

European Exhaust & Catalyst Ltd

Confused with Type Approval legislation?

Don't Jump the lights and risk a fine, use the EEC guide and get it right every time.

Type Approval legislation for replacement catalytic converters (R103) has now been passed and is effective from August 13th 2009.

Under the new ruling, you will only be able to supply & fit a replacement Catalytic Converter which is type approved to EU emission standards for vehicles registered on or after the 1st March 2001.

For clarity purposes "Y" reg and after requires an approved catalyst, "X" reg and prior can have a standard OR approved part supplied / fitted.

European Exhaust & Catalyst Ltd welcomes the introduction of the legislation and has produced a colour coded catalogue guide to ensure you comply with the new legislation:

RED: Vehicles registered on or after 01/03/2001, a type approved catalyst must be supplied / fitted.

YELLOW: Span the 01/03/2001 date, on vehicles registered before this date, a standard or type approved catalyst can be supplied, vehicle registered after this date, a type approved catalyst **MUST** be supplied / fitted

GREEN: Show parts not affected by R103 legislation, therefore a standard catalyst can be supplied and fitted. However, a type approved catalyst may also be supplied at the customer's request – check our guide to see if a type approved part is available.

- Extensive range of R103 compliant catalytic converters available from your local Motor Factor.
- Clearly identifiable packaging to distinguish between our approved range & standard range.
- Technical team to assist during the transition period.
- Two year guarantee on all catalysts.
- We also have available an extensive range of fitting kits, Lambda Sensors, Front Pipes, DPP's, Exhaust Systems & Brake Pads.
