

MKV- Heavy Duty Slitting and Rewinding Machine

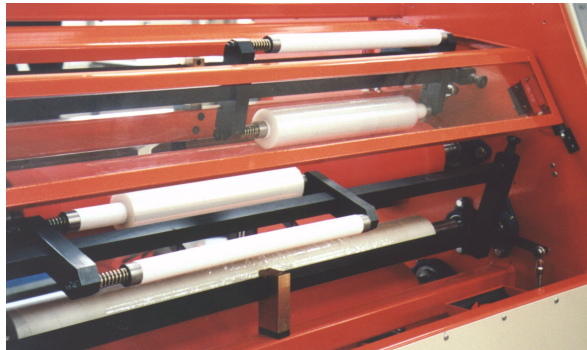

A semi-automatic machine primarily designed for the rapid conversion of PVC, PE Cling films & a range of LDPE stretch films.

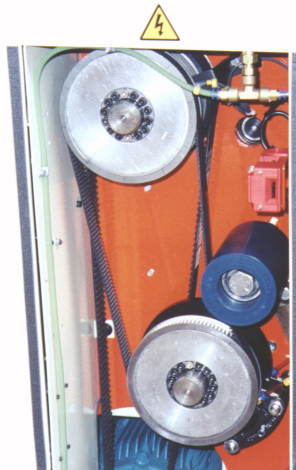

Machine Specification

- ❑ Variable speed 3.7 Kw A.C. drive giving speeds of up to 800 metres per minute.
- ❑ Independent rewind arm operation, giving options of straight forward rewinding or slitting - designed to produce industry standard 3 x 300mm or 2 x 450mm cling rolls in one operation. For stretch films 2 x 400mm or 2 x 500mm hand rolls.
- ❑ Fixed tension drive systems - supplied with 1%, 2% and 3% pulley options.
- ❑ Manually adjusted pneumatic core arm pressure.
- ❑ Programmable counter with auto-reset for precise length and braking control.
- ❑ Dynamic braking using rewind motor and inverter.
- ❑ Dynamically balanced polyurethane rollers as standard, with options in the case of stretch films.
- ❑ Maximum web width 1000mm
- ❑ Supplied as standard with twin turret arms allowing the operator to load/unload rolls whilst the machine is running.
- ❑ Rewind collet sizes of 25mm to 76mm available. Optional support mandrels and arms recommended for 450mm x 25mm dia rolls.
- ❑ Rear loading with 76mm diameter air mandrel or shaftless.
- ❑ Guarding to suit current C.E. regulations.

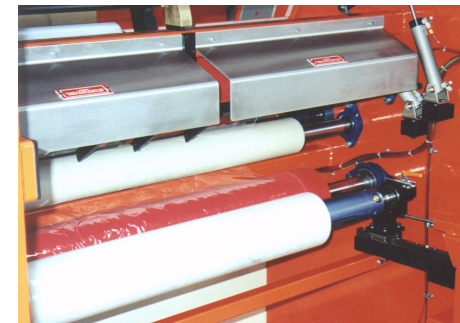

Machine Features.

Twin turret arms for fast changeover.

<-Fixed Tension Drive.

Rear loading.
