / Cotton plain fabric bonded to Polyester wadding
Weight: 180g / sq. metre
Make Up: Rolled full width

Flame Retardant Sateen Linings

Flame retardant (FR) interlinings enjoy all the benefits of standard interlinings with the additional safety feature of either non-durable or permanent FR treatment. They conform to BS 5867 Part 2, making them suitable for contract use.

NON-DURABLE FR COTTON SATEEN

H618

Sateen lining with non-durable FR treatment, ideal for curtains which will only be dry cleaned. Conforms to BS 5867 part 2 (before wetting) Solprufe dyed. Provides excellent colourfastness for exposure to light and after cleaning (BS 5867 part 1). For use when curtains will only be dry cleaned.

Width: 137cm (54")
Colour: Ivory
Fabric Content: 100% Cotton
Weight: 125g / sq. metre
Construction: 72 x 96 30s / 30s
Make Up: Rolled full width

DURABLE FR COTTON SATEEN

H602

Sateen lining with fully durable FR treatment, ideal for articles that are to be washed. Conforms to BS 5867 part 2 - B Solprufe dyed. Provides excellent colourfastness for exposure to light and after cleaning (BS 5867 part 1).

Width: 137cm (54")
Colour: Ivory
Fabric Content: 100% Cotton
Weight: 125g / sq. metre
Construction: 72 x 96 30s / 30s
Make Up: Rolled full width

Flame Retardant Blackout Linings

Flame retardant blackout linings are specified for hotels, nursing homes etc. They are fully durable and conform to BS5867 Pt 2. They also have identical features to the domestic blackout styles.

3 PASS FR BLACKOUT

H670

'3 Pass Blackout' has three separate coatings, or 'passes', applied to the base cloth. This produces a luxurious blackout fabric, finished on both sides, suitable for use on a separate track as a stand alone curtain if desired. Unsurpassed for total light control and noise suppression, 3 Pass Blackout can also be used as sewn-in lining since either side can face the window glass. A further benefit of this lining is even greater energy efficiency, due to the extra bulk of the additional layer of aero cellular acrylic foam.

Width: 137cm (54")
Colour: Ivory Coating / Ivory Fabric
Fabric Content: Polyester / Cotton
 with fully durable acrylic latex foam coating
Make Up: Rolled full width

Flame Retardant Interlinings

Flame retardant (FR) interlinings enjoy all the benefits of standard interlinings with the additional safety feature of either non-durable or durable FR treatment. They are suitable for contract use, conforming to BS 5867 part 2.

NON-DURABLE DOMETT INTERLINING

H124

Width: 137cm (54")
Fabric Content: 100% Cotton
Weight: 270g / sq. metre
