Option of interior and exterior planting to suit any location

Living Walls - inspirational growth

It's an inspired idea. Using Living Walls to cloak buildings with a beautiful, living façade that breathes, lives and grows. Whether it be transforming the exterior of a tired looking building or planting an incredible feature wall in a hotel reception Living Walls have the ability to transform any environment.

Developed using a modular system that is highly flexible and integrates a self-watering system to ensure that your wall stays looking its best Plant Plan Ltd have the answers to all of your questions.

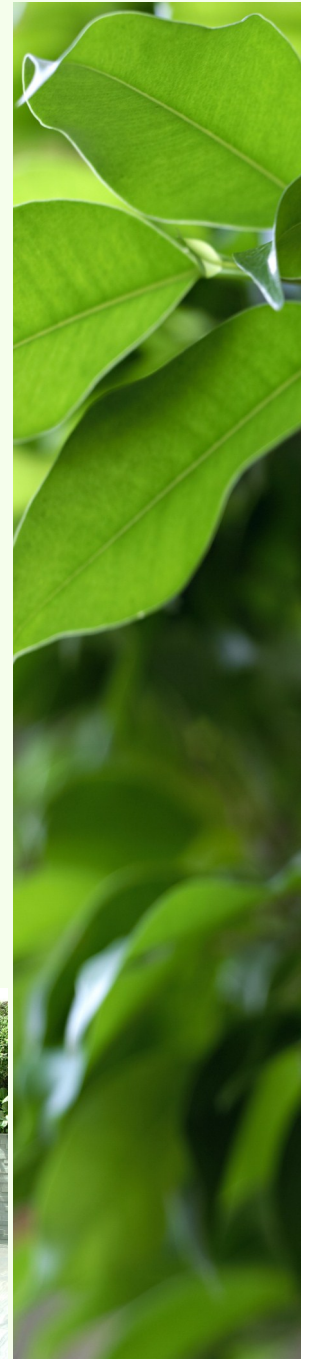

Improving the environment

Living Walls are a powerful force. With their dense, well-established planting they act as huge lungs filtering harmful toxins and gases out of the air. At the same time they help negate some of the heat island effect found in cities, lower noise levels and bring increased biodiversity into urban areas.

Dedication and Professionalism

Plant Plan Ltd pride themselves on their dedication and professionalism. Whatever the project on hand is we approach it with passion and drive. Established for over 30 years we have an expert, knowledgeable team that will work with you to bring your dreams to reality.
