Our goal is to **build long-term relationships** in order to provide a more complete, competitive and successful service. Coordinating multiple activities and people across the scope of your project – from assembling team members, installation, system testing, certification, to customer acceptance – an enormous task that requires the dedicated attention of a single accountable individual. We assign a project manager (PM) to your case to oversee every facet of the implementation process. The PM works closely with your personnel to develop the project plan – schedule milestones and prepare detailed tasks for the projects.

Why use Milestone Management?

- Expediting – a proactive and cost effective service through our extensive world-wide network.
- NDE Testing Services – providing full range of NDE, Quality Control and Quality Assurance.
- Project Management – through connecting the right people at the right price at the right time.
- Outsourcing – the expertise to help clients realize a competitive advantage through strategic sourcing solutions including manpower.

Quality Control, Vendor Inspection and expediting are an integral part of project purchasing activities. Milestone Management offers a complete range of services. Whether for new construction or ongoing maintenance, our inspection and expediting services give confidence that purchased equipment will arrive when required and to the specification required.

Vendor Inspection – often referred as Third Party inspection – covers inspection activities performed at manufacturer’s works.

Expediting is a continuous process, commencing at the time of order placement ensuring that final delivery of goods and documentation the job site is achieved within the shortest possible timeframe. Depending on client requirements expediting services may apply at different stages of a project such as fabrication and assembly, rectification work, material deficit, failure on test or inspection, shipment and packing, and /or submission of documentation.

Milestone Management provides you with the opportunity to achieve your quality requirements in a speedy professional and efficient manner. We can provide experienced technical personnel from an extensive international network of qualified and internally assessed inspectors, thus enabling us to provide a comprehensive cost inspection service to our clients.

Non Destructive Testing

Our service inspection can provide field inspection services including the full range of NDE Field Services, Structural Steel Inspection, Fabrication and Machining Inspection.
