## Sanitary Waste Pumps

### Information Sheet Uniflo-Mini Shower Basin Pump

The Uniflo-Mini is a quality product that comes with low level inlets to accommodate a shower, basin, bidet or combination of two, also suitable for a kitchen sink. Any of the inlets can be blanked off if not needed making this unit ideal for a number of installation designs. The compact and modern design will blend in with any bathroom installation. It can be concealed in a bathroom base cabinet or be built in under a shower tray, it has easy access for servicing, making this product your first choice in waste removal. This unit has built in non-return valves as standard. The waste pumped outlet can be installed in 32 or 22mm pipe work, a 90deg elbow is supplied to accommodate both sizes. The Pump is fully automatic and has a quiet 250w motor.

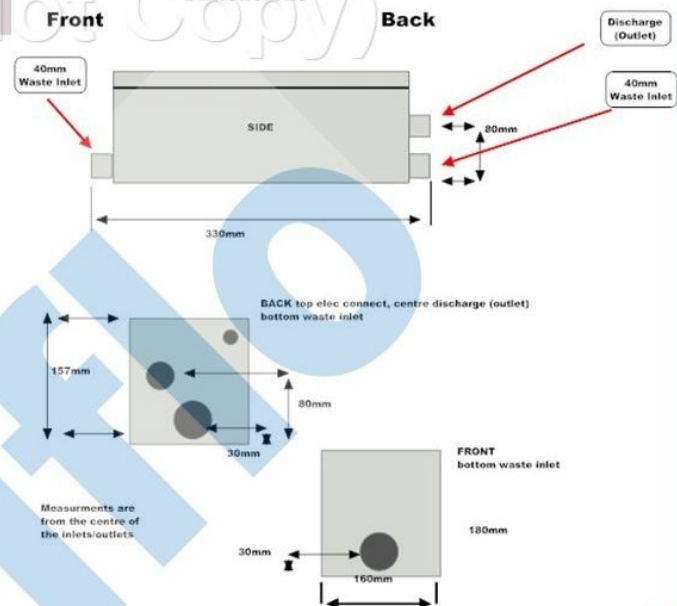

Please Note: This Product is not suitable for Baths.

#### Technical Data:

- Input Voltage AC 220-240v, 50hz
- Motor Power 250w
- Vertical height discharge 4 meters
- Horizontal length discharge 40 meters
- Protection IPX4
- Max Input Flow: 15L / min
- Output flow 200L / min
- Not suitable for WC or Bath

The unit works on pressure, when the shower or basin is used the waste water enters the unit causing the pressure to build up inside the pressure chamber. This then activates the motor and pump, which drives the waste water through the outlet via small bore pipe work to the sewer or soil stack, making it possible to install a shower room virtually anywhere in the home.
