# Tubular Handrail System

Our Tubular Handrail System is simple to use and quick to install. All you need on site is a hacksaw and a drill. The components are fixed together using s/steel pop rivets or nuts and bolts. These can be supplied if required. 50mm diameter tube is available in 6m lengths but can be cut for you to any length free of charge. This handrail system is available from stock in Yellow and Grey. Other colours can be made to order depending on quantities. Not all fittings are available in the Grey system. Please call for further information.

50mm Diametre Tube

Many different components are available to assist you in creating just about any configuration of handrail. 50mm diameter tube is available in standard 4mm wall thickness or 6.5 mm heavy-duty wall thickness. The tube has been tested to British Standards BS 476 Class 1 and has been passed to be used as a handrail or barrier.

# Square Post Handrail System

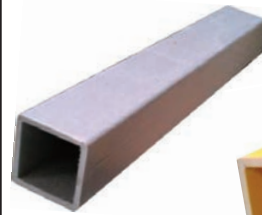

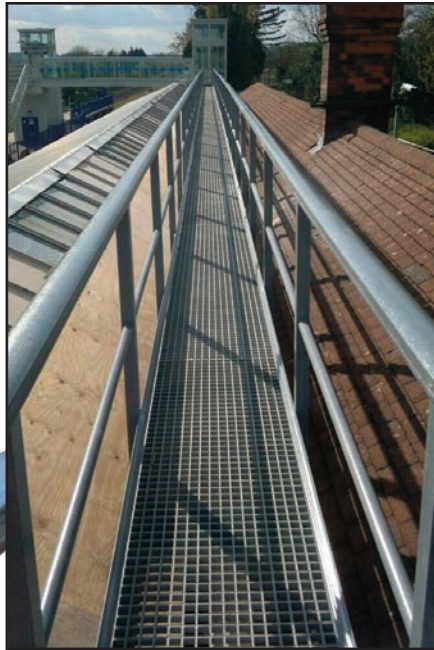

Our square post handrail system is designed with maximum strength in mind. The box section has been tested to BS 476 Class 1. The system is made up from the following components:

- \* Toprail
- \* Midrail
- \* Posts
- \* Kickplate

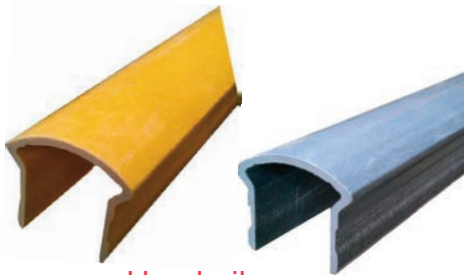

There are also 'Box Feet' available to enable you to fix the handrail down to a concrete floor. Side fitting is created using anti-crush tubes to prevent damage to the posts. This system is available in Grey or Yellow from stock. Lengths of material can be supplied or alternatively we can make up sections of handrail for you ready to fix.
