***TURBOCAM exists as a business for the purpose of honoring God,
creating wealth for its employees, and supporting
Christian service to God and people.***

We are a people who have received mercy and forgiveness and God's amazing grace. Created in His image, we seek to imitate Him by innovating to overcome obstacles and develop solutions, so as to build better products and communities.

**TURBOCAM HAS
OVER 150 5-AXIS
MILLING MACHINES
AT 10 LOCATIONS
IN 8 COUNTRIES
ON 3 CONTINENTS
PRODUCING
OVER 1,000,000
PARTS PER YEAR.**

We bring our faith to work every day, finding ways to express the grace we have received while doing business for the purpose of honoring God.

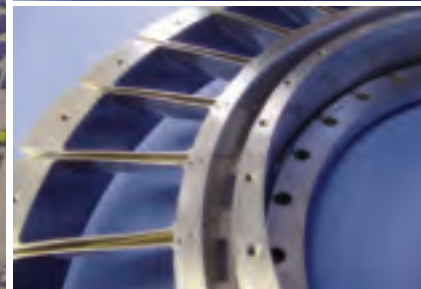

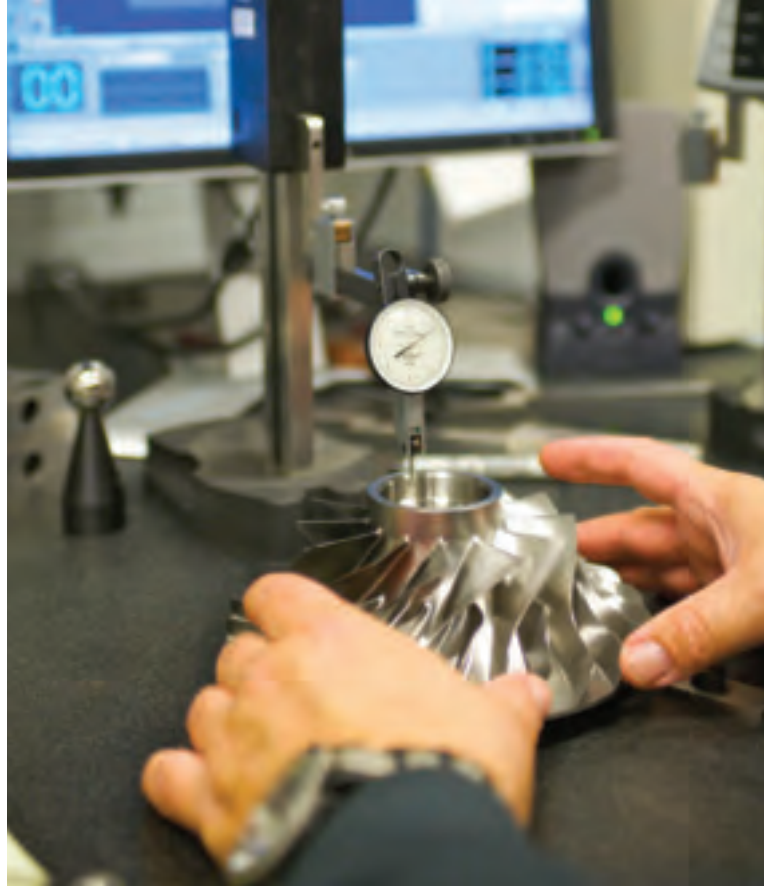

And while we come to work every day ready to take on challenges with skills, long experience and deep knowledge, we are frequently surprised with His grace of inspiration and divine intervention, leaving us with exciting stories to tell of breakthrough moments and progress in giant leaps and bounds.

At TURBOCAM, we embrace and expect innovation in all forms, from all people in all roles.

We find intrinsic beauty and grace in our freedom to innovate, as we advance the progress of turbo-machinery flow path component manufacturing. The free-flowing output of ideas constantly yields better results. There is no limit to our ways of innovation. It is how we design our plant, engineer our products, envision our staff, and structure our business. We are fueled by challenge and inspired by progress.

We innovate because we have the privilege to—not because we have to. It is this deep, internal pursuit of excellence that keeps us on the forefront of the industry. With over one hundred and fifty 5-axis milling machines at ten locations in eight countries producing well over one million parts per year, TURBOCAM is a recognized world leader in 5-axis manufacturing and related software solutions.

Our clients benefit when we innovate with grace. We adapt, we modify and we grow our capabilities to match their needs. With over 600 employees worldwide, TURBOCAM is constantly expanding with new staff and machines. With every opportunity, we ask ourselves how we can best add value—how we can best fulfill our clients' needs. We want to be part of their solution and part of their success. Only then have we truly succeeded.

We offer our expertise in 5-axis programming and milling of integrally bladed components for industrial, automotive and aerospace applications. Annually, we produce over 500 unique part designs using our custom software, which enables us to streamline the design and programming stages of the process, and improve the quality of our finished parts such as:

- ⚙️ Blisks machined from solid forging
- ⚙️ Axial and centrifugal impellers
- ⚙️ Turbines and Expanders
- ⚙️ Compressors
- ⚙️ Stators and Nozzles
- ⚙️ Diffusers
- ⚙️ Airfoil blades
- ⚙️ Turbochargers
- ⚙️ Pumps

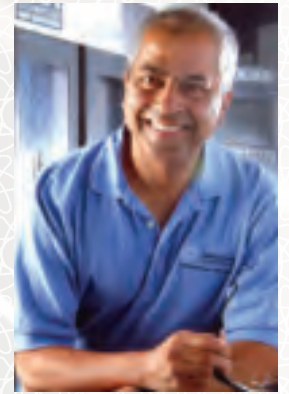

With additional skills and in-house resources in software development, aero design, machine optimization, stress analysis, robotics, automation, metallurgy, ECM, shot peening, balancing, and non-destructive and overspeed testing, TURBOCAM is revolutionizing the end-to-end manufacturing process. **We believe there's always a better way to do something**—and that there is never an end to good innovation.

"I learned that I needed to put God first in all that I did. When that happens, the rest falls into place. We want to do our work with excellence - to hide nothing. Do what's right because it's right."

Marian B. Noronha
Chairman & Founder,
TURBOCAM International

"There are many firms who offer 5-axis machining, but TURBOCAM worldwide annually manufactures over one million impellers in over 500 unique designs. When you partner with TURBOCAM, you not only get world-class machining, but the benefit of our vast industry experience."

Robin Taylor
Managing Director,
TURBOCAM Europe Ltd.

"As a high technology company in India, Turbocam has recruited local people and trained them in an atmosphere of nurture and excellence. Many in the company have been raised up to carry responsibility and perform technical tasks beyond anything they (or we!) could ever have imagined. This is entirely due to the grace of God upon Turbocam and in their lives."

Duncan Watkinson
Managing Director,
TURBOCAM India Pvt. Ltd.
