key Options and accessories

Street Lighting Pack

Offers deployment of Jacks from bucket, with restricted operational arc over the rear of the van without jacks and when want to work beyond restricted limit allows deployment of jacks from the upper controls.

Also includes the Walk-In Bucket, for easier access 'walk- in don't climb in'. The pack is completed with extended outreach capability with one man in the bucket, facilitated by a load sensor in the fly boom, offering accurate and reliable performance.

Extended Outreach

Offers extended outreach capability with one man in the bucket, facilitated by a load sensor in the fly boom, offering accurate and reliable performance. Particularly useful when reaching over obstructions, such as parked cars at low level.

Jacks from Bucket

Offers operation of Jacks from bucket, with restricted operational arc without jacks and when want to work beyond restricted limit allows deployment of stabilisers from the upper controls.

Walk-In Bucket

Offers the ability for the operator to walk in to the bucket, rather than climb in to the bucket. This is particularly beneficial for those operators frequently in and out of the bucket, day in and day out.

Street lighting pack

Articulated low boom models

Insulated models

Jackless models

Jib & Winch models

Proportional controls

360° Continuous Rotation

A 360° continuous rotation of the platform enables the operator to freely rotate the platform in any direction for as long as required.

420° Non Continuous Rotation

Available on certain models only and offers all the flexibility of 360 degrees continuous rotation but at a lower cost.

180° fly boom

Offers additional manoeuvrability and improved reach envelope characteristics, with an extra 70 degrees of movement and standard 110° flyboom.

Powered Bucket Rotation

Offered on selected models, this options allows the operator to rotate the bucket by either 90° or 180° depending on fly boom. Particularly useful for signage installers.

LV Insulation Kit

Fully certified insulation pack allowing safe working in LV environments, in line with statutory working practices. Includes insulation of main boom, upper controls and bucket and therefore addressing the issue of any current passing to ground should the boom come in to contact with a live surface.

Rotation Interlocks

Limited rotation interlocks restricting platform rotation to either n/s or o/s, selectable via switch in rear of vehicle. Particularly suitable for highway applications.

Under floor Stabilisers and Frame

Particularly useful if a clean flat load bay is required with no protrusions in to the vehicle. Only suitable for vans with sufficient ground clearance and accessible under floor structure.

Safety Net

Offers a safety feature for people working or walking under the platform whilst in use, from the danger of dropped tools and or equipment. The net is mounted on telescopic aluminium arms that fold up out of the when not in use.

Reversing Camera

Aids vehicle reversing as it allows the operator to see the bucket that is otherwise obscured from vision - available in either colour or black and white, with LCD monitors mounted to the dash of the vehicle.

key Options and accessories

Reversing Bleeper

Sounds alarm on engagement of reverse gear with night silent facility.

Light Bars and Beacons

Many options and choices, ranging from a simple rotating amber beacon to 48" LED light bars - Please ask for details.

110v Power Line

Provision of 110v power, line up the boom with outlets at the bucket and pedestal. The pedestal end comes with sufficient tail to plug in to a portable power supply.

On Board Power

Provision of 110v or 240v power source within the van, by the use of an inverter be it either quasi or pure sine wave, plus auxiliary battery and split charge system.

12v to Bucket with Worklight

Provision of 12v power to the bucket with work light or lights, for illuminating work area. Either magnetic or spigot mounted.

Hand Wash Station

Electric hand wash with hot and cold water and can include soap, towel and barrier cream dispensers as well as eye wash stations. The hand wash is usually mounted to the bulkhead by the door but it also possible to fit on machine pedestal or by rear doors on most applications.

Jacks Side Door Interlock

Important accessory to many customers as this safety feature prevents use of stabilisers if the side door is open.

Traffic Direction Arrow

Adjustable diamond grade reflective directional arrow on o/s rear door or rear deck of truck for supplementary visual warning to traffic, whilst vehicle is stationary.

Racking

A number of options are available with regards to providing storage solutions within the vehicle, from simple steel mesh bins or plywood racking, to comprehensive steel or aluminium racking systems complete with work benches, ladder racks, tool boxes, parts bins and such like.

Chevrons and Hazard Marking

An important safety feature when operating in a highways environment, which is why we feel that full door height chevrons are a worthwhile investment. They can be normal reflective grade to diamond grade.

Proportional Controls

Twin proportional joystick control available on most models, offering the ability to quickly manoeuvre the boom in to place.
