Controls Division

Ducting Systems Division

Sheet Metal Division

Swimming Pool Division

Structural and External Applications

T.A.B. Sheet Fabrications Ltd was formed over 25 years ago to meet the needs of local industry. As TAB continued to expand and diversify its product and service range, we felt it important that specialist areas within the company were formed ensuring that the best advice and service would be provided to the client.

Our modern in-house facilities are well equipped enabling us to manufacture anything from large security louvres to intricate prototype tube and sheet work.

Our structural division manufactures and supplies all applications, ranging from cappings and panelling for buildings; handrails for hospitals, schools, commercial and residential areas.

TAB's Maldon workshop enables us to manufacture in all types of materials including aluminium and stainless steel. This allows us to fabricate signage and support structures; as well external canopies and fire escape routes.

With the need to integrate security within some of our products, our design and installation teams are fully experienced within this field.

Call us now on 01621 858 848 to discuss your requirements.
