Where Reliability Matters

PRODUCTS AND SERVICES

Dominion recognises that the integrity and quality of our equipment ensures the safety of customers and staff. We operate to best in class industry standards.

All gas equipment meets the specifications, standards and design requirements for UK and worldwide transportation. Dominion Gas is a supplier member of the International Marine Contractor's Association.

Dominion offers full turnkey service inclusive of specialist projects with tailor made innovations such as customized gas mixing systems and Portable Gas Transfill Systems.

Our Range of Products

- Diving Gases
- Welding and Cutting Gases
- Scientific and Analytical Gases
- Specialty Gases
- Cryogenic gases
- Chemicals
- ISO Tanks (cryogenic, acid, chemical)

Responsive Service

- Ongoing Quality Maintenance
- Reliable Transport and Logistics
- Customised Project Management and Engineering Design
- Cost Effective Supply Chain Management
- Cylinder Testing in compliance with local and international standards

ABOUT DOMINION GAS

Established in 1987, Dominion Gas is an independent oilfield services company supplying the full range of diving, welding, industrial and calibration gases with the associated containment equipment for offshore use. Dominion Gas constantly strives for innovation and excellence. We are proud of our reputation for providing high quality products and service that continues to set industry standards.

In 2008, Dominion Gas acquired Argon Isotank, thus widening our range of products to include liquid, cryogenic, chemical and acid tank products and services.

Argon also provides a full range of engineering and tank container services to suit all requirements. From design, project management, repairs and pressure testing, our experienced installation teams, right through to our own tank and pump technicians provide the relevant expertise.

With facilities in the UK, Singapore, Norway, Ghana and Australia, Dominion Gas and Argon Isotank distribute products and services across the oil and gas industry to a broad range of international clients worldwide.

RELIABLE EQUIPMENT

Dominion only builds equipment to the highest standard of quality to ensure durability and reliability in harsh environments.

Dominion offers the following equipment for rental or purchase:

- **Quads**
Ranging in configuration from 16, 48 and 64 cylinders and supplied complete with slings.
- **ISO Tanks and Offshore Tanks**
Cryogenic, acid and chemical use
- **Customised Gas Mixing And Distribution Systems**
Designed for specific applications and projects to be deployed to client sites/vessels
- **Compressors**

Dominion's fleet of 48 & 64 cyl quads are designed to be double stacked with a working pressure of 300 bar. This results in:

- Lower rental costs
- Lower shipping, transport and handling costs
- Less deck space required

CYLINDER ASSET TRACKING SYSTEM (CATS)

Dominion's in house tracking software, CATS was developed to solve problems of the "lost cylinder syndrome" and to help companies save time, money and reduce risk.

CATS works through a unique serial number system to give you the ability to monitor equipment and access information such as:

- Gas and rental invoicing by the day
- Links to DGN's, MSDS, TREM cards
- Equipment tracking from delivery to return
- Equipment and product certification
- Customised reporting

CATS manages all aspects of equipment integrity, certification and testing.
