Walnut doors are constructed the same as oak doors but using walnut wood.

ABOUT DEANTA

Deanta has been serving the door industry for over 20 years. Over this time Deanta has come to appreciate our customers needs and expectations. Along with offering exceptional quality and value for money we continue to innovate and revolutionise the door industry. We manufacture all our own products giving us a distinct advantage over other suppliers who rely on sourcing the products from third party factories. By manufacturing our own products, we structure our product range to the specific needs of our customers and only accept the highest standard of materials when manufacturing our doors.

At Deanta, our aim is to give you the doors your home deserves.

Look for FSC certified products

The mark of responsible forestry
FSC® C112041

Why choose a Deanta Door?

At Deanta, we manufacture a wide range of internal doors to suit every style and taste. But do you know why our doors are better than others on the UK market?

Why choose a Deanta Door

Unlike most door suppliers in the UK, at Deanta we manufacture all our doors in our very own manufacturing facility. This not only allows us to control stock supply but it also allows us to have full control of the quality control process to ensure every door leaving our factory is of the highest standard. We have vigorous Quality Control procedures in place to check each aspect of every door and we stand by this with a limited 10 Year Manufacturer Warranty* on every door.

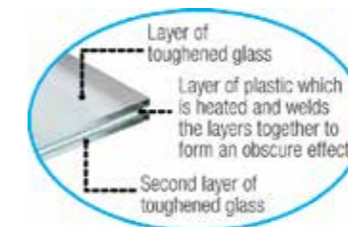

18mm Solid Oak Lippings

Deanta doors are offering some of the largest solid lippings available in an internal door on the UK market. Deanta doors have 18mm solid lippings all around the edges of the door allowing you to have more flexibility to modify your door without cutting into the core of the door. It also means you can rebate the door to use it as a double door without having to use a double door stop.

Deanta doors only use the finest crown cut veneer on all our doors. Each sheet of veneer is hand picked by our production staff in our manufacturing facility ensuring you get the most beautiful Deanta door.

Deanta Obscure toughened glass is made using a process of placing a plastic layer in the middle of two panes of toughened glass and heating the plastic. This causes the layers to weld together and the result is an obscure effect. But the main benefit of this process is it means the glass is much easier to clean compared to other obscure glass on the market that marks very easy due to the obscure surface being on the exterior of the glass.

SAFETY IN YOUR HOME

Deanta Doors supply a number of fire rated doors as standard in FD30 which have been tested by Chiltern Fire in the UK. Very simply a fire door is only a fire door when the various items such as the door, the frame, lock, hinges and architrave are put together and installed as they were tested to ensure they will withstand what they are designed for.

Firstly, an approved intumescent strip is required on the frames (your local hardware merchant can provide you with them or consult the **FIRE CERT on our website www.deantadoors.co.uk**) The Strip is then rebated into the frame midway between the edge and the door stop. It is advisable to use suitably tested door frames. The next step is the FD30 hinges are set into the door and frame, and an FD30 lock is rebated into the door. The frame then can be either fixed to the wall or partition with metal fixings or foamed in place with an FD30 foam and finally architrave is fitted to the door frame.

Please refer to the Fire Certificate on www.deantadoors.co.uk before you modify an FD30 fire door in any way.

WHERE TO BUY

Deanta has stockists throughout the UK. To find your nearest stockist email info@deantadoors.co.uk or visit our website at www.deantadoors.co.uk. *Please note Deanta supply to door retailers exclusively and do not deal direct with the public.*

CONTACT US

At Deanta we strive for excellence and we always welcome feedback, so please feel free to contact us with any comments or suggestions at info@deantadoors.co.uk. Or if you simply have a query about one of our products, one of the Deanta team would be happy to hear from you.

Please note special order off standard sizes are also available. Ask your local Deanta stockist for more details.

OUR DOORS

At Deanta, quality is guaranteed on all our doors. Our doors are made with 18mm solid lippings on both sides of the door along with 18mm lippings on both the top and bottom of the door. The larger lippings give an unrivalled amount of help making any modification to the door easier along with the added benefit of not having to use double door strips as the doors can be rebated instead. The core of the door is made using high density particle board core and the door is then finished with only the highest quality veneer. All Deanta doors come with an impressive 10 year warranty ensuring you have full peace of mind when purchasing a Deanta Door.

Please note the above applies to all Deanta doors manufactured after Jan 2013. Please confirm stock with your local stockist.

TERMS & CONDITIONS

At Deanta, every care is taken to ensure our doors are produced to the highest standards and arrive to you in a satisfactory condition. Just to ensure you are fully happy with your doors, we recommend you do a few small checks such as:

- Ensure the doors are in their Deanta branded packaging.
- Check for any marks which may have occurred during delivery.
- If for some reason you are not happy with a door, please keep the door in the original packaging.
- Any door removed from its packaging may not be accepted as a return.

At Deanta we offer a limited 10 year warranty* on all our doors. We guarantee your Deanta Door will not warp*, shrink or split. Just to ensure you get the best from your Deanta doors, we recommend the following:

- All doors should be stored horizontally on a clean, dry, flat and level surface prior to installation and allowed to acclimatize for 7 days.
- All doors should be varnished immediately after any alteration such as cutting or planing. This is to prevent water absorption which may lead to problems such as warping or splitting.
- No doors should be altered any further than the lipping on the door.
- Deanta doors should not be fitted in a house that is freshly plastered. Deanta doors should only be delivered to a site after all wet trades are finished and the house is fully dry. Moisture readings should be taken to ensure this.
- We recommend you use 3 sets of hinges per Deanta door.

At Deanta, our doors are made of wood and therefore are a natural product. Due to this all wood doors are subject to humidity and temperature changes. Although Deanta strenuously quality checks all our material, wood is a natural product. Each door may have slightly different patterns of graining or colour variations. As the wood ages any colour variations will subside.

When finishing a door with varnish, please ensure it is manufactured for internal joinery. We do not recommend the painting of our doors. For all oil finishes please consult with your local Deanta stockist for information on approved products.

*Applies to all doors purchased after May 2012. Warp/bow/cup/twist (as set out in the relevant British Standard) shall not be considered a defect unless it exceeds 1/4 inch (6.35mm) in the plane of the door itself. Warp is any distortion in the door itself and does not refer to the relationship of the door to the frame or jamb in which it is hung.
