

**We're passionate about the flexibility of our service**

Our production flexibility allows us to bring client's ideas to life with skilled setters developing ideas at our machines using advanced computer technology.

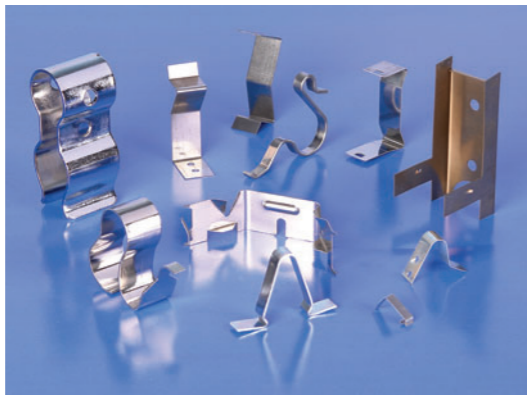

Through our preferred supply chain we can source an extensive range of spring materials and offer a large selection of protective and decorative finishes to meet customer requirements.

We are experienced in dealing with a broad range of assembly and packaging requirements. Parts can be assembled together or packaged to meet your specification using components supplied by our clients or by us. Special identification and labelling can also be provided to your required design including usual bar code formats.

Our highly flexible approach ensures that we can provide virtually any combination of service to meet any particular need.

Our bespoke delivery service can accommodate any commercial requirement including direct delivery, Kanban replenishment and consignment stock control.

With Airedale Springs you can be sure that your project will be completed to the highest standard of quality and service.

# Welcome to Airedale Springs

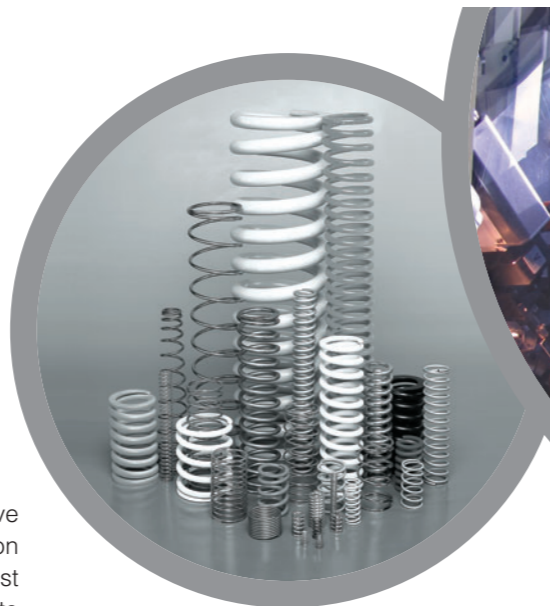

More than just a manufacturer

With years of specialist experience of manufacturing springs, pressings and wire forms, Airedale Springs enjoy a worldwide reputation for uncompromising quality.

## Experience of all spring types and a wide range of applications

However complex the project, our team has the skills to produce innovative solutions at best value. Whether developing prototypes, advising on design issues or managing production, we adhere to the very highest standards, ensuring a seamless service from initial discussion to final delivery.

Established in 1945 we are a family business with strong traditional values and a highly skilled and dedicated workforce who are committed to providing the highest quality of product and service to our clients.

[www.airedalesprings.co.uk](http://www.airedalesprings.co.uk)

## Committed to reducing our environmental impact

Completed in early 2012, our 18,000 sq ft state of the art production facility is built to the very highest environmental efficiency standards and incorporates solar power generation and low energy lighting. We constantly look for new ways to reduce our impact on the environment and are committed to working to the ISO14001 Environmental Management System Standard.

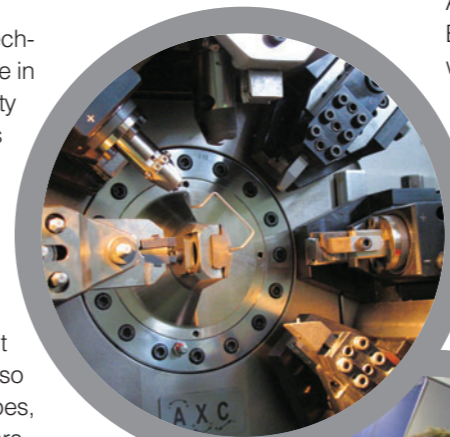

## Traditional skills and values, enhanced by state of the art technology

Equipped with the very latest CNC technology and with a wealth of experience in traditional crafts, we have the capability to supply an extensive range of products – the unusual is our usual!

Compression, extension and torsion springs and wire forms and rings can be manufactured from either round or sectional materials and can be produced in volume on our efficient high-speed CNC machines, but we also have the capability to handle prototypes, small batches and even one-off orders.

Flat springs and pressings can be produced by hand or on power presses from a wide range of materials to suit their design and functional requirements.

## Committed to providing the highest quality of product

As the first spring manufacturer in the UK to achieve BS5750 (now ISO 9001:2008) and Investors in People (IIP), we operate a quality management system that starts from our very first contact with a client through all stages of the project and are committed to the on-going training and development of our long serving staff.

Certificates of conformity are available where required by our clients and throughout all processes we provide full traceability.
