

BR-AM-102

Armco Barriers

Armco barriers are often used around car parks or within industrial and other buildings where forklift trucks operate. The purpose of this robust barrier is to create boundary demarcation and separate pedestrians safely from forklift trucks and other vehicles. Produced in our own fabrication department. Armco barriers can be made to suit site dimensions.

They are supplied galvanised or polyester powder coated and installed on site by our own teams.

Applications

- Schools
- High Security
- Utilities
- Airports
- Retail | Sports & Recreation
- Industrial Units | Warehousing

Product Data

| | Gate Height | Gate Width | External Size | Post Section | Gate Leaf Section |
