Facial Protection

Skin Protection Cream

prevents lacquer hazes from sticking to the skin

PRODUCT DESCRIPTION

High fat content, viscous, white W/O emulsion based on an exceptional skin friendly combination of good absorbing and covering lipid working components.
Silicon-free, lightly perfumed and conserving.

COMPOSITION

Ingredients (INCI): Aqua, Petrolatum, Lanolin, Alcohol, Cetearyl Alcohol, Phenoxethanol, Methylidibromo Glutaronitrile, Parfum.

FIELD OF APPLICATION

As a facial protection for personnel working with sprays, prFacial protection prevents colour/lacquer mist from sticking to the skin. Lacquer and cream can be removed with a wipe.

Protection in wet and humid working areas.

Also used for cleaning where high grease content is required (chapped, dry skin, cold protection cream).

FUNCTION

A cream with high grease content and very good skin tolerance with a separating film that prevents colour and lacquer mists from sticking to the skin. It makes the skin water repellent, retains skin moisture and skin suppleness and prevents roughness and chapping of the skin.

USAGE AND DOSAGE

Use with clean and dry skin. Rub in lightly and evenly as a facial protection against colour/lacquer hazes. Carefully massage it in as a protection in wet or moist working conditions as well as for care where a high fat content is required.

For face and hands approx.. 0,5 ml respectively.

CONTAINER SIZE

325 ml screw-lid can
