Versalift – vehicle mounted access platforms

A leading manufacturer and supplier of vehicle mounted access platforms worldwide, Versalift works with many of the UK's major telecom companies, utilities and contractors in both the private and public sectors.

Versalift is the worlds largest manufacturer of van and truck mounted aerial devices. More than 90,000 units have been sold since 1965 with around 60,000 still in use today. Versalift Distributors (UK) Limited were founded in 1994. In 2000 we moved into a purpose built 3500 sq.m. factory in Burton Latimer, with plans to expand this to 5000 sq.m.

Our commitment to quality and service, coupled with a highly skilled workforce has made us market leaders in van mounted platforms and preferred suppliers to major fleet users and hire companies everywhere. Versalift offers a comprehensive range of products, including full service, training, parts and design back-up. Whatever your vehicle mounted access requirements, if you need reliable, high quality service call the professionals. Versalift is the world's largest manufacturer of van and truck mounted aerial platforms supported by Time worldwide and wholly owned by O'Flaherty Holdings in Dublin.

Products & Services

Products

From compact, simple-to-use platforms on light vehicles to fully insulated off-road machines with materials handling capability, Versalift can provide the right vehicle-mounted machine for all applications and budgets. New, and used van and truck mounted units are available and our sales team are always happy to advise on any enquiry or provide a demonstration.

Quality in Design

A vehicle-mounted platform represents a significant investment and you need to be confident that it will provide long and trouble-free service. A major factor affecting long-term reliability is sound design, both of the platform structure and the all-important interface with the carrying vehicle. At Burton Latimer, we have our own team of engineers who work with vehicle manufacturers and our factory engineers in the USA and in Denmark, to ensure the highest standards of design and performance.

– worldwide quality and commitment
Versalift products are built by Time Manufacturing Co.
in Waco Texas, Time Export in Denmark and
assembled in the UK by Versalift.

Service and Repair

Aerial work platforms by their nature are safety-critical and must by law be regularly inspected and maintained to ensure trouble-free service. At Versalift, we offer a complete facility for all makes of platform to ensure compliance with Health & Safety regulations. On-site service contracts anywhere in the country, major repairs and refurbishments in our workshop and remounts to new and used vehicles are all available to ensure maximum productive life from your machines.

Training

Only trained operators should use aerial work platforms and those operators need to carry proof of adequate instruction. Versalift are an approved IPAF Training Centre and issue successful candidates with the IPAF PAL card.

Parts

Our parts department at Burton Latimer can supply spares for all Versalift platforms, usually overnight. Strategic stocks are maintained in the UK with back up from our European centre in Denmark and the factory parts department in Waco, Texas.
