From our factory in Warwickshire in the Midlands we have been manufacturing our exclusive range of affordable, high quality spiral stairs since 1987. We supply direct to both to private and commercial customers throughout the UK and the rest of the world.

Our spiral stairs are individually handmade from a range of materials such as cast iron, steel, hard wood and stainless steel to your specific requirements and our technical department can advise you on any spiral stairs required to meet Building regulations BS5395.

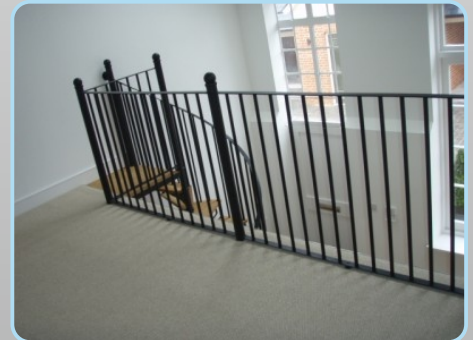

The stratford

Available in sizes from 1020mm to 1830mm diameter. Larger sizes can be produced to meet specific requirements. This image shows how the plain steel balusters create a clean modern look. Square balusters can also be used if preferred.

Landing balustrading is usually a combination of balusters and newel posts. This plain and simple look can easily be achieved, our technical team will help you with the design of your landing.

This practical spiral staircase is ideal for loft conversion or serving a balcony where space is limited. The Stratford spiral staircase is also available to meet the UK requirements of public usage. This image shows beech treads & a beech landing platform. This stair has been fitted with a metal riser bar to adhere to the 100mm gap rule and is generally used when small children are using the staircase

Please ask about the height of stair risers. Elite can produce lower rise steps, making walking up and down them easier for the old & very young.
